HITLER DEMANDS SHARE OF SWAG

BRITAIN DRAFTS MASSES FOR WAR

Prime Minister Neville Chamberlain has jammed through the British House of Commons a conscription law providing, for the time being, for compulsory military service of all men from the age of 20 to 21.

Except for the period of the last war's duration, England's people have been traditionally hostile to conscription. Hundreds of years have passed without the ruling class being able to put the people in the straitjacket of compulsory military service.

What none of his predecessors has dared to do for centuries, Chamberlain, violating the pledge that he publicly reaffirmed only four weeks ago, has now imposed upon the masses.

Why? In the name of Democracy and a Popular War!

But if the war is so popular, why is it necessary to force people by law-and by the police club that stands behind it—to join the army?

If the war is so popular ,why doesn't the British government content itself with opening up the recruiting books to volunteers?

The truth of the matter is that nowhere, in no country, do the people want war. Everywhere they feel consciously or instinctively, that the coming war, like the last one, will be a dirty imperialist war, in which millions will die like flies in order to preserve the profits of empire.

All the ballyhoo, all the lies, all the hypocrisy, all the bunk about "democracy" and "independence of small nations" has not yet whipped the masses into a chauvinistic frenzy satisfactory to the war-mongers.

So, for the "popular" war, the masses have to be dragooned into the army, conscripted like slaves whose life and liberty are entirely in the hands of the small clique of imperialists who rule the capitalist world and every country

Among the first steps in the "war for democracy" is the brutal violation of the healthiest and soundest sentiments

The imperialist gangsters-in England and in this country as well as in Germany-fear the freely-expressed will

That is why they resort to conscription. That is why they refuse to allow the people the right to vote on whether or not war is to be declared.

Sailors Set to Strike On All Pacific Ports

West Coast Seamen Gird for Showdown on Government Hiring Halls

ors Union of the Pacific is prepared to strike the West Coast unless all government agencies adhere to the written pledge given to the union by Harry Hopkins, Secretary of Commerce, that government-sponsored fink hiring halls will be closed and stay closed.

On April 18 Admiral Land, chairman of the U.S. Maritime Commission, in direct contradiction to Secretary Hopkins' promise of the previous week, announced to the press that the commission will open hiring halls in the port of Seattle when the commission begins its projected operations on the Seattle-Orient run.

Sailors Prepare Fight

Immediately upon publication of the admiral's statement, the Sailors Union held stop-work meetings up and down the Pacific Coast and reiterated its previous position for a coast-wise strike if the government fink halls are opened on the coast.

Hopkins had explicitly writ-

In line with this the government ink halls on the East Coast

were shortly thereafter closed. Pledge "Reinterpreted"

But after Admiral Land's statement and the union's wire to Hopkins, the Department of Commerce appears to have adopted a new position. Hopkins himself failed to answer the union's wire. Instead Davis K. Niles, assistant to Hopkins, informed the union that 'the Department of Commerce is not using hiring halls, but as the secretary wrote you we will, in accordance with the law, furnish lists of seamen to those entitled to have them. Instructions to this effect have already been sent to all U. S. Shipping Commissioners.'

One Third of W.P.A. To Be Fired by July 1

Republicans and Democrats Find They Have No Differences in Hacking Away At Relief Appropriations

One out of every three workers now on W.P.A. will be fired by July 1, if President Roosevelt has his way.

With the ink scarcely dry on his signature to a whole new series of armament appropriations obediently voted at his behest by Congress, running into some six hundreds of millions of dollars added to the billions already appropriated for the war machine, President Roosevelt sought to slash the relief appropriation for the coming year by one-third, to provide him W.P.A. jobs to be main-

with more war funds. W.P.A. officials, according to the United Press, April 28, planned today to remove 900,000 persons from the relief rolls this summer to compensate for the reduced budget for the next fiscal year" proposed by Roosevelt in his message to

If the W.P.A. officials carry out their declared intention of dropping 900,000 more, means that since October they

will have thrown off the W.P.A. a total of 1,450,000-more than 43% of those on W.P.A. in October will be out on the streets! Since employment in private

Swaps Demagogy With Roosevelt; Leaves Door Wide Open

AGAIN ASKS DANZIG

Hitler's Reichstag speech changed little in the continuing war crisis.

The most notable feature of the speech was the absence from it of any significant reference to the Soviet Union.

This striking parallel to Stalin's abandonment of attacks on German Fascism was further eloquent proof of the fact that the flirtation between Berlin and Moscow is by no means at an end.

Hitler concentrated his oratorical fire on the Western and the United

As everybody, including Roosevelt, expected, Hitler turned down Roosevelt's "peace" plea and reiterated his intention to restore Germany's "place in the sun" by fighting for it, if necessary.

Matching Rooseveltian demagogy with his own brand, Hitler swore up and down in his two and a half hour speech that war was the last thing he wanted, that he more than anyone else in the world was solicitous for the people and desired to spare them new slaughters.

Uses Versailles Treaty

As usual, he was able to buttress his arguments by throwing the Versailles treaty into the faces of his adversaries. From the point of view of the imperialist gangsters. of course, he is here on solid ground, for never was there a more monstrous piece of large scale international piracy than that embodied in the treaties which the Allies forced on vanquished Germany in 1919. German imperialism, defeated in one war, is now challenging its imperialist rivals again and cians are belatedly learning that at Versailles they gave birth to a Frankenstein monster which now threatens to prove their undoing.

Hitler could and did cite the endless record of British, French, and American rapacity in their own campaigns against defenseless colonial and semi-colonial peoples, before and after the last Great

S. W. P. CALLS ANTI-WAR CONVENTION

In accordance with the powers and duties assigned to it by the party constitution, the National Committee of the Socialist Workers Party hereby issues this Call to the regular national convention of the party, to be held in New York City, July 1 to 5, 1939. The agenda proposed by the Committee, together with regulations for the election of delegates, has been sent to all party branches. The Committee furthermore declares the time between now and the date of the convention to be a period of free discussion by the party membership of any and all issues, whether previously acted upon by the party or newly proposed. Discussion articles submitted to the national office will be promptly published either in the public party press or in special internal bulletins.

During the past months, the crisis of world civilization has deepened to an intolerable sharpness. Every sphere of

human activity-economic, social, political, cultural-trembles to its foundations. Summing up and focussing every conflict, there looms before mankind the immediate threat of the new world war. This coming war, like the last, in spite of the lying demagogy which tries to dress it up in moral ideals, will be, from the point of view of all the imperialist states, democratic and fascist alike, nothing else than a gangster struggle for resources, markets, colonies and possessions, for the chief privileges in exploiting and oppressing the great masses of

The stakes in the fight between the United Mine Workers of America and the Appalachian coal operators are growing higher and more important every day, as the large issues confronting the American labor movement project themselves into the scene.

This strike of 320,000 miners who might be joined next week another 100,000 unionists has significance not merely because of the huge numbers involved-decisive as this itself might be-but also because of the indispensable nature of the coal industry especially in wartime, and because of the strategic role of the U.M.W.A. in the entire C.I.O. movement.

Future prospects of the C.I.O. depend considerably on a victory or at least an avoidance of serious defeat by the U.M.W.A. in its present strug-

Questions of the role of the union movement in war-time. the next steps in unity negotiations between the C.I.O. and the A.F. of L., and the inner regime of the C.I.O. hinge on the outcome of the coal strike.

Roosevelt's intervention in the dispute is considered a matter of days. How he uses his powerful position and influence on the strike settlement will reveal much on what treatment labor can expect from his war machine. How John L. Lewis reacts to government intervention should furnish a pretty good gauge of Mr. Lewis's actions in the next war.

The Main Issue

Main issue of the strike is the U.M.W.A. demand for a closed shop. Already all economic demands have been withdrawn by the C.I.O. negotlators. Lewis has indicated his willingness to compromise still further and insist only on a union shop and the removal of in violation of contract.

To understand the vital importance of this issue one must remember that the A.F. of L. is supporting wholeheartedly the organizing campaign of its at the top of their voices until recent affiliate, the Progres- they reached U.A.W.-C.I.O. ofsive Miners of America, a reactionary and dual union in the orderly fashion. coal mining field.

The maneuver didn't other Trotskyist organization. that ruin of the C.I.O. is possible. The least the A.F. of L. bureaucrats would gain is further weakening of the C.I.O. thereby making probable a unity pact which would definitely tend to be reactionary.

Bill Green's Game

Latest proposal of William Green to the federal conciliator in the coal strike shows what a shrewd and demagogic Green knows of rank and file resentment within the miners union over Lewis' dictatorial control and unsavory record of SEN. REYNOLDS ON the 1920's. Green was part of that Lewis machine. Now he proposes a national miners' referendum to determine collective bargaining representatives, hoping thus to capitalize on the resentment.

Best answer to the phoney Green proposal is introduction of more democracy within the U.M.W.A. Ohio miners, for example, would take more kindly to the Lewis regime if district officers were elected, not appointed. It is the inner flaw within the C.I.O. set-up which the A.F. of L., even more guilty, uses hypocritically. A bureaucratic regime exists in both organizations. Lewis has the additional handicap of placing the albatross of Stalinism around the neck of the C.I.O.

Just as the interests of the entire labor movement are injured by the A.F. of L. attacks on the Wagner Labor Disputes Act, the invasion into the U.M.W.A. territory threatens to bring the possibility of a bigger open shop drive in major industry.

Powerful utility, steel and other industrial forces are backing the coal operators and insisting on an open shop drive. The A. F. of L. tight against the C.I.O. in this industry can only aid in those plans.

Somervell Announces New Cuts From Job Rolls

(Special to the Socialist Appeal)

NEW YORK CITY, April 27. -While President Roosevelt opens up the throttle to full steam ahead and Congress shovels in the dollars that are the war machine plunging down the tracks like a locomotive gone wild and headed straight for destruction, the unemployed are being forced to bear the full brunt of the cost.

Lieutenant-Colonel Brehon B. Somervell, local Works Progress Administrator, announced yesterday that next week he will lay off 13,740 workers in New York. Of this number 11,740 will be taken from construction projects and 2,000 from white-collar projects. This will slash the W.P.A. rolls in New York City down to 143,-

Destitution and starvation will thus be forced on additional tens of thousands so that Roosevelt and Congress can go on burning money in the war machine. The Welfare Department reports that they have been besieged with applications from people in desperate need as a restilt of the dismissal of 10,800 W.P.A. workers at the beginning of April, Home Relief officials estimate conservatively that they can declare not more than 12,500 of the relief workers dropped in April and May as eligible for city help, but acceptance of this number of cases, without considering tens of thousards of other needy families, would add about \$600,000 a month to the relief budget, which is enough to buy at least seven first-class fighting planes.

At the end of this week the W.P.A. will close three white collar projects in New York City-the analysis of electric utility reports, sponsored by the Federal Power Commission, and milk distribution and clinical reports on home relief Department.

Today the New York State Assembly passed by a vote of 107 to 27 the ultra-reactionary Devaney bill, which ostensibly prohibits the employment by the State or in the teaching systems of persons advocating the overthrow of the American government.

In reality the bill is designed to prohibit free speech and especially to prevent school teachers from explaining anything to their pupils but what is dictated by the representatives of Wall Street sitting in the state capitol at Albany.

The language of the Devaney bill apparently covers a much wider scope than the notorious McNaboe bill which is now in committee. The McNaboe bill specifically strikes at "Com-A.S.U. toward the LaGuardia munists," whereas the Devanboth bills are alike directed against the forces of labor and

The Red Herring

One of the major efforts of the present "investigation" of W.P.A. and relief by the House committee headed by the notorious Representative Woodrum who is a bitter opponent of any and all relief appropriations, is to prove that recipients of relief are "reds" and should therefore be thrown into the streets to starve.

A "red" in the eyes of Congressman Woodrum is anyone who does not salute the American flag three times a day. doesn't want to go to war to fight for capitalist profits, belongs to a union, or makes less than a Congressman's salary.

You have probably seen photographs in the papers of the Soviet pavilion at the New York World's Fair: a towering monstrosity, streamlined up to an enormous statue of a man in overalls holding aloft, in a Statue-of-Liberty attitude, a large star. The architect is Boris Yofan, most renowned of present-day Soviet architects, who did a similar job for the Paris Exposition, substituting for the man in over-

Yofan also did the Palace of the Soviets in Moscow, whose colonnaded tiers rise up like a huge wedding cake to form a pedestal for a gigantic statue of Lenin. That there is something esthetically grotesque in a building serving as the pedestal of a statue—and what statues !- this bit of grammar school architectural lore has yet to penetrate the Russian

At any rate, there is quite a story connected with Yofan's latest monstrosity. It seemsaccording to some one who should knowthat many months ago a pair of Soviet architects arrived in this country with a plan for a Soviet building at the Fair. This was submitted to the Fair's architectural board, which, as is the routine, criticised it and suggested certain changes so as to bring it into harmony with the surrounding buildings. The architects went back to Moscow, and no more has been heard over here of either of them.

This winter Yofan and an associate, K. S. Alabian, arrived in New York and presented an entirely different plan. On examining this one, the Fair's architectural board found that its ground plan was some fifty feet bigger than the space allotted to the building and, furthermore, that its central tower, bearing the workman-and-star, was one hundred and eighty feet high, which was just one hundred feet higher than the top limit which had been set for all governmental buildings at the Fair. The board was, therefore, about to return the plans with a request for drastic revisions when a wire came from the State Department

in Washington. Its general gist was that the two previous architects had been liquidated because their plan had been criticised, and that it would be much appreciated if the Yofan-Alabian plans could be approved by the board without any major changes. So the board, being kindly fellows, let the tower stand-it is the second highest structure at the Fair, being eclipsed only by the Trylon itself-and, to give room for the extra fifty feet of ground space, moved over three adjoining buildings, one of them being, incidentally, the Japanese pavilion. Yofan returned in triumph to Moscow, where he was fittingly honored. And just before he sailed, he gave to the press an interview in which he made a number of contemptuous re-

I found myself the other night on the campus of the City College of New York, taking in the Yipsels' anti-war strike. The meeting was held outside one of the college buildings, and attracted perhaps two hundred people. The Stalinized American Students Union, which for good reasons the college authorities "recognize" as the official anti-war student group, held its meeting at to more than 6,000 planes. The order calls for plane lege, with Joseph P. Lash and Heywood Broun as the chief speakers. I poked my nose into the Great Hall long enough to estimate the miles an hour, to destroy attendance there at about 1,000. The contrast between these figures is sad, but it reflects dits at vast distances, and no discredit on the Yipsels. They had plenty of banners, red flare lights, and slogans chantéd in unison, as well as some excellent speakers. The smallness of the crowd they drew simply reflects the great strides the war spirit Roosevelt's war preparations has made on our campuses.

There is, however, one criticism I would dent that Congress appropriate like to make. OUT OF THE PAST

By EMANUEL GARRETT

AUGUST SPIES* (Dec. 10, 1855-Hanged, Nov. 11, 1887)

"Barbarians, savages, illiterate, ignorant Anarchists from Central Europe, men who cannot comprehend the spirit of our free American institutions —of these August Spies was proud to acknowledge himself one.

To his prosecutors and defamers Spies admitted his "mistake"-he had chosen his place of birth unwisely. Born in Landeck, Germany (hence, a "foreigner") he did not emigrate to the United States until after his father's death, when he was already 17 years old. That disqualified him, said patriots, from advocating human liberty.

The Spies family was not exactly a wealthy one, but it lived in comfortable circumstances: His father, a forester, was able to provide his sons with private tutors, and other luxuries denied the usual working man. Thus it was that Spies had no contact with the proletariat, that is with the misery that is the proleariat's, until after he had arrived in America.

A Worker Among Workers

Settling at first in New York, he learned the furniture business. Within a year he moved to Chicago where, working in a factory he became fully conscious of the shocking conditions under which men lived and worked. Work, he discovered, was a privilege meted out by idlers to those whom it wished to employ when profits were to be gained.

In 1875 a friend invited him to attend a lecture on Socialism given by the Workingmen's Party of Illinois. Of a sudden he realized that here was the answer to the questions he had been asking. Studying what socialist literature was available, he became a convinced socialist and joined the Socialistic Labor Party in 1877. At the same time he joined the "Lehr and Wehr Verein", an armed body of 1,500 well-drilled workers organized in reaction to the many vicious assaults on workers by police and militia-men during that year. The patricians, themselves protected by their armed state services, placed a ban on the bearing of arms, and the Verein was dis-

Several times Spies ran for office on the socialist ticket. But like a good many of his comrades at the time who became disillusioned with the uses of the ballot box, the key to which lay in the bosses' pocket, he turned against political action completely, adhering to the anarchist wing of the workers' movement. Thus, failing to understand the limited, yet important, value of the ballot box in working class agitation, he gave up that field of action completely after a few sorry experiences and thereby cut himself off from a vital means of propaganda.

The S.L.P. began in 1880 the publication of the "Arbeiter Zeitung" as a daily. Spies began with the "Zeitung" as business manager and then became editor, working interminable hours each day, until his arrest on May 5, 1886. Active in building revolutionary workers' clubs in Chicago, a leading agitator for the

Many strikers fell under the Pinkerton and police gunfire. Spies left for his newspaper office immediately. Here he wrote a proclamation to the workingmen of Chicago. One of the type-setters added the slogan "Revenge!" which Spies later had removed, though it has come to be known as the "Revenge Circular." A call for a protest meeting in Haymarket Square was published in his

Spies arrived late at the meeting, as a German speaker he had expected to speak last. The meeting having not yet been opened he called it to order in a smaller location. Parsons, Fielden and others spoke. Detectives ordered the meeting stopped. The speakers refusd. A bomb was thrown. Police were injured and eight men were arrested. The great

Haymarket Case had begun.
Spies along with others of his comrades was sentenced to be hanged. When sentence was pronounced the court asked him if he had anything to say. He spoke for two hours. "In addressing this court I speak as the representative of one class to the representatives of another. . . . 'My defense is your accusation, the causes of my alleged crime your

While in jail, waiting for sentence to be executed. Spies was visited by a young woman who had come to the trial to see "beasts" and saw instead men who were sacrificing their lives for humanity. She thereafter devoted all her efforts to the freeing of the men. Her friendship with Spies having grown she became his wife so that there would be less obstacles put before her in her work for the Haymarket Martyrs. The bourgeois press seethed with fury and slime. She had married, not a fat, old money-bag, but a fighter in freedom's cause.

A Voice Pierces the Silence

As the day of execution approached and the appeals for pardon were ignored, Spies was prevailed upon, together with two other defendants, to submit a petition for clemency. But he soon repudiated the petition of which he was ashamed in a letter in which he proposed that he be hanged and the others freed. The others were not freed. Two were sent to jail; five to the gallows; one had committed

The hangman placed the black hood over Spies' head. In that silent moment before the rope was cut, Spies' piercing voice shattered the silence: "There will come a time when our silence will be more powerful than the voices you strangle today."

Maisky "Explains"

Passing through Copenhagen on his way back to London, Soviet Ambassador Ivan Maisky said Moscow's position was 'perfectly clear." This meant, he added, that in case of aggression, the Soviet Union would "come to the aid of Europe." Europe at present being divided into two camps getting ready for war, the ambassador's statement really came as something of a new record in ambiguity. Rumania, on its part, was still agonizingly uncertain about which bed to jump into, and Turkey still stood cautiously on the outside, waiting to see what Russia would do.

It was generally conceded among close observers of the trial that when Henderson took the stand, he would maintain complete silence concerning the obvious Stalinist tie-up of the ring. At no time has it been out of the realm of possibility that Henderson has a knowledge of the G.P.U. hand in the affair. If Henderson refused to air this tie-up, it can only mean that he is observing strict instrucions from the State Department to remain silent. In this connection, it has

been previously observed that the State Department is not averse to allowing the G.P.U. to strike at the American revolutionary movement. This friendliness of the government towards the G.P.U. is based on the effort to bring the Soviet Union into the Anglo-French and American "Stop-Hitler" Alliance. The prosecution and the State Department are leaning backward in order not to offend a future partner in the war for "democracy."

mankind. The interests and needs of the masses, of the workers and poor farmers and colonial peoples, lie and lie only in unremitting struggle within every nation against the war and the war-makers.

The war presents mankind with an irrevocable alternative. If the imperialists have their way, if they fight their war unchecked by their respective peoples then, no matter which coalition emerges victorious, tens of millions will be killed, many more millions wounded, incalculable wealth destroyed, cities and countrysides devastated beyond repair, a totalitarian tyranny fastened on the backs of every nation, and men throughout the world will face the prospect of a return for decades and even centuries to a literal and hideous barbarism. One perspective and only one offers a way out of this terrible prospect: If the workers and the masses of the people everywhere unite in opposition to the war of the imperialists against mankind, transform their war into a worldwide war of the oppressed against the oppressors, smash the whole rotted system of imperialism and build from its ruins a triumphant new socialist world of peace and abundance

In the face of the new war, the peoples, who will bear the awful burden of the war, find themselves divided by the traitors within their own ranks. In advance of the war, the parties of the Second International again act within the working class as the agents of the imperialists of their own countries, and summon the people to die on the imperialist battle-

The Third International, founded in the struggle against the last war, has completed its degeneration. It is the rankest and most polsonous chauvinist force to be found in the world

Nevertheless, unlike 1914, when the betrayal of the Second International came as an unanticipated shock with no organized preparation against it, today the front line of the fighters against the war is already formed. The most conscious and determined of the workers struggling against the world war have joined ranks in the Fourth International, and on a world scale march forward with all the strength of an unimpeachable revolutionary program and a shining banner that will never be lowered.

The war crisis dominates and determines every other issue. The Socialist Workers Party, American section of the Fourth International, calls this convention as the ANTI-WAR CONVENTION and sets as its task the clarification and consolidation of its ranks for the supreme task now facing the workers of the United States and the world: the struggle against the war and the war-makers.

Not Fit to Print

When Hoover's ex-Secretary of State lets out a yawp for war, or Wilson's chairman of the War Industries Board moves to get the same job again under Roosevelt, the Senate Foreign Relations Committee sets the stage properly and the newspapers blare the stuff out in headlines and reams of newsprint.

But when the Railway Labor Executives Association, constituted by the 21 principal railroad labor unions and representing over one million workers, sends J. G. Luhrsen, executive secretary-treasurer of the association, to inform the Foreign Relations Committee that these unions stand firm for a popular referendum whereby the people shall have the right to vote before the United States can take part in a war -that's not news. The senatorial committee does NOT set the stage for the unions' statement, and the newspapers practically ignore it.

All the news that's fit to print—with the bosses and their political agents deciding what's fit.

A Berlin I.N.S. news item states that if war does not come this month, it may be delayed until June, since Hitler considers May his unlucky month. Lots of persons poo poo the idea of the science of astrology yet firmly believe that only the bourgeoisie know how to govern the world. This is in the face of the fact that the bourgeoisie can't govern without making life a hell for the majority of us.

Dictatorship in Bolivia

Bolivia is one of the "democratic" South American "republics" that Roosevelt wants to bring into a union of great American "democracies" in order to ward off the oncoming attack of the fascist countries. We should rather say that Bolivia was one of those chosen countries.

For now Bolivia has gone back on our President. She refused to continue pretending that she is a "democracy" and Colonel German Busch has openly declared a totalitarian regime. The Bolivian Legation in Washington, fearful of the adverse effect the proclamation of a dictatorship would have upon American public opinion, hastened to deny that the word 'totalitarian' is applicable to the new Bolivian regime.

But what is a regime which openly prohibits opposition political parties, forbids trade unions to exist and destroys all forms of civil liberties? Call it by any name you please and it still remains a vicious fascist dictatorship.

What will our crusading democratic President do? Will he call upon the remaining "democracies" of the Western Hemisphere to ostracize Bolivia? Will he threaten Bolivia with sanctions unless the democratic regime is reinstated? We are certain that he will do nothing of the kind. For the simple reason that regardless of the nature of its regime, Bolivia remains a place where American capitalists can sell their products and invest their capital. The President will shut his eyes a little tighter and continue to prate about the American "democracies."

The rulers of Bolivia, not being competitors of United States capitalists are permitted to do anything they please to the Bolivian workers and peasants. Roosevelt or Ickes will make no squawk about Colonel Busch and his array of gangsters now crushing the life out of the Bolivian people.

Let those who believe that Roosevelt is sin-

cerely interested in protecting democracy in the Western Hemisphere rise to explain. What happened in Bolivia and President Roosevelt's silence furnishes more evidence that we are absolutely right in insisting that this business of defending democracy in the Western Hemisphere is nothing but a fraud. It means only defending the right of the capitalists of this country to exploit the Latin American peoples.

When Mrs. Eleanor Roosevelt showed some women friends through the White House, she pointed to the absence of all small decorations. 'We put away all the small things," the First Lady explained, because "we discovered visitorssometimes even high-ranking diplomats, are not above pocketing a Ming vase as a souvenir." Well, these diplomats didn't get where they are by picking on such small stuff as Ming vases. They lift those to keep in practice.

Roosevelt Provides

If a pious speech could be served on a platter and eaten like a roast pig with an apple in its mouth, the children of the United States could expect to become rosy-cheeked and robust by just feasting on the speech that was served up by President Roosevelt last Wednesday.

For if ever there was a speech that dripped with pious gravy, it was the one Roosevelt read at the opening session of the fourth White House Conference on Children in a Democracy.

Unfortunately not even the discovery of vitamins or the Fireside Chat has made a speech edible, and if any of the children of the United States were hungry before Roosevelt started reading into the microphone, they were just as hungry when he finished and can be sure that they will remain just as hungry until they die, if Roosevelt determines their future.

Democracy is dependent upon children and they are dependent upon democracy, Roosevelt said; therefore it is necessary that children safeguard the democracy and the democracy safeguard the children. But, and this is a BUT as large as Roosevelt's war machine-in many parts of the United States, according to the President's own admission, children are "not privided enough to meet the minimum needs for food, shelter, and clothing, and the Federal government's contribution toward their care is less generous than its contribution to the care of he aged."

Since Roosevelt's government allows the aged to die like stray dogs without even the doubtful benefit of "mercy killing," what this government does for the children, by its own admission, is so small that not even Roosevelt can find anything good to say about it.

He pointed out that in the United States, children are starved, denied an education, denied clothing, denied warmth, denied homes, denied every minimum necessity of childhood, denied even jobs and the opportunity to marry when

The President said that he was very much concerned about this, and concerned too about the lack of religious training given children. If what he says is true, that a democracy cannot survive without providing for the children born under its flag, then democracy in the United States is indeed doomed-it has not provided for even the most elementary needs of its

What does President Roosevelt intend to do about this condition which he deplores with such beautiful words? Wait a whole year, he says, for "recommendations" from the small audience of rich people who assembled at the White House to applaud his pious speech-and then see. "Godspeed in your high endeavor," were the words Roosevelt used to end his speech.

Roosevelt of course is not so stupid as not to have some kind of solution to this problem, although he mentioned it only casually in his speech-that a democracy cannot measure its success even by its armaments unless it provides for its children. Roosevelt's solution is connected precisely with the armaments he is heaping up with the billions of dollars he has snatched from the unemployed and the children of the United States.

Every child in the country, when he gets big enough to shoulder arms, will be provided with a bright shiny rifle and shipped overseas to mow down the children of other countries and be moved down himself by the bright shiny rifles with which the capitalists of other lands have provided their working class and farmer

This is what Roosevelt means when he explains that a capitalist democracy in order to endure must provide for its children.

Senator William E. Borah denounces the European democracies as treaty spoilsmen and advises youth that any war emanating from the current crisis would be "sordid and imperialistic." and would not involve the question of democracy or totalitarianism. "These European powers, whatever may be their idea or ideology or political views, pursue one and the same course when they come to deal with international affairs. They alike violate treaties, disregard the most fundamental principles of right, pursue methods which inevitably lead to war, and then call upon the United States, Canada, and other nations to save them from their own intolerable and vicious methods." They call upon the United States on the same theory as one calls upon a pupil who has out-

French imperialists have developed these traits to a fine degree, in the process of carving an empire out of the world. The French have had to play second fiddle to the British when it comes to reckoning up colonial spoils. Where the British Empire contains 500,-France contains 100,477,000. Each Englishman has approximately 13 colonial slaves working for him, while for France the ratio is 21/2 colonials to each Frenchman.

WORLD-WIDE EXTENT OF FRENCH EMPIRE

The French Empire is divided as follows:

(1) The American and Australasian colonies: territory of 129,978 square miles-population of 1,112,000.

The colonies supply an enormous manpower for the French imperialist army. Figures for 1935 show that (1) In the French Foreign Legion there were 16,500 colonials; (2) The African army had 103,500 soldiers and (3) The Colonial army had 87,500. There were 230,000 soldiers overseas in 000,000 odd people, that of 1935 and the number has probably doubled by now. Forced enlistments and recruitment drives have been going on for over a year.

By Max Shachtman-

The conscription law proposed to the House of Commons by the Chamberlain crew is extremely enlightening, from at least two angles.

The first is the obvious contradiction between a law to conscript the young men of the nation into the army, and the loudly disseminated myth that the war which this army is to fight is overwhelmingly popular among he people. Anxious to maintain its carefully-acquired reputation for lying, the capitalist press, both here and in England, prominently displays reports that the youth of Britain is voluntarily flocking into the army. But if this is really the case, why is it necessary to resort to conscription? If there are so many volunteers. why must force be invoked to make them join

The Labour Party's Opposition

But as said, this aspect of the Chamberlain proposal is all too obvious. Less so is the alleged opposition to the conscription act on the part of the Labour Party spokesmen. Alleged-because it is not real, not consistent, not durable.

How easy it is for the Chamberlain group to dispose of such opposition by a contemptuous gesture or a cynical remark. In effect, this is all that the supporters of the Prime Minister have to, and do, say to their Labour Party critics:

"The Honorable Gentlemen of His Majesty's Ever So Loyal Opposition seem to us to be lacking in patriotism, love for democracy, or even respect for their own avowed position. In fact, objectively. they are aiding and abetting that very policy of appeasement to which, not so long ago, they took such vehement objection.

"When the Prime Minister, in his ardent attempts to preserve the peace, returned from Munich, he was assailed for not taking a firm stand against the German Chancellor and the totalitarian powers. The Honorable Gentlemen refused to take into consideration the fact that the Empire was not then in a position to implement by means of warfare the firmer stand which it might have been necessary to take at Munich. They showed their inconsistency then by insisting that a position should have been taken last September which could not but have meant war, and at the same time they recognized England's disadvantageous situation in the crticisms they made at the same time of our lack of military and aerial preparations. We were then the ones who best defended the interests of the British Empire and. consequently, of world democracy.

"Now, however, when the situation is ripe for a really firm stand by England, a stand which we must be ready to back up by armed strength, we again confront the inconsistency of the Opposition. Do they perhaps intend to fight Hitler's army with printed copies of their eloquent speeches? Or are they really so innocent as to imagine that we can wait until the Royal Army is built up to war strength by volunteers who are, alas, not forthcoming in sufficient numbers?

"It was the Opposition that insisted upon an aggressive policy towards the totalitarian regimes. Now that such a policy is being practiced, the Opposition refuse to make possible its implementation. We are prepared to challenge them to bring the issue to a head, for we are certain that they will not pick up the gage of electoral battle."

Whoever Says A.

In their own way, the Tories would be entirely correct. The Labour Party patriots have a position which makes it impossible to oppose such measures as conscription. Whoever says A, according to the German proverb, must say B. Whoever demands so violently, as the Labour Party leaders have demanded for months past, that the country take steps in the conflict with Hitler which inevitably bring the war closer, cannot, at the last minute, pretend to balk at what, in the light of all that has happened, is a comparatively minor step in preparing for that war.

After all, the Labour Party politicians are just engaged in a game of pretense and petty factional warfare. A number of them have written in the quite recent past in favor of reconsidering the traditional English hostility towards conscription. The present official "opposition" to the law has nothing whatever in common with a principled stand. It is opportunistic from beginning to end. Tomorrow will prove to the hilt, when the Labour Party leaders come out openly, as they did in the last world war, as the most zealous and effective recruiting agents for the government.

But before they take on that role, they want a little more recognition than the Chamberlain government has condescended so far to give them. Not that Messrs. Atlee and Co. are ambitious or overbearing in their demands. Far from it. They would, in all likelihood, be satisfied with even less than Lloyd George gave them in his cabinet during the last world war. In other words, they would probably go along without so much as a murmur if the Chamberlain cabinet were reorganized to include a couple of such stainless democrats as Winston Churchill, notorious friend of the Soviets. and Anthony Eden, notorious enemy of the Tories -and possibly to exclude Chamberlain himself.

Naturally, if a "genuine" National Government were established, one that would include in the cabinet a few regular Labour party wheelhorses. that would be so much the better. In that case, they would make the Chamberlain-Cliveden gang look like so many chicken-hearted pacifists by comparison with their own unrestrained military

If the whole record of the Labour Party leadership is anything to go by, it is a safe prediction that as the weeks go by their opposition to Chamberlain's present conscription law will not only be abandoned but that they will be in the forefront of the House of Commons mob howling for conscription for all able-bodied cannon-fodder up to the age of 35, with exceptions made only for those sterling patriots, the shilling-a-year men who must perforce stay behind the lines in order to keep industry going at top speed and war profit rolling in accordingly.

And it is just as safe to add the prediction that the American equivalent of the Labour party leadership—the bureaucracy of the trade unions in this country-will, at the right moment, give its English brothers cards and spades and still beat them at the game.

The actual facts are damningly clear. On March 5 the Junta took power. The next day the Negrin cabinet, including the Communist ministers. FAKING DATES TO FAKE AN EXPLANATION

But how explain all this away? The "manifesto" which attempts to do so is dated March 18. This date, the most could attempt, is undoubtedly a fake. The central committee was not in Spain but in France. since March 6, and had they written the document on that date, it would have been published long ago, and not on April 21. The dateline in the Daily Worker, "Paris, April 3 (by mail)" is pure fakery, for the huge Stalinist apparatus cables immediately here tenthrate documents, let alone one of such significance, and why hold the document in Paris the Fourth International. from March 18 to April 3? In order not to answer, the usual paint brush is employed. The "manifesto" is entitled the 'Casado - Trotskyite treachplausible which the Stalinists ery", and is bestrewn with references to "Trotskyites". The fact that our whole movement. in Spain and internationally, was the only one in the whole workers' movement which irreconcilably denounced the Miaja-Casado Junta and that we characterized its counter-revolutionary character while the Stalinist press remained silent —this established fact does not trouble the Stalinist fabricators. Today, the peasantry would not have the prospect of seeing the landowners come back as the victors nor the workers the prospect of a slavery regime.' Unfortunately for the Stalinists, however, even their own it, because we had the forces collaborators have divulged part of the truth. For example, Negrin's foreign minister, Alvarez del Vayo, wrote in the British weekly, the New Statesman, (reprinted in Left, April, "Of the three conditions for

making peace which Dr. Negrin had stipulated in that last meeting of the Cortes at Figueras on February 1-the independence of Spain, freedom for the Spanish people to determine ed, not to answer, but to avoid its destiny, and the assurance that there would be no reprisals - we knew perfectly well that the only one still possessing practical meaning, the only one we must strive for, was the third. . . it was a question of making possible the departure from Spain of some twenty thousand marked men and women. . . It was for this that the Negrin government was still disposed to resist—and for nothing else."

To save the hides of the Popular Front leaders—that was Negrin's sole program and that was the program of his successors. The "manifesto" cannot, any more than previous alibis, conceal this fact nor the indelible fact that the Popular Front—whether headed by Caballero, Negrin or Miaja – the revolutionary
