BRITISH BID TO GERMANY AIMED AGAINST USSR

The Kremlin's Aim In the Finnish Crisis NLRB ELECTION

Until a few days ago it appeared that the original demands of the Soviet government upon Finland would be peaceably compromised. Suddenly, however, all indications of compromise seem to have disappeared. Why? What has happened? You cannot tell from the preposterous and wild vituperation in the Soviet press or its repetition in the Stalinist press. Nor can you tell from the anti-Soviet propaganda which dominates the "democratic" press. As in all other questions connected with the Second World War, we in the "third camp"—the licity the CIO packinghouse camp of revolutionary struggle against the war-must make workers union won an election our analysis independently of both the warring camps.

The general international situation is characterized by con- plants, by about two to one. tinuation of the attempts of Britain to reach an agreement with German imperialism, minus Hitler. Such a peace would Dies Committee reopened its be made at the expense of the Soviet Union. "Every big war, days prior to these elections. And irrespective of its initial motives, must pose squarely the by a mere coincidence it chanced question of military intervention against the USSR in order as the first victim to be investito transfuse fresh blood into the sclerotic veins of capitalism." These words, from our international theses on war (1934) are American" tendencies. Naturally now receiving fresh confirmation. Chamberlain in the House the daily papers made the most of Commons on Tuesday made a new bid to Germany—the of this, never forgetting to mention the scheduled elections jointvery same day that the Soviet government denounced its non- ly with the hearings. aggression pact with Finland. The Soviet bureaucracy is aware of the mortal danger which the prospect of a British-his assistant director, Johnson, German peace would signify for the Soviet Union. It en- were cited to appear before the deavors to ward off that danger. But its endeavor is condi- Dies Committee. Both denied tioned by the nature, history and ingrained methods of the Party. Yet the predominant Stal-Soviet bureaucracy.

Only Real Defense of the USSR

The only real way to defend the Soviet Union against the encircling capitalist world is to put an end to that capitalist practically all of the higher offiencirclement. Only successful proletarian revolutions in the cials would be a sufficient indicaadvanced countries can save the Soviet Union; otherwise the tion. capitalist world is certain to put an end to the Soviet Union. former president of the Chicago But this method of defending the first workers' state is one which the Kremlin will not and cannot undertake. It has no faith in either the Soviet masses or the international working ed joining the C.P., and that ficlass. Its own rule at home is based on a totalitarian political nally, when he persisted in his system, which can last only so long as the Soviet masses remain passive; revolutions abroad would break that passivity and put an end to the Kremlin oligarchy. It fears socialist his arbitrary manner of picking revolutions as much as do the imperialist rulers.

Having no faith in the international working class, the ing for the favor of the packing Soviet bureaucracy has placed its fate on pacts with one im- house workers. So as a matter of perialist power or another. For five years it deluded the form he subsequently invited a workers with slogans for "defense of the democracies." Now gamated Meat Cutters and that Hitler is the ally, the Stalinist press whines that the Butcher Workmen (the AFL (Continued on Page 4)

Corporation Organizes New Vigilante Groups in Detroit

Special to the Socialist Appeal) DETROIT, Nov. 27 - The Chrysler Corporation is now tak- a new and very definite bid to ing the first active steps in launching a back-to-work movement. This morning 200 Negro strikebreakers were escorted under heavy police guard through a picket line of more than 5,000 workers into the Dodge plant. The scabs were jeered by the pickets and a clash was averted only because of shouted orders by Richard Frankensteen, U. A. W. mons on Tuesday, "in what Executive Board member, and Pat Quinn, President of the Dodge U.A.W. local.

It was clear to observers here that this strikebreaking move can have no other significance than as a provocation by the corporation. The 200 Negroes are almost exclusively foundry workers and the corporation cannot Stalin seemed to be readying his hope to operate its Dodge plant, with a normal capacity of 25,000 workers, with twenty times the number that was escorted for it would put Soviet Russia through the picket line today.

Attempt to Foment Race-Riot Union leaders accurately pegged the aims of the corporation when they called it an attempt to man generals and to any of the foment a "race riot" in Detroit. The clash that company officials It is still not too late to stop the hope to provoke between Negro. and white workers is intended to reate a battle between the workers themselves on a racial issue and thereby facilitate widespread strikebreaking and ultimate state fer is strangulation of Germany ntervention.

The corporation is persisting in and exports. its denial that it has no intention of organizing a back-to-work movement. But it is obvious that running scabs through the picket are meanwhile working might and line has no other purpose than to main toward the same end—the break the morale of the union transformation of the war into a nen who have now been starved war against the Soviet Union.

Destiny of the Negro

(Outline of the course at the Marxist School)

The subject for this week's discussion is "Emancipation from Slavery and the Destruction of Feudalism." The New International for December, devoted entirely to the Negro question, includes an article, "Revolution and the Negro," by J. R. Johnson, which describes in some detail the revolutionary contributions of the Negro to the destruction of feudalism in England, France, and America. All who are interested in this subject should secure a copy of the December number and study it closely. Here we shall make some political analysis of the role of the Negro in this phase of the development of Western civilization.

First of all, what is feudalism? That is not easy to answer in a sentence. It is a form of society based on landed property and simple methods of cultivation. You have a landowning class which rules; at the other end of the social scale you have the serfs, who get a part of their produce to feed themselves and contribute their surplus to the landowning aristocracy. Side by side with the landown ing aristocracy is the clergy. The main characteristic of social life in feudal society is the fact that the aristocracy and clergy have great privileges, and the serfs and others have very few or none. This is not a matter of custom, but a question of law. (In capitalist war.) society, in theory, all men are equal before the law.)

Feudal economy in Europe did not in any way have contact with Africa. It was essentially a subsistence economy; that is to say, it produced what it needed to feed and clothe itself. About the thirteenth and fourteenth centuries, however, there grew up in Europe a new class, the merchants. These were the first real capitalists.

Europe's First Dealings With Africa

Soon their business began to be of great importance in the state. With increasing wealth, they gradually changed the economies of certain countries from producing chiefly food and the simple things that the community needed, to the manufacture of goods on a large scale. This particular class was concerned as much with production for trade in other parts of the country and abroad as for use at home. It was this drive for trade, for raw materials, for markets, and for profit, that created the necessity of expansion, and in the fifteenth century finally sent expeditions to America and to Africa. Thus it was the development of capitalism in Europe that brought the millions of Africans into contact with Western civilization.

Capitalism demands above all else landless laborers. In Europe the capitalist class created a class of landless laborers by driving them off the land whenever possible, for if the serf or the peasant had land on which to work or earn his keep for himself, naturally he would not hire himself out to any capitalist for long hours and

When the capitalists discovered America they tried to use the Indians as landless laborers. But the Indians died. There was so much land that it was impossible to get landless laborers from among the early colonists. Because of this, the capitalists in Europe and their agents in the colonies brought millions of Negroes as slaves to America and thereby provided the colonies with the necessary labor. By this means capitalism enormously expanded its capacity for making profit.

By means of these vast profits that they made at home and abroad, the capitalists in Britain and France, for example, not only built up tremendous trade and business, but, with the profits accumulated, they began to organize factories, and extended the application of science to industry. The standard of civilization rose, and the power and profits of the capitalists increased also. But the governments of France and Britain still continued to be under the domina tion of the old feudal nobiliy. When came much trouble.

Capitalists Make Their Revolution

Trade and factories were more important than land. Yet the rulers of the country were princes, dukes, lords, bishops, and archbishops. That was all very well when they had the economic power, but now it had passed from them. Not only were they proud and arrogant, but they tried to keep the laws and the government suitable to land ownership when, owing to the shift in the economic basis of the country, the laws and the government should have been organized to help trade and industry. It was no use pointing out to British rule and will lose it only them that they should give way. It took revolutions to do ti.

In Britain there were two revolutions. One took place in the sev- war. France, revolution began in 1789, and by the time it was over the power of the aristocracy and the clergy was wiped away completely. What part did the Negroes play in all this?

The capitalists who first profited by slavery were commercial creasingly hostile to Britain. In same IMPERIALIST BANDITS capitalists and the planters in the colonies. These planters were 1929 the women of Nigeria, thirty whose comon aim is the enslavepartly capitalist in that they traded their produce far and wide, and thousand strong, led a revolt ment of humanity throughout the partly feudal in that they kept their slaves in a state of subjection against taxes which resulted in world. comparable to the old serfdom and built up a type of feudal society, nearly two hundred being either But as capitalism developed, these commercial traders and the plan-killed or wounded. In 1937 there appeal also. You must unite in tation owners collaborated closely with the aristocracy, and many of was a general strike of the Gold the struggle of the colonial peothem became aristocrats themselves. By the time the industrial Coast farmers, which was joined ples against the common enemy. capitalists were busy developing their factories, the aristocrats, the by the truckdrivers and dockers. planters, and the commercial capitalists formed, roughly speaking. The British government sent out white and black the solution is

An End to Slavery

Now one of the things that the industrial capitalists wanted to binations and to protect their do was to finish with slavery. It was too expensive. Slave production prices as the employers had to was backward compared with modern methods and more highly form their combines. developed capitalist production in agriculture. So that you had on one side the industrial capitalists determined to destroy the slave power of the aristocrats, the commercial capitalists and the planters. It was in this political struggle that Negoes got their chance to fight for their freedom. They played a small part in the English in Africa, and, social discriminapolitical struggle, a larger part in the French struggle, and a de- tion, for the historical reasons decisive part in the American struggle. This was not accidental. A few scribed, is not as strong as elsefigures will show us why.

In 1789 British colonial trade was five million pounds out of an years there has developed a West they need is political clarificaexport trade of 27 million. Britain had lost America in 1783 and had African youth movement, sixty tion, organization, and a perspecfew slaves in the West Indies. We can therefore see that slavery was playing a very minor part in British economy. The British Negroes position not only to British impe- the crying necessity of a poweron the whole played little part in the destruction of British feudal-

Negro In The French Revolution

In France in 1789 the export trade was 17 million pounds. The colonial trade was 11 million pounds—two thirds of this. The question of abolition was therefore of tremendous importance. It took a prominent part in the revolution. The Negroes fought magnificently and being thousands of miles away, gained their independence. This is how Haiti came into being.

In America in 1861 this combination of the commercial bour geoisie and the plantation owners was not a minor part of American economy. It was a major part. The combination was not a colony thousands of miles away. It occupied hundreds of thousands of square miles inside the country. To defeat this combination took the greatest Civil War in history, and the Negro's share was far greater than it had been in France.

This is the way we must look at history. People who only see black men in general, being oppressed by white men in general, and are unable to trace the historical dialectic do not understand anything and therefore cannot lead. That is the great value of being a genuine Marxist, an adherent of the Fourth International. You can study history and understand where we are to today and why and where we are going tomorrow.

FIGHT AGAINST THE WAR

■ 1. "We Want to Go Home!" 1917: The Mutinies of the Russian Brigades in France

a by "Spartacus" **a**

HE FIRST FLAMES of mutiny on the Western Front werel

needed guns. Furthermore, the French boats avoided an unprofitable return trip in ballast.

There was no trouble getting volunteers for the trip. Incredible rumors were circulating in the Russian ranks about conditions in the French army. It was said there was no flogging, that rifles were so plentiful that every man got one all to himself, and that even privates wore leather shoes.

The Language of the Whip

When the first of the Russian regiments landed at Marseilles, they were greeted with cheers and flowers-even more enthusiastically, according to eyewitnesss, than the Americans were later on. But the soldiers soon found their existence as wretched under the Third Republic as it had been under the Czar. They were kept together in two brigades-about twenty thousand of them altogether-under Russian officers, and floggings and brutality flourished on the democratic soil of France just as much as on the autocratic soil of Holy Russia. That's the only kind of language the Russian soldier understands," explained their officers. Furthermore, these Russian regiments had terrible losses, being "spent" by the French General Staff in the reckless way they had with colonial troops of "inferior" races. Even Winston Churchill, in his history of the war, admits that the Russian brigades "were used by the French in a ruthless manner".

"Unrest began," writes T. H. Wintringham in Mutiny 'A paper called Nashe Slovo ("Our Word") was printed in Russian in Paris and copies of it reached the brigades; it protested against the abuses of which the men complained. The Russian command decided to employ Tsarism's usual methods: to send into the ranks agents provocateur, who would lead the men into some sort of riot; then severe punishment could be inflicted, an example made. A man called Vining, from the Russian Embassy in Paris, seems to have done his work too well: a Colonel Krause was set on and stoned to death. Eight men were shot for this, Nashe Slovo suppressed An almost unknown journalist called Leon Trotsky, who had helped to run the paper, was expelled from France." Thus for a moment of history, the fates of these twenty thousand Russian soldiers and of the future leader of the Red Army were joined in symbolic union

"We Want to Go Home!"

In March of 1917, the Czarist regime was overthrown cast aside in a few days of almost bloodless struggle by the awakening Russian masses. Despite the strenuous efforts of tional African Bureau to which the French authorities, news of the revolution quickly reached the Russian brigades. At once, delegates were elected, secret "We denounce the whole gang meetings called, and finally open assemblies-Soviets. Out of all the talking and voting, one basic, simple demand emerged: men organize a model democratic community. G.H.Q. finally

"Very soon after the February revolution," writes Trotsley lit by sparks from the Russian revolution. Some twenty in his History of the Russian Revolution, "the first brigade the idea of a united people and tion, and was driven out of the thousand Russian troops fighting in France were the fuel for broke discipline. It did not want to fight for Alsace or for Lorraine; it did not want to die for beautiful France. I These Russian soldiers had been sent to France in the wanted to try living in the New Russia." A simple, reasonab freighters which landed munitions for the Czar's armies at desire, certainly! So little, and yet-from the viewpoint of Archangel, Murmansk, Vladivostok. It was a fine business French G.H.Q.—so much! Colonel Netchvolodov, a battallo transaction. The French had plenty of munitions but needed commander, indicated most dramatically just how the fire cannon fodder; the Czar had plenty of cannon fodder but command felt about this simple little request. When a delegation tion presented it to him, he fainted on the spot. The delegate had to pick up the Colonel out of the mud and carry him doors to be revived.

Casualties: Sixty-six per cent

The men made no immediate attempt at mutiny. They pressed their simple request, but continued to obey orders. In April, General Nivelle, the new French commander-inchief, launched his grand offensive that was to smash the German lines once and for all-and that almost smashed the French military machine once and for all. The Russians were ordered up into the line. They discussed the matter in their 'Soviets" and decided to obey.

One of their brigades, nine thousand strong, was given the task of capturing one of the main buttresses of the German line: Fort Brimont, a fortress with deep concrete redoubts, almost impregnable to infantry attack. Nivelle had planned to outflank it after the break-through and take it from the rear. But the break-through never came, and so the Russians were ordered to take it by frontal attack. They had to go up hill, in full view of the German defenders for two and a half miles, crossing a deep canal and getting through twentysix lines of barbed wire defenses. Day after day they struggled on, dying in whole companies under the German machine guns. When they finally reached the earth-covered slopes of the fort itself, they had lost two thirds of their original strength-six thousand killed and wounded. The exhausted survivors were unable to take the fortress.

Even after the Nivelle offensive, the Russians did no mutiny. But now began those widespread mutinies in t French army which will be described in the next instalment of this series. As we shall see, these French mutinies never became politicalized, thanks largely to the efficient work of the French authorities in isolating the troops from all contact with workers and revolutionaries. The Russian troops were dangerous source of political infection, with their increasingly militant demands, their close ties with the Russian revolution and their "Soviets"-the word sent shivers into the polished boots of the General Staff!

Wintringham quotes the frank words of Paul Painleve French Minister of War at the time: "The example that these Russian soldiers gave in their Soviets, their deliberations their attitude towards their officers, demoralized the French troops alongside them and repercussions of this were felt or the whole front. The only remedy was to transfer them to the interior of the country.'

(NEXT WEEK: French G.H.Q., fearing the spread of the Soviet idea to its own troops, isolates the Russian soldiers in a camp at La Courtine. Left to themselves, without officers the "We want to go back to Russia!" All through the long drawn- suppresses the Soviet when it orders the camp surrounded by out affair, this was the only-demand made: "Send us back artillery and at bayonet-point forces one of the brigades to fire

To the workers of Britain we in the in the workers of Britain we in the wo Against British Imperialist War Rule

News concerning the anti-war | ed out on strike at the beginning | gress Working (executive) Com- | But the initiative is no longe censorship.

In previous issues of the Socialist Appeal we have reported on the rising wave of anti-war sentiment and activity for India's freedom that is now sweeping the country. The negotiations between the conservative Gandhi leaders of the Indian Nationalist Congress and the British authorities broke down completely because of the unwillingness of the British to make even the slightest promise or concession. At that time we predicted that a period of direct mass action on the part of India's workers and peasants would begin. While the Gandhist leaders of

the Nationalist Congress have continued their futile playing around with the British Viceroy, the masses of people have not been inactive.

Workers Take the Lead Of utmost significance is the

emegence of the industrial workers-the Indian proletariat organized in their militant trade What it boils down to is this: the workers state and winning a vnions-as the leaders of the opthe capitalist powers caught in partial respite for themselves by pressed nation. In the city of Cawnpore there is now a general strike of all txetile workers which is threatening to spread to Bombay, Ahmedabad and other textile centers. This localized general strike can easily become a nation-wide strike.

In Calcutta, one of the world where millions of sand bags are now supposed to be produced for British war needs, 31,000 Hindu and Moslem jute workers walk-

pierce through the heavy British more than 100,000 jute workers who toil in the British factories around and in Calcutta.

Massacre Nationalists

In Karachi, a major seaport of the country and a center for nationalist propaganda, the British applied some of their "democratpractices last week. In cold blood, British troops and police shot down and killed 20 Indian nationalists who were conducting an anti-war parade and demonstration. The number of wounded is unknown, but this action of the police who were confronted this week in its struggle against ital was practically at a stand with absolutely unarmed people can only be labelled as another example of typical British criminal massacre. British rule in the colonies is based precisely upon such actions as the Karachi

slaughter. Meanwhile, the British are making every effort to relieve the constantly growing pressure by stirring up Hindu-Moslem communal discord. There are reports of numerous Hindu-Mosiem riots, mostly in the Northern sections of India-that is, where the hatred of British rule is deepest and most militantly organized. It is undeniable that these efforts to pit Hindu against Moslem has had some success. This is primarily due to the actions of the pro-British Moslem Street, which prior to 1914 played exerting itself to take advantage ialists, and the failure of the centers of the jute industry Gandhi leadership to prove in action the possibility and need for Hindu-Moslem unity.

"Reentered as second class matter September 29, 1939, at the post office at New York, N. Y., under the Act of March 1, 1879."

FIGHT WITH THE SOCIALIST WORKERS PARTY FOR:

- 1. A job and a decent living for every worker. Open the idle factories-operate them under
- workers' control. 3. A Twenty-Billion dollar Federal public works
- and housing program.
- Thirty-thirty-\$30-weekly minimum wage-30hour weekly maximum for all workers on all jobs.
- 5. Thirty dollar weekly old-age and disability
- 6. Expropriate the Sixty Families.
- 7. All war funds to the unemployed. 8. A people's referendum on any and all wars.
- 9. No secret diplomacy.
- 10. An independent Labor Party.
- Workers' Defense Guards against vigilante and Fascist attacks.
- 12. Full social, political and economic equality for the Negro people.

The Kremlin's Aim In the Finnish Crisis

(Continued from Page 1)

British are attempting to assassinate Hitler and replace him by a regime which would agree to turn its guns against the Soviet Union. Therefore-this is plainly indicated by the Stalinist press-Hitler should be defended against assassination or overthrow!

At the same time, however, the Kremlin lives in deadly fear of the possibility that, despite all its courting of German imperialism, the latter will make peace with Britain and turn on Russia. It is against that dread day that the Kremlin's moves in the Baltic are calculated. The military and naval outposts secured from the other Baltic and moral abyss from which there is no escape countries, plus similar outposts from Finland, would close the defensive circle of the Baltic or at worst by the bloody ladder of social upagainst Germany.

But since the Kremlin is simultaneously wooing Hitler, it cannot very well explain the real meaning of its Baltic moves. Hence one of the most repulsive aspects of its propaganda-its patent fraudulence; as fraudulent as the declaration that the Stalin-Hitler pact would help Poland and the democracies, which the Stalinists sources Planning Board. were making until the Red Army marched into Basing itself on a study of three representa-Poland. This cynical lying confuses and disoritive income groups during 1935-36, the Board ents the class-conscious workers everywhere; and nothing can so weaken the Soviet Union as the development of an attitude of suspicion and disgust toward it among the workers in the capitalist countries.

When, in the days of Lenin and Trotsky, the Soviet power led its armies up to Warsaw and conquered Georgia, the class-conscious workers understood the necessity of these steps and defended them, for the foreign policy of the workers' state was clearly in the interests of the world revolution, was developed and executed before the eves of the international working class. The contrast between this and the duplicity of the Kremlin's policy is but one index to the vast degeneration which has taken place in the first workers' state since Lenin died.

The methods employed by Stalin in the Baltic are utterly alien to a revolutionary-internationalist policy. Lenin and Trotsky called upon the Polish and Georgian workers to revolt and came to their aid with the Red Army. Stalin calls upon the Finnish people — not the workers to . . . change Premiers! Instead of arousing the masses within the Baltic countries to overthrow their capitalist rulers, and establish Soviet Republics which would guard the Baltic against Germany, Stalin prefers pacts with their bourgeois rulers. The only kind of "revolution" he wants in the Baltic is the kind he "made" in backward Polish Galicia-under the direction of the GPU.

In our criticism of the military interventions of the Soviet bureaucracy, we sharply distinguish ourselves from the social-democratic, anarchist and bourgeois critics of the Kremlin. These anti-revolutionary critics denounce the Soviet for using military force and for violating existing borders. For us, however, the borders of the capitalist world are not at all inviolate, and military force in the hands of a revolutionary government may very well serve the revolution. That the Kremlin's military intervention serves only the interests of the Kremlin and its imperialist ally (Hitler in Poland); that it is carried out without consideration of the will and feelings haunts both warring camps today in Europe and of the workers of the Soviet Union or the occu- paralyzes their military operations casts its shadpied territories or the international proletariat; ow across the war maps in Washington too.

that it compromises the Soviet Union and disorients the world working class-these are our criticisms, which in all fundamentals runs counter to the standpoint of the Kremlin's non-revolutionary critics.

The social-democrats and other lackeys of the "democratic" imperialists call upon the Finnish How the French Workers workers to defend Finland against the Red Army. We, on the contrary, apply to Finland as to every other bourgeois country our fundamental attitude toward imperialist wars. The Finnish government refuses to yield to Soviet demands for military outposts only because Finland is assured of the support of one or more great powers against the Soviet. The New York Times makes that plain enough, in its Nov. 28 editorial calling for a holy war against the Soviet Union. We are against the support of any imperialist power in any war, let alone a war against the Soviet Union which remains, despite the Kremlin gang, upon the economic foundations laid down by the October Revolution.

their own socialist revolution. Nothing else can avail them. They must destroy the Finnish bourgeoisie before they can cope with Stalin's demands upon Finland. If a struggle breaks out between bourgeois Finland and the Soviet Union, it is the duty of the Finnish workers to be Soviet partisans in that struggle.

If the Soviet Union were led by revolutionaries, the Finnish revolution would be made by the Finnish workers with the assurance that they would receive the aid of the Red Army against intervention by the imperialist powers. Instead, however, the brutish and provocative tactics of the Kremlin against Finland drive the Finnish workers into unity with the Finnish bourgeoisie. In this incident as in all others, the tactics of the Kremlin serve to strengthen the imperialist front which will eventually attempt to destroy the Soviet Union.

Here is but the latest proof of our conviction that the defense of the Soviet Union cannot be left in the hands of the Kremlin clique. The armed overthrow by the Soviet workers of the Stalinist bureaucracy - it will not yield its power by any other means-is vitally necessary if the Soviet Union is to be saved and become again what it was under Lenin and Trotsky: drill ground of the world revolution.

Into the Abyss

"In this Thanksgiving season, it is not a pleasant thought to realize that two out of three Americans are sliding down into an economic save by the bitterness of social reform at best, heaval."

These are highly interesting words. They come from Mr. Jay Franklin, pro-Roosevelt Washington correspondent of the New York

Mr. Franklin wrote them while reeling under the impact of the report of the National Re-

discloses startling conditions.

The income groups it studied are: "the lower third," which earns \$780 a year or less; the "middle third," which earns from \$780 a year to \$1450, and the highest group, which earns upwards of \$1450.

The "lower third" spends more than half its income on food alone.

on medical care than either of the two higher groups, showing clearly the close relations between poverty and disease.

Exclusive of its expenditures on food, clothing and shelter, it has only \$31 a year, or sixty cents a week, to spend on other things: medical care, amusement, dentistry, movies, sport, literature, drama, religion. Sixty cents a week!

Unable to make ends meet, this group goes increasingly into debt each year.

Each year it has an average deficit of \$92. (This contrasts with the annual 19 percent savings made by the highest income group, even after its outlays for gifts and taxes have been deducted.) Even the middle group, earning from \$780 a year to \$1450, loses money, winding up a family deficit of \$19 a year.

This is the real situation after seven years of "social reforms" by Roosevelt. The inescapable fact is that the poor are getting poorer and the rich richer. The figures disclose that not one third, but two thirds of the nation is, in Mr. Franklin's words, "sliding down into an ecnomic and moral abyss."

As fully aware as anyone of the bankruptcy of his social program, Roosevelt has thrown it overboard for a more "realistic" one. Unable to patch up the fabric of a rapidly disintegrating capitalism with internal measures, the Roosevelt administration is turning to the only other "solution" which capitalism provides: WAR!

From New Deal to War Deal, that is the road travelled by Roosevelt. But, as Mr. Franklin fearfully suggests, if

not social reform, then "social upheaval." The spectre of the socialist revolution which

In the World of Labor Their

By Paul G. Stevens

Are Mulcted for the War . . .

Last week this column gave some general indications of the fact that the French workers are bearing the brunt of the war economy on their shoulders and that they are in a state of incipient rebellion as a result. This week we are in a position to give our readers more concrete information on this score, as gleaned from illegal organs that have reached us since then.

The 60-hour week has been established as a minimum, although in the more important war industries a work week of as much as 72 hours is in force. Of the minimum 60 hours, 45 hours work is required for the pay of 40 hours established by an old decree. Taking 10 francs as an average hourly rate, a worker receives 400 francs for 45 hours work. The 15 hours supplementary which now make up the 60 hour week are supposed to be paid at the regular rate, that is, 10 francs for The task of the Finnish workers is to make the average worker. Thus, a worker should get 550 francs for his 60 hours of work.

In actuality, however, here is what happens. One decree, established since the beginning of the war, levies a 25 per cent tax on "overtime" or supplementary hours beyond the 45 originally set. Thus, the average worker gets only 1121/2 francs 'overtime" pay instead of 150. Then 4 per cent of the remaining total salary goes to "social insurance," and 2 per cent goes to the government under the Reynaud emergency decree established before the war, leaving him a total of 482 francs out of the 550 francs he is supposed to get for 60 hours of work.

But even these 482 francs was deemed too much to give a worker for the 60 hours he is now required to work. So the war government of Daladier decided to slap another 15 percent war tax on his wage, reducing the average worker's pay to some 409 francs. Thus he is really required to work 60 hours for the same pay as he previously received for 40 hours work, at the same time that the cost of living keeps constantly mounting.

This last tax, however, may prove to be the straw that breaks the camel's back. For, although the 15 per cent has already been officially decreed, resentment is so wide-spread that the government has up to the present refrained from enforcing it.

And How the Prolos Answer in Action

At the Lorraine-Dietrich works in Argenteuil, the whole personnel carried on a strike for several hours, shouting revolutionary slogans and singing the "International." They went back to work only when the management assured them that the 15 per cent tax would not be applied

At the "compteurs de Montrouge" department store, 300 women workers demonstrated for 20 minutes with the same object in view. Their demonstration met with a similar success

In the C.A.P.R.A. factory at Courneuve, the bosses announced the government decree would be effective with the next pay envelope. The night-shift went on strike. As a result the 15 per cent was not deducted from their wages. At the "Petites Voitures" factory in Aubervilliers, the workers quit one hour earlier, carrying out a strike action along identical lines. Same result

From the looks of things, the French prolos are not going to take the war deal there lying

Need of the Hour: A Revolutionary Party

Conditions at the front are not any better for the French bourgeoisie then they are at the rear. Every bit of information coming from France is testimony to the fact that a tremendous ferment mainly from the ranks of the Stalinists in such is making itself felt in the population as a whole.

When you keep in mind the recent revolts in Czechoslovakia and the reported disturbances in the Reich you have here a more than ample explanation as to why "all's quiet on the Western

The situation just isn't set for an enthusiastic war. It is much more ripe for revolutionary action. What is lacking most is the existence of a firmly-knit revolutionary party.

Here too, however, the trend is becoming more favorable. We learn from reliable sources that the groups adhering to the Fourth International in France, which were hitherto divided over tactics with regard to work inside the Workers and Peasants' Socialist Party (P.S.O.P.), have recently

reunited and are carrying on comon activity. The P.S.O.P. itself has undergone a consider able change. At the outbreak of the war, the party seemed to have disappeared. Late in October however, it began to show signs of life again Its paper, Juin 36, has reappeared as a legal or gan. An illegal edition, mimeographed, is also making the rounds of the Parisian working class quarters. The leadership of the party has passed over to elements designated as "left-centrists" The freemasons have been expelled from the organization. It is rumored that included among those expelled, is Marceau Pivert, former leader of the party.

The Stalinists, who regained a measure of the workers' confidence by their new fake "turn", are still paralyzed, and in spite of their tremendous apparatus and the aid of the G.P.U., display hardly more activity than the small revolution ary groups. Of late, there has been a steady trend of more advanced militants from their ranks going over to the P.S.O.P.

A Note on the Work Of Our Belgian Comrades

The circumstances surrounding the government's persecution of our leading Belgian comrades are only now coming to light. It seems that, at the outbreak of war, a certain Vereecken, the leader of an ultra-left group which split from our Revolutionary Socialist Party (PSR) about a year ago, took it upon himself to "prepare" the revolutionary vanguard for illegality. . . . This was done by means of a mimeographed circular containing detailed instructions which was mailed, among others, to a list of our comrades which he had purloined from the PSR when he

Naturally, the government, which was looking for just such a pretext, was greatly relieved of its trouble by this piece of stupidity. The result was that every leading militant in the country was instantly picked up. Confronted with the evidence, some of the comrades arrested found it hard to deny the identity of the perpetrator before thte investigation judges. After being held for weeks, all the militants arrested, including Vereecken, were finally released.

Upon his release, Vereecken attempted to provoke a split in the ranks of the PSR because of the repudiation of his "document" by some of the comrades arrested. This attempt fortunately has failed. At a recent congress held by our Belgian party under the most difficult conditions this matter among others was settled definitively The "illegal circular" of Vereecken was condemned unanimously. The action of those comrades who identified the circular as hailing from Vereecker was censured. The party swung into action after the congress, resuming publication of its weekly organ, the Lutte Ouvriere, and beginning a vigorous anti-war campaign in the mining fields and in the industrial cities. In spite of the initial crisis brought about by the government action which has resulted from the stupidity of the ultra-lefts, the party has remained intact. As a matter of fact, the reports to the congress even showed a substantial gain in membership, coming centers as Brussels and Liege.

Canadian Workers Take Their Sweet It spends more of its income, proportionately, Time in Enlisting

TORONTO-By the end of the second month of war, 60,000 recruits had been enrolled "for war or insurrection." The way from Australia, but the bulk will they got these volunteers illumines the nature of "democracy." Most of these recruits came from the unemployed. When war broke ber that ten men are needed on out, single unemployed were getting no relief at all, and the the ground for every pilot. Reaverage married unemployed were getting, in a large center like member that the physical tests Toronto, the equivalent of 41/2 cents per meal per person, in return for airmen are so searching that for hard manual labor two or three days a week. Canadian army pay the type of slum-proletarian, deswas boosted to \$1.30 per day, plus 85 cents living allowance for perate unemployed, or patriotic

each dependent. Civil servants@ who enlist are given an additional bonus. Several firms are getting cheap advertising by promising to make up the wage-difference for employees who enlist.

Municipalities began laying off relief workers of military age or holding up their pittance to scare them into the army. Firms in Vancouver and elsewhere fired young workers and refused to take them back without a certifiicate of military unfitness. Petty thieves and drunks in Ontario sure of elderly professors and pamagistrate courts were given the triotic girl-friends who want him that money." The government

Anti-Semitic Act

Pressure on Jews and others to enlist takes many forms. In Toronto, home of 50,000 Jews, an soldier, were not arrested; the to's streets is sufficient proof. three others got light sentences.

ods, only 60,000 have been hook-(nearly half the male enrollment forty minutes. is drilling on the University of Toronto campus), but mainly because such enlistment does not commit to war service; meanwhile it prepares the student for an "officer's life" and gives him a temporary answer to the presto think, that the mortality among second lieutenants is higher than among privates.

Another factor which has held armory is reported to have dis- up recruiting is that the natural played the following sign: "Re- cannon-fodder, the unemployed, cruits enrolled today: Christians have been so physically reduced 265, Jews 2." A Jewish youth was by ten years of depression that attacked by soldiers in the main most of them suffer from rotting street and badly beaten. In an- teeth, stomach ulcers, or plain other case six men, including a malnutrition. This difficulty has soldier, beat up a youth in the been partly solved by watering street who had refused to tell down the medical tests. One them why he had not enlisted glance at the undersized "High-Three of the thugs, including the landers" marching around Toron-

In Vancouver the press report That, in spite of all these meth- ed the case of an unemployed

man who had drawn sick relief for five years for infected teeth and other results of undernourishment; he was passed A-1 by the army

In mid - October the pressure for conscription suddenly increased, with the announcement of the British plan to spend seven hundred million dollars yearly in Canada to make it the center ot Empire airplane manufacture and air schooling. Twenty-five thousand pilots are to be trained annually. Some are to be brought need to be found here. Remembank-clerk, will not do. Only a sweeping conscription of youth ed, is proof of the reluctance of will meet these plans, for even the Canadian masses to be butch- the most flag-blinded youth is ered in front of the German not anxious to enter a service Westwall. Officers' training units which can promise an average are booming at the universities life in active fighting of only

The high costs incurred in bribing unemployed into the army is another factor leading to conscription. Relief workers have been doubling their income by enlisting. As General Griesbach pointed out to the Senate, alternative of six months or the to die for them. Student recruits has already responded by barring are not told, and not many stop enlistment by men with more than four dependents. Tomorrow the generals will be demanding that the cheaper bodies of single men be officially seized.

> American Labor Aid 125 West 33 Street New York City Dear Friend:

By James Burnham

Government

The Federal Reserve Board index figure of industrial production is currently reported as 125. In this simple number is concentrated the agony of American capitalism.

This number means that industrial production in this country is now running at the higest rate in history. We have not merely returned to, but surpassed, the Golden Age of 1929! The average production rate for 1929 was only 119.

But where, then, is the rosy hue that colored the land in 1929? Today, with production at its new height, there are still at least 10,000,000 unemployed, and millions upon millions more sub-humanly housed half-starved, ill-clothed. 1929 is back, and more than back, and it has the taste of ashes in the mouth.

What Makes the Difference?

What accounts for this great gulf between 1929 and 1939? There seem to be four chief causes:

Each year there is a net increase of approximately 600,000 men in the labor market. All other things being equal, therefore, production, in order to maintain employment stability, would have to expand sufficiently each year to be able to absorb these 600,000.

Under the pressure of crisis, technological advances and new methods of speed-up have during the past decade enormously increased the man-hour output of labor. In such industries as steel, where the changes are especially striking, this means not only that fewer men are required to keep the plants going but that increases in the rate of production do not require corresponding increases in the number of workers employed. To run at 35% or 40% of capacity, the steel mills require far fewer men than in 1929. To run, as at present, at 95% of capacity (which, by the way, is considerably more than 100% of 1929 capacity), requires a still smaller fraction of workers than at 40%, so that the proportionate dislocation is even greater.

A third factor is the ever-rising debt load, both public and private, which weighs down upon the whole economy, and helps prevent expanding wages and profits from being fruitfully reflected in the consumer market. This effect was exaggerated in this past decade because of the devices which were employed to forestall wide-scale bankruptcies and reorganizations which, in previous crises, though they smashed up individual enterprises, acted as health-giving surgery for the economic structure as a whole.

Finally, the disproportions among the various sectors of the economy have become deepened and more awkward during this decade. The general health of the economy depends not merely on the vigor of this or that sector or even upon the average level of the economy as a whole, but also upon a proper balance between industry and agriculture, capital goods and consumer goods, internal trade and foreign trade, etc. Monopoly control, far from being able to maintain such a balance, introduces its own kind of planning into some sectors of industry only at the cost of a more violent anarchy in the economy taken in its

What of the War Boom?

Only a comparatively small part of the present rise in production is directly traceable to war business. Much of the increase has been due to domestic orders given in anticipation of a coming boom and as a guarantee that future war orders will not interfere with the fulfillment of domestic requirements. Within the past few months the curve of production has risen considerably above the curve of consumption, which, interpreted, means that inventories are piling up.

War orders, not merely from Britain and France, but also from the home government, will undoubtedly increase in the days to come. But it is clear that they will not be sufficient to bring about a general prosperity even of the 1929 variety, and in particular that they will not, by many millions, be able to absorb the unemployed. Indeed, with the increased inventories and the lagging behind of consumer purchasing power, it is not unlikely that after the first of the year, even with increased war orders, production will de-

I am, in fact, convinced that much of the talk we have been hearing about a "war boom" has its source in deliberate propaganda designed to win the masses of the people over to the Roosevelt war measures. I believe, for instance, that many workers were led to an acceptance of the lifting of the arms embargo by at least the half-formed thought that, at any rate, there would be plenty of jobs available.

The business men do not spread these illusions among themselves. In their own committees and publications they are very skeptical about the extent of the war boom, and make clear its probably limited character. They have noticed, among other things, that in England unemployment has increased since the start of the war, in spite of the entry of hundreds of thousands of young men into the army.

There Is No Cure

A general conclusion that forces itself upon us is that capitalist economy is even sicker than we think. The New Deal, as a set of primarily internal measures, was unable to cure U.S. capitalism. But even the drastic, present and projected, "external measures" of the War Deal cannot bring health back.

From a moral point of view, it has been a terrible enough comment on capitalism always that it could keep going only by periodic wars, that war was an integral phase of its life cycle. But capitalism has now reached a point where even war cannot repair the ravaged organism. Peace or war: the choice is now only of alternate roads to death.

This is known, we may assume, to the rulers of the capitalist world, and is not the least of those causes which make this "the strangest of all wars."
