NEW DEAL HOUNDS WPA STRIKERS

VOL. III, NO. 53

# Attorney General **Seeks Indictment Of Union Leaders**

Attorney General Frank Murphy announced to the press on Wednesday-July 19-that he had ordered the United States District Attorney in Minneapolis to conduct a grand jury investigation there "into charges that W.P.A. strikers had interfered with persons wishing to work in Minneapolis and St. Paul."

Thus Murphy has already proceeded to carry out the threat he made in his July 13 statement that "There must be no strike against the government of the United States by any one, anywhere, at any time. . . . Those leaders who have moved to exploit the protests of W.P.A. workers in violation of the Federal statutes will be prosecuted."

Murphy then singled out Minneapolis, as a place where "evidence of labor racketeering or criminal conspiracy against the nation's relief program" may "result in indictments." And now, according to the press reports, he has moved to get those indictments.

Obedient to Murphy's commands, Victor E. Anderson, United States District Attorney in Minneapolis, announced the same day that the Federal government "undoubtedly will issue complaints and begin prosecution of strike pickets or demonstrators within a few days." (Minneapolis Tribune, July 19.)

He is only waiting, said Anderson, for the formal report of the Federal Bureau of Investigation G-men who converged on this city when the strike began. But he has already "surveyed the evidence" they gathered and is sure that it provides the basis for prosecuting strike pickets.

## **Roosevelt Move Is Part Of His Anti-Labor Drive**

This Minneapolis move is perhaps the most brazen antilabor action yet taken by the Roosevelt Administration. If it gets away with this, it will go on to prosecute W.P.A strikers everywhere, as part of the administration's general onslaught against the labor movement.

"The President is now definitely aligned against Labor."

# Every Union Must Act to Defend The Minneapolis Trade Unions!

Such was the accurate conclusion reached by the Minnesota Union Advocate, organ of the St. Paul Trades and Labor Assembly, in its editorial of July 13.

Ruthlessly the Roosevelt administration seeks to crush the militant labor movement. Roosevelt got from an obedient Congress a law destroying the union wage on W.P.A. projects, but this was only his opening gun in a long-range campaign to destroy the entire wage-structure of the building trades unions, as is revealed by Attorney General Murphy's announcement of an "anti-trust" prosecution of the building trades unions in September. When the W.P.A. construction workers struck against this union-destroying decree, the Roosevelt administration declared their strike illegal, punished the strikers by dismissing them from the W.P.A. on the fifth day of their strike, declared them ineligible for direct relief, and sent an army of G-men into the principal strike areas to act as strikebreakers and gather evidence for the prosecutions which are now being initiated in Minneapolis.

## Increasing Examples of His Anti-Labor Game

Roosevelt's appointees, the United States Maritime Commission, are openly engaged in an attempt to destroy the union hiring halls of the West Coast seamen's unions. and are training finks for a war against the unions on "training ships" which even the pro-Roosevelt National Maritime Union has finally been forced by its rank and file to boycott. Roosevelt's National Labor Relations Board now will order plant elections upon application by employers-the most vicious union-busting device conceivable. Roosevelt himself, in his April 27 relief budget message, dictated to Congress the slashing of one-third of the W.P.A. rolls, down, down, down, from the November figure of 3,350,000 to his figure of 2,000,000-an absolute drop of 1,350,000 jobs.

"The President is now definitely aligned against Labor." That's the simple truth which every worker must henceforth take into account.

## Why He Picked Minneapolis For the Attempted Frame-Up

Murphy's choice of Minneapolis to initiate his prosecutions is not a haphazard choice. He has picked out Minneapolis for a number of reasons.

First and most immediate, Minneapolis labor has the honor of being the most united phalanx in the fight against the W.P.A. cuts. A.F.L. and C.I.O., employed and unemployed, skilled and unskilled, have joined together in Minneapolis in a Joint Action Committee which made the strike there 100% effective, closing down all projects. If that had only happened in all other important cities, the W.P.A. strike would have won its demands by now hands down. For this "crime," Minneapolis labor is to be prosecuted by the Roosevelt administration.

Second, Minneapolis is the best-organized city in the United States. Under the inspiration of the great truckdrivers' strikes of May and July-August, 1934, that city, once an open-shop town, has a higher percentage of union organization per working population than any other city in the country, according to the U.S. Department of Labor. Wages in the teaming crafts have more than doubled since 1933, and other wages have risen correspondingly. For this "crime," too, Minucapolis labor is to be prosecuted by the Roosevelt administration.

Third, Minneapolis labor has the honor of having initiated the movement which transformed the International Brotherhood of Teamsters from a craft union of 60,000 members to the biggest and most powerful union in the country, semi-industrial in form, numbering now at least 400,000 members. As late as 1935 the International was an aristocratic organization of driver-salesmen in the cities. Now it is primarily constituted by the over-the-road truckers, one of the two or three most strategic groups of proletarians in economy. This great movement came out of the North Central District Drivers Council initiated by General Drivers Union Local 544 of Minneapolis, which generously gave its most qualified forces to the creation of

this movement. The eleven state over-the-road agreement wrested from the great trucking corporations last year expires on August 31, and the unions are girding to secure renewal and betterment of this unprecedented contract. For this "crime," too, Minneapolis labor is to be prosecuted by the Roosevelt administration.

Yes, the Minneapolis trade union movement is today the most progressive section of the entire American labor movement. And for this "crime," it is to be prosecuted by the Roosevelt administration,

# Minneapolis Labor Leaders Foresaw Roosevelt Move

With their usual intelligence and ability, the Minneapolis trade union leadership foresaw this move of the government. The resolution adopted by a joint meeting of A.F.L.-C.I.O. trade union leaders on July 15 at the Central Labor Union, placing responsibility at the door of the Roosevelt administration for the murder of Emil Bergstrom and the shooting and injury of 24 other strike pickets, concluded :

"That this labor movement calls upon the people of the United States . . . to unitedly defeat any prosecution or frameup attempt as a result of the murderous assaults of the Minneapolis police."

Now Murphy and his G-men are attempting the frameup. Every worker and friend of labor, every sincere believer in democratic rights, has the elementary duty to solidarize himself with the Minneapolis labor movement against this attempted frameup.

Every trade union and fraternal organization in the country should adopt resolutions protesting against this prosecution, send the resolutions adopted to President Roosevelt and Attorney General Murphy, with copies to the Central Labor Union, North 8th Street, Minneapolis, Minnesota.

Minneapolis is only the first intended victim. Stop Murphy in his tracks before he gets started!

Major concentration point of the C.I.O. organization work in the next period is the packinghouse industry.

This was emphasized last week by John L. Lewis, speaking in Chicage, home of the "Big Four" packers, Armour. Swift, Wilson and Cudahy.

There is a twofold aim in the C.I.O. concen ration on this industry. One is organizational; the C.I.O. wants a real base in Chicago and this industry. The other is political; the C.I.O. wants a powerful weapon to assist it in winning the farmers' support to the aims of the C.I.O.

#### Terrible Conditions

Few industries in America have the notorious reputation for terrible working conditions as the packing houses, especially in the Chicago area. Many years ago Upton Sinclair achieved international fame with his devastating expose of these conditions in his novel. "The Jungle.". They haven' changed much.

A basis for unionism was always present because of the rotten conditions. The A.F.L. didn't succeed in the past, and the C.I.O. muffed its big opportunity two years ago because the Stalinists were in complete charge of the packing house campaign.

One must add, however, that in certain sections of the country, where the A.F.L. has progressive leaders, they do have good and strong unions in packing houses. In Ohio, for example.

Recently, the C.I.O. had a resurgence in the packing industry. Top C.I.O. leaders have been directing the work. A national convention of the Packinghouse Workers Organizing Committee was held in Chica go.

Delegates from 94 loca unions attended, and the P.W C.C. claimed 78,000 out of the 129,000 directly employed in this industry.

In 14 Armour plants, the P.W. O.C. has been certified by the National Labor Relations Board as sole collective bargaining agent. In most of the Chicago plants, there is a dispute between the C.I.O. and the A.F.L. on the question of representation. National Labor Re-

#### The Referendum and the Fight Against War

The basic reason why the great majority of the people are in favor of the war referendum is because they are afraid a war is coming and they do not want a war. The bulk of the people-the workers and farmers and teachers and professionals and small shop-keepers-know that they have nothing to gain and everything, from their lives to all of their liberties, to lose from a war. They are looking for some way to stop the war, or at least put a big obstacle in its path. They believe that the popular referendum is the way in which the war can be stopped, since everyone knows that if the people had a free chance to decide, they would vote against participation in any war which is now or is likely to be on the horizon of the United States.

#### A Democratic Demand

Revolutionary socialists, and their party, the Socialist Workers Party, do not think that a popular referendum can, in and by itself, stop war. We believe that modern wars spring from causes which are deep within the present. capitalist system of society; and that to get rid of war permanently we shall have to remove those causes by overthrowing capitalism and building in its place a free socialist

lations Board elections probably will be used to settle this question.

#### Principal Demands

The principal C.I.O. demands in the proposal for a signed contract include full recognition of the union, reduction in the speedup, establishment of a proper seniority system, and the elimination of health hazards, as well as wage adjustments.

In his speech, Lewis indicated a realization of the need of working with the farmers in connection with the packing house drive. Just as milk companies try to play off the truck drivers and the dairy producers, the meat packers seek to divide those who work on the farm and those who toil in the packing houses.

It will be a real job to offset this device of the "Big Four nackers.

Calling on Roosevelt to force the big companies to sign agreements indicates that Lew is, urged on by the Stalinists still has many illusions.

It seems almost incredible that in Chicago, where the steel workers were massacred be cause of Roosevelt's doublecross, the C.I.O. is prepared to bank on this same man for assistance.

Unless the C.I.O. adopts more realistic plans, there is a possibility that another "Little Steel" tragedy can occur. Depending on local or state officials is just as fatal. The same old gang that sent the Chicago killer cops against the steel workers remains in power.

society. The Sixty Families and their agents who administer the

government for them will go to war whatever laws are on the statute books. In an article attacking the Ludlow bill, Walter Lippman once gave this cynically away: "If an American President," In wrote, "wants to go to war, he can go no matter what the Ludlow amendment says."

Nevertheless, we, as revolutionary socialists, fully and firmly support the demand for a popular referendum on war. We stand with the great majority of the people against the war-mongers and the war-makers. The proposal for a war referendum is truly democratic, and revolutionary socialists favor every genuinely democratic process. The question of the war must be brought into the light of day! The people, in endorsing the war referendum. give expression to their hatred of the war and their wish to struggle against it. We share that hatred, and take our place in that struggle.

The fight for the war referendum, whatever its limitations, is unquestionably one powerful means of fighting against the war. This is shown plainly by the nature of the opposition to the referendum. The movement for the referendum finds itself at every stage in the sharpest conflict with the war-mongers. If there is still disagreement about the best means for fighting war, we can learn from the experience of common struggle.

#### Upon Whom Shall We Rely?

One lesson can already be drawn from the experiences of the movement for the war referendum. That lesson is that the "official" leaders of the movement, the Ludlows and LaFollettes, cannot be relied upon. They give lip service in speeches and at election time, but they have already shown in practice that they cannot be counted on to carry the struggle through.

In the first place, they have not rallied the people behind them in a great popular wave that would sweep over the heads of the opposition. They jockey around in the offices or committee rooms of Washington, and permit the war-mongers to file their bills away in dusty pigeon-holes. For such a cause as the war referendum, there is no hope in legalistic by-play at the top; strength can come only from the surging voice of the people.

In the second place, they have tacked so many modifications onto the simple, clear demand for the referendum that they have warped it beyond recognition. With all of Latin America, all United States possessions (including, no doubt all consulates and embassies, which are technically possessions, in every country) excluded not merely if invaded but even at the immediate "threat" of invasion, a

cause he is 'illegally' in the reasons to suspect that economy is not the only consideracountry.'

clever statesman could find a way of maintaining that the referendum could never apply.

In order to bring the proposal back to its clear original form, and to put it on the most solid foundation, three changes in the current versions are necessary :

(1) It should call for a direct, popular, referendum vote in the case of any and all wars. This is the only safeguard. History has shown that diplomats in each and every country are always able to claim that any war into which their nation enters is a "defensive" war. Calling a war defensive is only a way of trying to make it look respectable. The people who should decide whether to fight a war, are also the ones to decide whether or not a given war is defensive.

(2) The referendum decision should be required not merely prior to any declaration of war, but prior to the use of any of the armed forces of the United States in any armed conflict whatsoever. Nowadays wars are sometimes not "declared", but undeclared wars can be just as destructive as any others. The point is for the people to decide not only the partly formal question of the declaration of war, but the concrete question of the war itself, which means armed conflict.

(3) In the war referendum, the right to vote should be given to all of the age of 18 and over. Those who are 18 and over are called upon to die in the war, are drafted. If they are old enough to fight in the war, they are old enough to vote on the question of entering it.

The people want the war referendum. That is the unchallenged fact. What must be done is for the people themselves to take the fight for the referendum into their own hands. Nothing has been or will be done by waiting for Congressmen and Senators. The issue of the referendum must be brought into every trade union, farm organization and farmers' cooperative, every fraternal society and club and youth group. Rallies, petitions, speeches, meetings, canvassings must gather the already vast but unorganized support of the referendum into a powerful, united force. Before the assembled might of the people, the secret diplomats, the star-chamber heroes, the war-mongers and their fellow conspirators, will be routed into the open and compelled to give their accounting.

Let the people decide!

SOCIALIST APPEAL

# By Dwight Macdonald W.A.A. Leaders SPARKS IN THE NEWS Self-Accused

#### Taxes and the New Deal

Taxation is a notoriously dull subject. Stuffy Republican journals print lengthy articles about it. but the left-wing press rarely gives any attention to the subject. This would seem to be a great mistake, for of all the tricks in the bag of that master shell-game politician, Franklin D. Roosevelt, of all his ingenious devices for fooling the masses, taxation is in some ways the most effective.

A recent Gallup poll found that one out of every four persons asked actually thought he paid no taxes at all. No less than 71% of these persons who thought they paid no taxes said they were for Roosevelt-as against 54% of those who knew they were paying taxes. In other words, the less a citizen knows about taxation, the better he likes the New Deal.

There is a general impression, especially among the lower income groups, that the New Deal "soaks the rich", that it has been redistributing national purchasing power by collecting taxes from corporations and millionaires and spreading these billions out over the farmers, workers, unemployed. Actually, the New Deal has financed its spending programs not by heavy taxes on the rich-as, for example. the British Government has been doing ever since the war - but by selling Government bonds and notes to the banks. This amounts to postponing the whole question as to what class shall pay for the New Deal's social reforms, since the bonds will not have to be paid off for many years.

But this is just the beginning of the story. Most of those who told the Gallup investigators they paid no taxes were earning \$20 a week or less. Calculations show that a person getting \$20 a week pays taxes today of no less than \$100 a year-or five weeks' pay. The reason, of course, these people thought they were not being taxed was that they paid no income taxes or other direct taxes. The joker in the deck, the elusive pea under the shell that Franklin D. manipulates so cleverly, is "hidden" taxation levied on consumption: sales taxes, tobacco, liquor, gasoline, and a thousand and one other taxes.

The wartime taxes on amusements, playing cards, etc., first awakened legislators to this rich mine of revenue. Consumption taxes have two great advantages: they bear most heavily on the masses, and hence are popular with the ruling class; and yet, extorted in driblets of pennies and usually without the consumer being aware of them, they awaken no great popular protest.

Pennies become dollars very fast, however, in this game. The Northwestern National Life Insurance Co. has published a table of indirect taxes paid by an average family living on \$150 a month (\$1800 a year):

	1	Monthly	Taxes	Taxes
Item		Budget		(%)
Food		\$43.50	\$3.39	7.8
Shelte:		30.00	7.83	26.1

MEN AND WOMEN OF LABOR

Clothing	. 16.00	1.52	9.5
Fuel, Light	11.00	1.07	9.7
Automobile		3.00	20.3
Recreation	3.00	.31	10.3
Life Insur.	5.00	.18	3.5
Sundries, Misc.	26.75	2.92	10.9
Monthly Total:	\$150.00	\$20.22	13.5
Annual Total:	\$1300.00	\$242.64	13.5
Corporations: \$	\$1,300,0	000,000	_

Consumers: \$3,400,000,000 Of the si4.200,000,000 taxes collected by local, state and national governments last year,

no less than \$8,000,000,000 was in the form of these hidden, indirect taxes. (The National Consumers Tax Commission, as reported in the N. Y. Times of June 19, last.) It is true that local and state governments have made even greater use of these "hidden" taxes than has the New Deal, but F.D.R. is learning ed, - including suspension onefast

day stoppages as a protest."

**Daily Worker Forgets** 

In Workers Age of June 24 last, Cecil Owen, publicity director for Labor's Non-Partisan League, pointed out that in 1929 corporations paid \$1,200,000,000 in Federal taxes while consumers paid \$1,000,000. In 1938, after six years of New Deal "reform", corporations paid \$1,300,000,000 and consumers \$3,400,000,000. True, corporations pay less today because they are taxed on profits and profits are less than in 1929

But the point is that the New Deal has raised the rates of taxation on business very little. For all the outcry about the undistributed profits tax, it produced a mere \$75,000,000 a year and the effect of its recent repeal by Congress has been practically nil either on business or on Federal revenues. On the other hand, the New Deal has piled on the hidden taxes to a towering total. Tobacco and liquor alone last year yielded almost as much revenue as the entire corporation tax.

But the real discovery of Franklin D, is the payroll tax now being collected under the pretense of setting up a "reserve fund" for the old age and unemployment insurance provisions of the Social Security Act. As oJhn T. Flynn demonstrated in "The Social Security its approval to both proposals." Reserve Swindle", an excellent article that recently appeared in Harpers, these payroll taxes are actually being used to pay the current expenses of the Federal government, and the "reserve" idea is a gigantic hoax and ers Alliance are currently infraud. The swindle is so barefaced, indeed, that the New Deal has been forced to back down a bit: Congress recently was forced, by mounting public protests, to lower the rate of these taxes. The daring and scope of this particular bit of shell-game New Deal politics can be grasped if one remembers that last year these payroll taxes yielded no less than \$1,500,000,000, practically all of which was at once spent for current governmental expenses. And the rates, even after the recent lowering,

are adjusted so that this sum will increase greatly in the next few decades.

## Stalinist Stooge Spoke Too Soon

Len de Caux, the Stallnist stooge who somehow got to be editor of the "C.I.O. News", has a bad habit of guessing wrong. In the latest issue of the "C.I.O. News", dated July 17, Mr. de Caux gives the front-page banner head to the valiant fight that the "left wing" New Dealers are supposed to be putting up in the Halls of Congress for the prevailing wage. Senator Murray, New Dealer from Montana, gets a great big boost from Len. But before de Caux's paper arrived in the mails, Monday's papers announced that Murray, along with the rest of the two-faced "friends of labor" have deserted the fight.

Under de Caux's editorship, the "C.I.O. News" has consistently played down all items unfavorable to the Roosevelt administration, even going so far as to keep out of the paper or give little space to John L. Lewis' occasional blasts against the administration. Lewis' denunciation of the "Democratic majority of Congress" in Chicago last Saturday does not appear in the "C.I.O. News"-although it is supposed to be the official organ of the C.I.O.!

#### WILLIAM H. SYLVIS (Nov. 26, 1828-July 27, 1869)

The Civil War nearly wrecked the union movement, decimating its membership, suspending its activities. Everywhere, bosses undertook an organized offensive against labor standards

Yet, out of this period of depression in the union movement grew the first great advance towards a national organization of labor. The man who accomplished this was William H. Sylvis, the first great leader of American labor. He, for example, saw the bosses' game: "To effectually smother in its infancy any disposition the men might have to fraternize . . . they commenced to work on their prejudices. arraigning the representatives of one religion or one nation against those of another. . .

Sylvis had been born in Pennsylvania into a poor wagon-makers family. The Depression of 1837 had scattered his family and he had become an iron moulder, wandering for a time as a journeyman, then settling down in Philadelphia. Local strikes were frequent in the industry. In the course of a strike in 1857, Sylvis was elected shop secretary. After the strike, he was elected recording-secretary of the Iron Moulders union which had been organized in 1855 and which was destined to mirror the trend of the labor movement-from pure and simple trade union action, to political action, to economic action again, etc. Sylvis, almost on the heels of his election, introduced a resolution for a national convention of iron moulders. When the call for the founding convention of the Iron Moulders International Union, (Philadelphia, 1859) was issued, he was one of the two signers.

With the Civil War fast approaching, Sylvis was active in the anti-war movement which was then very widespread. In February of 1861 he presided at a national convention of workers who were opposed to the war. However, when the war had actually begun, Sylvis, as did most of the labor leaders, supported the war.

The union had virtually gone to pot with the outbreak of war. In 1863 it was reconvened, and Sylvis was elected president. Viewing trade union action as only a half-way measure, useful so long as the wage system lasted but incapable of solving the basic problems of the wage earners, he introduced into the union proposals which looked to the abolition of the profit system. In his 1864 report he, among other things, recommended cooperative foundries and a national trades assembly with an all-embracing program.

Such a body came into being in 1866 as the result of the "Labor Congress" which met in Baltimore as the first meeting of the National Labor Union. Sylvis two years later was elected president, and thus became the spokesman of 600,000 workers, the largest organized labor force in the country up to that time. The

### FIGHT WITH THE SOCIALIST WORKERS PARTY FOR:

- 1. A job and a decent living for every worker. 2. Open the idle factories-operate them under
- workers' control.
- 3. A Twenty-Billion dollar Federal public works and housing program.
- 4. Thirty-thirty! \$30-weekly minimum wage-30-hour weekly maximum for all workers on all jobs
- 5. Thirty dollar weekly old-age and disability pension
- 6. Expropriate the Sixty Families.
- 7. All war funds to the unemployed.
- 8. A people's referendum on any and all wars.
- 9. No secret diplomacy.
- 10. An independent Labor Party.
- 11. Workers' Defense Guards against vigilante and Fascist attacks.

# 'Inaccurate' Roosevelt

Karl Marx once made the interesting observation that rulers are always far more class-conscious than their subjects, because in seeking to preserve their power the rulers have to be clear in advance what the effects of their decisions will be. Especially in these turbulent times, it is certain, rulers do what they do with a conscious understanding of all the consequences and implications of their actions.

When, in his April 27 relief budget message. President Roosevelt told an obedient Congress that the figure for W.P.A. should be \$1,477,-000,000 and a maximum of two million jobsand Congress did as he said-he was unquestionably acting on the basis of a carefullythought-out program.

The President has at his disposal the most efficient and large-scale fact-finding apparatus available to any man in the world. The Statistical Bureau of the Department of Labor is justly famous for its accuracy and comprehen- to be President Roosevelt's right-hand man. siveness. The research bureaus of the Department of Commerce tell the President the day-today facts about production in each industry, proday facts about production in each industry, pro-ductivity per man, extent of employment and Talk to Stalinists! unemployment, just about as accurately as any society will ever be able to compile similar data. Likewise the Department of Agriculture provides the President with the best-possible data on agricultural production and the extent and possibilities of employment in the rural areas. In a word, when the President wrote his relief budget message, he knew better than any of us just how many people were unemployed and how unlikely were their chances of finding employment during the coming year. Yes, Roosevelt knew just what he was doing when he wrote that message. By limiting the number to be employed on W.P.A. to two million Roosevelt knew-he knew in his mind and in his heart-that he was condemning at least ten million others to the low-standard local relief systems-if they could get on relief. He knew it and yet he did it. He did it because every last dollar that he can hang on to. he wishes to spend for his war preparations. He has long given up hope of reviving American industry by "priming the pump" at home. His face is turned toward the outside world-there, in Europe and Asia, by imperialist conquest, by making America the master of the world, he hopes to start industry going again. And the wheels of industry are to turn, first, to create the war machine. That's Roosevelt's program now, and if ten million must starve for it, he cares not a tear for their suffering. We can't imagine anybody not understanding that when Roosevelt got together with "Tory Woodrum" on the Roosevelt-Woodrum Starvation Law, he knew just what he was doing. He's as sane and shrewd as he ever was, no doubt about that. We can't imagine anybody who would pretend different-anybody, that is, except the Stalinists. For lo and behold, after the most abysmal silence concerning Roosevelt's responsibility for setting the figures for W.P.A., the Daily Worker is finally constrained to attempt to explain it away in a "casual" sentence in a long editorial. We rescue this sentence from its obscurity, to preserve it for posterity. Here it is: "Unfortunately, President Roosevelt, basing himself on inaccurate estimates, did not ask for sufficient funds for W.P.A. for the coming years." (Daily Worker, July 19.)

ing that the Trotskyist analysis of Roosevelt's relief policy is unthinkable because Roosevelt must remain, by definition, the leader of the Democratic Front. Therefore the Daily Worker offers an alternative to the Trotskyist analysis. And its alternative explanation comes down to this:

The President, his research staffs, the statistical bureaus of the Departments of Labor, Commerce, Agriculture, etc., etc., are a pack of idiots who can't add figures or count noses. The President wanted to give jobs to all the unemployed but couldn't find out how many of them there were.

You have our explanation, and you have that of the Stalinists. They are the only two possible ways to explain Roosevelt's relief policy. Take your choice.

P.S. In carefully laying out his program, Roosevelt had to take many factors into account. Especially he had to be as sure as possible that he could put this program over without being successfully resisted by the labor movement. On this score, he was reassured by the support he could depend on from the bureaucrats in the labor movement like Bill Green and John L. Lewis. But above all, he was certain in advance that his relief-slashing, strikebreaking, unionbusting program would be dressed up as progressive by the Stalinists.

To sum up: Roosevelt could decree starvation for ten million unemployed because in advance he could be sure that the Stalinists would invent any number of alibis, even if in their desperation they have to concoct such preposterous alibis as the one we have just analyzed.

"The grandchildren of the pioneers-young people of the present oncoming generation-can't go out and find new opportunities on unoccupied land," says Aubrey Williams, National Youth Administrator. "They have to stay at home and take . . . Which causes the heart of that great "humanitarian" in the White House, F.D.R., to bleed at their plight. So he means to change this state of affairs by sending them abroad where they can "give" it to some poor inoffensive foreign youth.

# **Johnson Knows**

"Like it or not, if war actually comes to us, freedom of speech will dry up overnight. Such is the nature of modern war that only a dictatorship in the full Nazi sense can successfully conduct it. Knowing something of these matters from first-hand experience, this writer would be among the first to advocate that."-Hugh S. Johnson, in the New York World Telegram, July 16, 1939.

Johnson certainly ought to know. He used

Two objections have been received to the comments made in this column (June 13) on the Lovestoneite "socialist unity" campaign

One comes from an S. P. member in New York, N. Y., who declares that he is for unity, even though he does not trust the leaders of any of the groups, including his own party. "But the sort of unity I visualize is not the 'unity' the S. P. had with the 'Trotskyites.' I would be opposed to such unity today as I was opposed to it when you entered our party. Unity can be achieved on a programmatic basis only if there are organizational safeguards against factionalism and personalism. and an intelligent fostering of activity and not factional perspectives. . . .'

Another objector is a Brooklyn member of the Lovestone group, E. S., who claims to have been the first to raise the question of unity in his own organization and in an article in its pre-convention discussion. It was not, he states, instigated by Lovestone; indeed, "Lovestone ... rejects the idea that the S. W. P. can be absorbed into a healthy revolutionary movement." The "unity" letters in the Workers Age are not a Machiavellian plot of Lovestone but reflect a widespread sentiment, a longing among radical workers.

'Although personally subscribing to everything Lovestone is purported to have said in France about Trotskyism, I am in favor of unity with the Trotskyites. I believe that the Trotskyite movement is inverted Stalinism; that Trotsky is an authoritarian Pope, leading his worshippers with the weapon of infallibility on one hand, and excommunication on the other; that he has his mind in the days of 1917-1923, and not in the events of today; that he would still return to the Comintern of its first Four Congresses, which contained the roots and manifestations of every evil which has since destroyed the world communist movement. But when I come out for unity with the Trotskyites. I mean that there is room for people even with such ideas in a united party .

"You may believe that this unity plea is unfeasible; you may oppose it. But can't we discuss it on the basis of its own merits? Must the net argument against it be that it is 'inspired,' 'a trick,' insincere and that Engels wouldn't have been for it, so why should we?"

E. S., furthermore, sees a contradiction in our remarks a few weeks ago when we pointed out that we had consistently stood for unity then, "strangely enough, you dig up from Engels a quotation warning against unity howlers!"

We readily grant the good will and the good intentions of the two comrades who wrote in. We are ready to grant, further, that there is a sound sentiment among many militants who, realizing the weakness of the movement and the enormous tasks it must still fulfill, want to see a drawing together of all revolutionary socialists that can be united.

But we cannot agree with the conclusions of the correspondents nor do we find any reason for withdrawing the comments on the subject made on June 13.

#### A Few General Rules

The "Trotskyites" of the Communist League of America, quite unconcerned with the petty aspects of organizational prestige, did not hesitate for a minute in 1934 when the question arose of uniting into a larger organization with the American Workers Party (Muste group). Regardless of preding criticisms and conflicts, we took the initia tive in proposing a fusion of the two groups on an equal basis-but above all, on the basis of a revolutionary Marxian program. Our estimate of the A. W. P., briefly, was that it was a centrist group (the term is not an epithet with us, but a political characterization), but one that was moving to the left. Our estimate of that unity with the A. W. P. was possible on the basis of a principled program that would in no wise conflict with our own point of view. The Declaration of Principles finally adopted jointly by the two groups was eminently satisfactory and made possible a fruitful fusion into the Workers Party of the United States. Not only were the Trotskyites not obliged to yield a single inch of their principled position. but they succeeded in accelerating the leftward evolution of many A. W. P. militants (as well ay in learning a good deal from them, in turn). What possible analogy is there between that unity and that which is proposed by our two correspondents, among others? Each in his own way proposes, in effect, that the "Trotskyites" be included in the "unity" as second-class citizens, scarcely tolerated pariahs, people who must be circumscribed by all kinds of "safeguards." A. Y. is not for "admitting" us into the unity in the way we were admitted into the S. P. thee years ago. E. S., after an eloquent characterization of us, believes that "there is room for people even with such ideas in a united party"-but in a "united party" whose program is . . . anti-Trotskyism. A rather odd conception of unity!

What is the Daily Worker saying? It is say-

Now is the time for every member of the Socialist Workers Party and the Young People's Socialist League, and every sympathizer of our movement, to talk to the members and sympathizers of the Stalinist organizations.

The Stalinist leaders and pie-card artists continue to draw their pay as usual, but their victims and dupes, the Communist Party members on the W.P.A. and relief and the many who are unemployed and can't even get relief-these pitiful workers are suffering all the torments of the rest of the unemployed. The rank and file of the Stalinist organizations have been led handcuffed to the Roosevelt relief slaughter by the corrupt bureaucrats to whom they looked for leadership to a better life.

The gulf between the Stalinist leadership and the Stalinist followers is as deep as the gulf between exploiters and exploited. Just as many of the most exploited workers over long periods of time fail to understand who their exploiters are, the unfortunate workers taken in by the Stalinist highbinders have permitted themselves to be herded like sheep to the slaughter-until

Now, however, the gulf separating them from their corrupt leaders is becoming apparent to many of them. In the W.P.A. strikes in a number of instances, Communist Party members, ordered by the bureaucrats to prepare a back-towork movement, revolted and kept the picket lines going. Thousands who thought that the Leader of the Democratic Front in the White House was going to take care of them, are now awakening to Roosevelt's real role.

If we do not make immediate contact with these workers, they will fall by the wayside; as disillusionment with Roosevelt and the Communist Party sets in, they will simply drop into passivity-unless we have meanwhile established comradely relations with them and bring them over to the revolutionary movement. They joined the Communist Party because they wanted a new social order-they will join us and fight in our ranks for the new social order, if we reach out a hand to them before they drop away from the organized movement.

In these significant weeks, every comrade should make it his business to contact these Stalinist workers.

ers in it." #### A Different Situation

-But wasn't the S. P. "anti-Trotskyist" when you joined it three years ago?

The situation three years ago was entirely different from today. The S. P. was, or seemed to be, on the road to a mass party. It was attracting to itself many young revolutionists and militants hopeful of progress now that the S. P. had rid itself of "Old Guard" domination. The party was frankly in a state of flux. Its program was not fixed. It allowed wide latitude for discussion that would help shape its further evolution. Above all. it was moving to the left; it invited left-wing militants to join it; it did not make a profession of anti-Trotskyism.

When we joined the S. P., we did not forswear our principles; we were not asked to forswear them. On the contrary, we openly proclaimed them and also our intention to persuade all other members of the S. P. to adopt them as their own. The "unity" was an "open covenant, openly arrived at"-even if reluctantly on the part of the right wingers in the S. P.

Now the S. P. is a cracked shell. It is bureaucratized. It is moving not to the left but to the right (as is the Lovestone sect). It provides a "loyalty oath" for all collaborators. You can't even be a member of its private unemployed organization if you believe in the dictatorship of the proletariat!

Unity between us and the S. P.-Lovestone combination is simply utopian, fantastic. Its advocates continue to belong to Engels' category of "unityhowlers.'

After the funeral services in the C. L. U. hall, the procession North to the sewing project. **GUILTY OF BRIBERY?** Here the hundreds unable to
