(Special to the Socialist Appeal) MINNEAPOLIS - The Central Labor Union WPA Defense Committee won its first victory in the fight against the government's frameup of 103 WPA strikers, when Federal Judge Gunnar Nordbye last Tuesday filed an order providing about 75 per cent reduction in bail. ## Progressive Labor Raps Roosevelt War-Making Plans

The Northwest Organizer, official weekly organ of the Minneapolis Teamsters Joint Council, on September 7 issued a scathing editorial against Roosevelt's war plans. Subscribed to by the entire membership of the ten teamsters locals of Minneapolis and by twenty other unions, the Northwest Organizer speaks for a powerful, militant section of the American labor movement. Its editorial is therefore an authoritative voice against the war plans and deserves to be reprinted

That the boss papers would even dare begin to propagandize for the M-Day dictatorship is a sharp DANGER SIGNAL to the American people! The war-makers are preparing to drag us into the Second World War which began last Friday

Leading the criminal war pack is the President himself, Franklin D. Roosevelt. It was Roosevelt and Farley who worked behind the scenes to prevent Congress from passing the war referendum proposal which would let the people vote on whether they wanted to fight another war for boss profits. It is Roosevelt's man, Louis Johnson, who has cooked up the M-Day dictatorship plot for the United States. And Roosevelt has just moved this man, a former national head of the American Legion, into the post of Secretary of War. It was Roosevelt who proposed, and a united Congress who adopted, the two-billion-dollar armament program in Washington this

With the publication of the M-Day Dictatorship plan, this reactionary plot is now out in the open. In succeeding issues of the Northwest Organizer we shall expose this plan which would crush all organized labor, outlaw strikes, blot out all labor papers, push labor down into the mud as far as any

Fascist Threat Is Here at Home

It isn't Germany that constitutes the threat to what demoatic rights the American people still retain—it is big business and the M-Day backers right in this country of ours.

The second World War for Democracy is a fraud. The first victim of this war is democracy itself. There is no democracy in the England of Prime Minister Chamberlain or the France of Premier Daladier today. Both Chamberlain and Daladier-that is to say, Big Business-rule by decree laws, like the dictators they have become. If M-Day were to become a reality in the United States, the people of this country would be subjected to as brutal a dictatorship as was ever seen on the face of this globe.

The workers of this country don't want war and they don't want any part of the M-Day dictatorship.

Workers Have No Foreign Investments to Defend

The workers have no interests abroad to defend. No member of the Minneapolis Milk Drivers Union-or the General Drivers Union, or the City and Sanitary Drivers, or the Federal Workers Section, or the Electrical Workers Union or any other union-has any "interests" abroad to defend.

The Standard Oil company, General Motors, General Electric, Ford, J. P. Morgan have interests abroad to defend. We haven't. If the big boys want to go abroad to defend their investments, let them go.

J. P. Morgan has a gun. He has just returned from a sojourn in Scotland where he was shooting grouse. If he wants to defend his investments, let him take his gun and fight for them. But don't let him try to force us to fight for him. And don't let him try to lie about any fake "war for democracy." We can all see how much democracy came out of the first

Down with boss war and all the boss war-makers! Down with the M-Day Plan for a Military Dictatorship in

Take the war-making powers away from Congress. Let the people vote on war through a popular referendum!

All war funds to the unemployed!

With the full cooperation of the kept press and the Republicans, Roosevelt and his subordinates are unlimbering every weapon at their disposal to assure a bound and gagged Congress when it meets in special session.

# Bucking the War Censors

Canada has joined the other British Dominions in declaring war on Germany. Apparently in Ottawa, London, and Washington, for a few days there was some toying with the idea that Canada should abstain from any actual war declaration in order to provide a channel for arms from the United States to Britain. But Roosevelt must have assured his friends in London that he would have the arms embargo off the American law books long before Britain actually needed American-made planes and guns. The negative effect of Canadian abstention would be far greater, strike prisoners pleaded not France. it was decided, than any temporary check in the flow of war supplies. So Canada pitched in for King and the Empire.

It is significant that in Paris the act was hailed as "the beginning of the entry of the Americas into the struggle." One Paris editorial minced: "Is it forbidden to think that as in 1914 this is only the opening of the chapter?"

In Washington and in other capitals newsmen and diplomats buzz with speculation over the possible emergence of a Nazi-Soviet-Japanese coalition in a later phase of the war. This calculation, based on Soviet-Japanese negotiations that are undoubtedly going on behind the scenes, will be one of the chief instruments used to whip up war fears in this country and to prepare it for entry into the conflict.

Every German attack on Anglo-French shipping is an atrocity, of course, even when German U-boat commanders send up rockets to attract rescuing vessels. But when British ships sink German merchantmen-and in American waters to boot!-it is by no means an occasion for cartoonists to depict our heroic British friends and allies-to-be as gory beasts of prey. Nevertheless even Hanson Baldwin, military expert of the New York Times, is constrained to state, in a careful and moderate tone, to be sure, that the British practice of sending German vessels to the bottom is "contrary to the usual practices of international law" and "something of a surprise." The British, you see, should really take advantage of all their "legal" rights in this jungle, and take the boats as prizes. Sinking them is a dreadful waste.

"LABOR WITH A WHITE SKIN CANNOT EMANCIPATE ITSELF WHERE LABOR WITH A BLACK SKIN IS BRANDED"-KARL MARX.

QUESTION NEGRO

By J. R. JOHNSON,

The Negro and the War

All of us know how Negroes suffer in America. But you have to go to Africa to see how brutally the "democracies" treat Negroes. In South Africa, a Negro cannot even lay a stamp in the same place where a white man buys one. There is a special window for him even in the post office. He lives in a part of the town that is marked off for him, and he cannot leave there after nine o'clock without a pass signed by a white man. Any white man, any dirty drunkard of an Englishman or a Boer, can sign a pass for a sober, self-respecting, hard-working Negro. But any Negro who is caught out of the Negro district after nine o'clock without his passes will be locked up by the first policeman who stops him. There are not ten colored doctors in the Union of South Africa where over seven million Negroes live, and the imperialists have been there for 400 years. That is the culture and civilization they give to the Africans in South Africa.

In Kenya more than five people cannot meet without police permission. One day six of them went home after church for a cup of tea. In comes a policeman. "One, two, three, four, five, six. This is sedition. You are under arrest." They were taken to jail and the next day fined. Every working African in Kenya is fingerprinted and must carry the print around with him wherever he goes. Caught without it, he is sent to jail. Wages in Rhodesia and Kenya are sometimes four, sometimes ten cents a day. A Negro is no more than a dog to these people. And this is under the rule of the great "democratic countries," Britain, France and Belgium. James Ford is a dirty traitor to tell Negroes that they must go to war for the "democracies" for the benefit of civilization. Aren't Negroes part of civilization?

How did the "democratic" imperialist nations get hold of Africa? They got it as Hitler got Austria and Czechoslovakia. Hitler lied, made promises and broke them, bribed and sent armies to massacre all who resisted. In exactly the same way, these great "democracies" robbed the Africans of country after country and hold them in chains. And now Roosevelt, Browder, and Ford tell Negroes that they must all get together with the great "democracies" and shed their blood. Shed it for what? To win back their country? To live as free men? Not at all. But to go and help Britain and France fight against Hitler and Mussolini about Danzig and the Polish corridor, and who should dominate the Chinese and Latin-American markets, and who should dominate Africa.

#### Remember What they Did in 1914

These imperialist bandits encouraged workers to fight in the last war with the same talk about democracy, freedom and civilization. But after defeating Germany, Britain, France and Belgium simply took over the German colonies and continued to treat the Negroes as before. Now they are fighting another war. If the fascists win they will take the colonies back. If the "democracies" win they will keep them. But whether "democracies" win, or fascists win, the Africans remain slaves in their own country.

Now Republicans like Dewey and Democrats like Roosevelt, men like John L. Lewis and William Green, all the war-mongers for "democracy," have never told Negroes anything about the situation of Negroes in Africa. Lewis encouraged Negroes to join the CIO and Negroes were right to join. But when Lewis tells Negroes to fight for democracy, as he most certainly will, they simply have to ask him the same questions that they will ask Ford and Roosevelt, and Lewis will be able to make no better reply.

But James Ford and Browder and the Communist Party are different. For many years they have posed as the special friends of the Negro people, ready to lead them out of their bondage into the promised land of freedom. They know, and used to expose the situation of the Negro not only in America but in Africa and the West Indies. Listen, for instance, to James Ford, the Negro Stalinist, in an article, "The Negro and the Struggle Against Imperial-

"The native population has (in South Africa) no electoral rights (with the exception of the Cape Province), the power of the state has been monopolized by the white bourgeoisie which has at its disposal the white armed forces. The white bourgeoisie, chiefly the Boers, defeated by the arms of British imperialism, at the close of the last century, had for a long time carried on a dispute with British capital. But as much as the process of capitalist development goes on in the country, the interests of the South African bourgeoisie are becoming more and more blended with the interests of British financial and industrial capital, and the white South African bourgeoisie is becoming more and more inclined to compromise with British imperialism, forming together with the latter a united front of whites for the exploitation of the native population."

#### Situation Has Changed for the Worse

That is what Ford wrote in The Communist (January 1930, p. 27). Has the situation changed? Yes it has. The votes that a few Negroes in the Cape had (referred to by Ford) have been taken away from them. So they are worse off than they were before.

We could print scores of such passages from the writings of the Stalinists. Only three years ago, Ben Davis Jr. had the following to say about Negroes in America. It is a long passage, but every line is worth recalling today. Says Davis, "One has merely to look about him for the rising atrocities against the Negro. The news broke in July that Silas Coleman, a Negro worker, was killed (for the hell of it' to 'thrill' members of the Black Legion, a super Klu Klux Klan connected with the Michigan Wolverine republicans. September saw a recrudescence of the Klu Klux Klan in Peekskill, New York, with the promises to "ride again" against Negroes, Catholics and Jews. In Allentown, Pa., where James W. Ford was scheduled to make a campaign speech last August, the Klu Klux Klan issued leaflets stating that the town would 'ooze with nigger blood' if Ford spoke.' "

This Stalinist Davis, knew all about the situation in Africa. He goes on to write: "A sinister law was recently passed by the officials of the City of Miami, Florida. An ordinance was enacted providing that the Negro residents of the city must have passes to enter the white section of the city after dark. This is identical with the South African 'pass' system where the natives must secure the written consent of the British imperialist agents in South Africa to walk about in their own country."

#### Discrimination in Harlem

And he knew about the situation in Harlem. "These reactionary practices against the Negro have been accompanied with the most relentless attacks against the already low standard of living of the Negro masses. In Harlem, the largest Negro urban center in the world, job discrimination is rife and unemployment has been estimated by the New York World Telegram, capitalist daily newspaper, as upwards of eighty percent. Similar situations, more or less acute, throughout the country, reaffirm the axiom that reactionary open-shoppers place their heaviest burdens upon the Negro wage earners."

And Davis knew too what kind of life the great democracy of America offers the Negroes in the South.

"Pellegra is eating away the lives of the miserably paid and underfed Negro and white sharecropper in the South, particularly in the Black Belt. All of this is carried on in the midst of the bitterest campaign of "rape frame-ups" and lynch terror backed by the Liberty League and the most reactionary sections of the Democratic Party in the

And yet Ford, Davis, Patterson and other Negro Stalinists, now tell Negroes in Africa and America that they must go and fight for this "democracy." The Communist Party says that all workers (including Negroes) must support Roosevelt and Roosevelt is preparing to drag Amer-

### The Special Session

President Roosevelt has announced that he will call a special session of Congress, probably for October 2.

Why has he waited so long to take the step which he promised months ago to take as soon as war in Europe "is certain"?

The reasons are crystal-clear.

Roosevelt knows that the American people are emphatically opposed to this country's involvement in the war, and that if Congress had been called as originally scheduled, this sentiment would have found expression-even if in inadequate and distorted form.

Therefore his aim is first to whip up sentiment and forces for his pro-war plans, and then to have Congress act as a rubber-stamp.

He knows that the overwhelming majority of the masses are in favor of a peoples' referendum before the United States can engage in any war.

Therefore he seeks to defeat that popular demand by shouting for "national unity" in support of his war program-"this is no time for supposed to have been ended. Now we discover dissension." He is moving heaven and earth to that under Murphy the FBI has again become a limit debate at the special session by prior agree- political police—an anti-labor body.

He knows that, if he succeeds in getting this country into the war, democratic rights and the inadequate social legislation of the last few years -the National Labor Relations Act, the Hours and Wages Act, etc.—will be destroyed by the dictatorial Industrial Mobilization Plans.

Therefore he unleashes a campaign against "sabotage, espionage, and subversive activities" to pave the way for the coming reactionary measures against labor.

He knows that the masses are looking to the special session for larger appropriations for relief, for re-establishment of the union wage on WPA, for actions against the Wall Street profiteers and speculators.

Therefore he seeks to confine the business of the special session exclusively to two pro-war steps: increased war appropriations and to lift the embargo on arms, implements of war and airplanes for the benefit of imperialist England and France.

Roosevelt's insidious scheme to drag the United States into the war is enthusiastically supported by the press-from the Hearst papers to the Daily Worker-the radio, and the pulpit of all denominations.

Like Woodrow Wilson in 1916, Roosevelt cloaks his pro-war moves by public avowals for "peace" and "neutrality"-while secretly taking actions to involve the country in the war at the moment when it would best serve the interests of

An answer is provided by what has been happening in Minneapolis. FBI agents by the score were sent there by Attorney General Murphy during the recent WPA strike. Disguised as pickets, they mingled with the strikers—in other words, they played the role of political-police, agents-provocateur-and, acting on Roosevelt's "You can't strike against the government," prepared cases against the strikers. These FBI agents were the chief witnesses before a Federal grand jury, convened on Murphy's orders, which indicted 103 strikers under a Relief Law provision prohibiting "interference" with W. P. A.

Older workers remember the notorious strikebreaking role of the FBI during and after the last war. Under Attorney General Stone that was

If these facts were generally known, the entire labor movement would be alarmed at Roosevelt's expansion of the FBI.

Roosevelt is back on top of the heap. When he realized that his internal policy was hopeless, that it was collapsing miserably, he gambled his entire stake on the war. And he won.

When he brings together his special session of Congress, he will resume the command that he lost in July. He will call the tune, and a big majority will swing into the dance. Full speed ahead toward

But let us hope that no one will be so simple as to imagine that this will mean a revival of the New Deal. It will not be the dead Roosevelt of the dead New Deal who takes the helm, but the Roosevelt of the War Deal. And the War Deal will hand out short shrift to those who try to remind it of the old promises of "reform" and "the more abundant

The aim of the War Deal, on a world scale, is to bring the United States into the war in such a way that American imperialism will dictate the war settlement. Internally, the aim of the War Deal is, in the shortest possible time, to fasten on the people of the United States a totalitarian military dictatorship-a dictatorship which will never be lifted so long as American imperialism sur-

That will be the reward to the American people for dying in the "crusade against Hitler" abroad: totalitarian dictatorship at home.

#### Roosevelt on Easy Street

It is certain that Roosevelt plans to send this country into the war well before the party conventions next Spring. If he succeeds, he takes it for granted that his nomination for a third term (and his election) are in the bag. Who will dare oppose him? He will be able to take chief personal credit for the war, will he not? And he has good grounds for his anticipations.

Roosevelt is the leading, and most skillful warmonger in the United States. There is, in fact, substantial reason to believe that Roosevelt's march toward the war is considerably faster than that desired by the Sixty Families themselves, and by the economic needs of American imperialism. The Sixty Families would like a maximum interval for war-time super-profits under conditions of formal neutrality, with direct military intervention delayed until the decisive last stages of the war. Then, with all the European powers exhausted, they could make sure that "victory" would guarantee not merely the crushing of Germany-which is only one part of the purpose of the Sixty Families in the war-but firm dominance over their "allies" as well. American imperialism does not want any victors in this war except itself.

But all of Roosevelt's actions since his Chicago address of October, 1937, prove that he is impatient for the role of war-lord, that he wants to become "world-leader" from the outset-and, in the process, save his own political carcass from being

It is reported on good authority that one big factor in Great Britain's decision to precipitate war this autumn was the fact that Roosevelt was entering the last year of his second term of office, and, without a war, would have had little chance for a third term. Though Great Britain would in any case have counted on U.S. aid. it would not have been so sure of enormous and rapid aid from an-

Everyone is so convinced of Roosevelt's intentions that his declaration of the embargo required by the Neutrality Act had not the slightest dampening effect on the rise of the "war baby" stocks. or the stepped up speed of production of military planes for export. #### The Forgotten Man again Forgotten

Meanwhile, WPA dismissals are still continuing; the rolls are down below 2,000,000 now. It is no doubt unpatriotic to mention such details when everyone should be practising up for the trenches. Still worse, I imagine, to recall that, according to the record, it is not Hitler who has thrown 1,500,-000 WPA workers into the streets in less than a

How convenient for Roosevelt, this war! Here is your blanket cure-all; no more talk is in order now about unemployment and starvation and misery and wretched houses and mounting debts and taxes. And here is your ticket for an express ride to a third term.

It is unutterably tragic that even a single worker believes he can defeat Hitlerism by supporting Roosevelt's war plans and his war to come. By such support we only strengthen Hitler at home, since he can then prove to the German workers that they are deserted by their brothers in other nations who fight to defend the colonies and profits of "their own" imperialisms. And in this country, by such support we give a free hand to reaction, we necessarily abandon all struggle for jobs and decent living conditions, and we accept in advance the totalitarian dictatorship which Roosevelt's subordinates and his Morgan-Rockefeller-Dupont War Resources Board have prepared to the last item. By such support we make certain the victory, not of Hitler perhaps, but of Hitlerism, throughout the
