Cannon To Run For Mayor Of New York On Strong Anti-War, Anti-Fascist Program

The New York Local of the Socialist Workers Party this week adopted a powerful anti-war and anti-fascist election campaign program to rally mass support for James P. Cannon, SWP National Secretary, the Trotskyist Anti-War candidate for mayor of New York City.

FOR MAYOR

This program is an uncompromising challenge to Roosevelt and his War Party, including his local henchman, LaGuardia. It is a direct answer to Roosevelt's attempt to silence the voices of the proletarian anti-war fighters in this coun'ry by his frameup indictment against James P. Cannon and 28 other members of the SWP and of Minneapolis Local 544-CIO.

With the aid of this program, the first half of the Cannon-For-Mayor petition campaign is expected to go over-the-top by August 21, when the quota of 7,500 signatures, the minimum required. is scheduled to be fulfilled. Over 6,000 signatures have already been secured. The campaign committee is confident that its total quota of 15,000 signatures will be obtained in record-breaking time. The complete text of the elec-

In this election for Mayor of New York City there is only one genuine antiwar party, and only one candidate who stands for a genuine struggle against war and fascism. That party is the Socialist Workers Party. That candidate is JAMES P. CANNON.

BUFFALO, August 16-The Local 544-CIO truck drivers of Minneapolis have gained a new and powerful ally in their fight against the Roosevelt-Tobin drive to smash their union. The Sixth Annual Convention of the United Automobile Workers (CIO) today unanimously adopted a strongly-worded resolution offering full support to 544 and denouncing the FBI-

Tobin union-wrecking campaign. A resolution originally submitted to the convention Wednesday was sent back to the resolutions committee for rewording to

make it stronger and to include a statement against the government attempt to frameup the 544 leaders on charges brought by the

During the Wednesday discussion on the original resolution, a Detroit delegate, William Mazey, openly charged that the "seditious conspiracy" indictment against the 544 leaders was the payment by Roosevelt of a political debt to Tobin, AFL Teamster's head.

George Addes, UAW international secretary-treasurer, pointed out that Roosevelt is giving FBI aid to Tobin against the CIO and asserted that Tobin has sent a hundred gangsters into Detroit to smash the CIO Dairy Workers Tinion and other CIO locals.

The resolution adopted today is as follows:

"WHEREAS: Minneapolis Local 544, CIO Motor Transport Workers Union, which is the spearhead of the motor transport workers movement of the Northwest, has transferred its affiliation from the AFL Teamsters International into the CIO in order to free themselves from the dictatorial, racketeer, craft union setup of Daniel Tobin, and

Imperialist Plans For World Conquest Mapped In Conference; USSR Menaced

By WILLIAM F. WARDE

Roosevelt and Churchill's conference was the first Supreme War Council of Anglo-American imperialism. Who is deceived by the ridiculous attempt to pass off their meeting as a "Peace Conference"? The presence of the Commanders-in-Chief and military staff heads, Generals and Admirals of both powers, as well as the secrecy enveloping the conference, its deliberations and decisions, unmistakably establish its war-like character.

The declaration of so-called "Peace Terms" emanating from the Two-Power conferees was designed, like the smoke screen around a battlefleet, to hide the plans and maneuvers of their fighting forces from the enemy. Not even friendly observers take these hollow and pretentious phrases seriously. What hypocrisy and impudence for the rulers of the British Empire to proclaim "the right of all peoples to choose the form of government under which they shall live," while refusing 350,000,000 inhabitants of India the least democratic rights! Nor will Roosevelt, who failed to abolish "fear and want" in the U.S. during nine years of peace, eliminate "fear and want" from the world by as many years of war.

The Roosevelt-Churchill declaration lays down the basis for a second edition of the infamous Treaty of Versailles. After the last war the Allied victors "disarmed the aggressors" by stripping defeated Germany and pointing their arms against the Soviet Union, the colonial peoples and their own workers. They "furthered access to raw materials" by parcelling out Germany's colonies amongst themselves. and setting up a League of Nations to police their possessions and safeguard their robbers' spoils. Everyone knows how little peace, prosperity and security this kind of imperialist settlement gave to the world. Roosevelt and Churchill's contemplated repetition of this course contains far more dreadful consequences for humanity.

American imperialism is bent upon restoring the bondage of Versailles. The imperialist postwar policy of revenge and robbery against the German nation which helped produce fascism, now serves to keep that reactionary regime intact. The German masses must see another alternative to Versailles before they will organize their revolt against Hitlerism.

The Main Business of the Conference

The main business of the conference, however, was devoted not to "peace aims," but to an extensive discussion of "war aims." The heads of Anglo-American imperialism mapped out their plans and grand strategy for meeting the military menace of the Nazi war-machine and its allies, Japan, France, Italy, Precisely what policies were decided upon, what farreaching agreements and commitments were concluded, only the warlords present know. The Administration's actions and the unfolding events of the coming months will disclose them to the world.

If the ways and means remain still obscure, the end in view is clear. The Anglo-American imperialists have joined forces to crush their chief capitalist competitors in Europe and Asia, and set forth to employ the armed might, resources and energies of their dominions to conquer the world for their enrichment.

Commentators ironically remarked that Roosevelt had published his peace-terms before the U.S. had officially entered the war. The "democratic" Roosevelt and the "totalitarian" Hitler alike make war without consulting the people. Although Roosevelt's 8point program imitated Wilson's, he began by violating the first of Wilson's 14 pointsagainst secret diplomacy. No "open covenants, openly arrived at" for Roosevelt.

At every stage in his drive toward war, he is obliged to conceal his real aims, to camouflage his belligerent actions as steps toward peace, to lie and to deceive.

Minneapolis AFL Unions Face 'Purge' By Green

Local Central Labor Union Charged With Failure To Assist Tobin's Attempt To Smash Local 544-CIO; Tobin's Gang Tries To Slip Gold-Brick Contract On Truck Drivers

MINNEAPOLIS, August 18-A "purge" of the entire AFL® movement here was indicated on Friday, when AFL President nouncing the contract — but not William Green announced that the AFL Executive Council was printing the contract. Hence Tobin can get the kind of aid he wants only if he can first purge every AFL local here of the officers and militants whose life during the last seven years has been so intimately bound up with Local 544. NO FENCE-SITTERS

Thus the AFL tops themselves make any fence-sitting impossible in this significant battle. Everybody in the trade union movement is being forced to choose between the rank and file of the local teamsters movement-now affiliated to the CIO-and Tobin and his gangsters.

The AFL Executive Council's action is a confession of failure. Tobin has failed in his attempt to drive the transport workers back into the AFL.

But nobody needed this confession to know the fact, after the magnificent membership meeting of Local 544-CIO on August 11, when over 1,000 men turned out, a few hours after their leaders and the Socialist Workers Party members - 29 defendants in all -were arraigned in the U.S. Department of Justice's "seditious conspiracy" case.

This omission was rectified by Local 544-CIO, which this mornworker in this city a special edition of its paper, the Industrial Organizer, with the headline: "HERE IS CASEY'S CONTRACT; WHY HE DIDN'T PRINT IT." The bulletin also carried a pointby-point analysis of the contract, which proved to the hilt that it was a sellout.

The key to the Tobin contract is Article 9, which provides for compulsory arbitration of literally everything. Two men from each side plus an "impartial" fifth would constitute the arbitration board. The joker is that the fifth man would be chosen by each side submitting lists of 25 names "to Priest, Minister, Reverend of Rabbi" who would select a name which might appear on both lists. But if no such name appeared on both lists, or on additional lists, the quesion of choosing the fifth name could be dragged on forever - and would, whenever it suited the bosses.

The Tobin contract also weakens the previously existing seniority setup. In the face of the enorprovides for a raise of only six cents per hour, far below the demands previously drawn up by the membership of Local 544-CIO One could list many other outrageous items in the Tobin contract, but the whole thing is summed up by the fact that no contract is stronger than its arbitration clause. And this arbitration clause gives everything away.

TOBIN'S PROBLEM REMAINS The bosses and Tobin's

agents signed a contract—but now they still have the job of trying to get any workers to accept it.

The first reactions of the workers to the Tobin contract, when the text of it was made available to them by Local 544-CIO, can scarcely give Tobin any grounds for confidence that he can put this

The following statistics from the latest Army and Navy Register give the full picture of discrimination against Negroes by the higher officer staffs that appoint the officers.

UAW Delegates On Picket Duty

Delegates to the Sixth Annual Convention of the United Automobile, Aircraft and Agricultural Implement Workers (CIO), in Buffalo, are shown as they parade before the Curtiss-Wright aircraft plant to launch the national aircraft organizing drive voted by the convention. Under the law governing such contracts the manufacturer is prohibited from using outside 'agents' or 'lobbyists' but this has been circumvented by the employment of outsiders as company salesmen or officials.

"A percentage of the total value of the contract goes to the commission man. If he brings in a \$1,000,000 contract and his commission is 5 per cent, for example, he gets \$50,000.

The Times reveals one case, involving a \$1,000,000 contract for parts for Garand rifles, in which the manufacturer, R. There's a lot more of this going on, according to the Times, but it's very difficult to get the goods on the manufacturers, government officials and go-betweens, because the practice is shrouded in complete secrecy. The Times states:

WHAT THE "TIMES" CONCEALS

The few big monopolies are already so glutted with orders, that in many instances it will take three and four years to fill them. As yet, only \$28,000,000,000 of orders have been contracted, with over \$50,000,000,000 appropriated. But the trusts don't relish giving these remaining orders to the thousands of small companies, who might grow fat in the process and create future competition for monopolies

The big trusts, which don't have to rely on "commission men" for their orders because they have their agents directly on the OPM and the other government purchasing agencies, want to put curbs on the small manufacturers and squelch any practices which might bring the basic question into the open.

Behind these practices of the small manufacturers which evoke the "Indignation from the Times lies the grand swindle of the big monopolies, who want "all-out" war production only to the extent that they alone profit by it and control it.

Fate of 1918 'War Aims' Shows What Will Happen To FDR's Eight Points

The Roosevelt-Churchill eight-point statement of "war aims" invited immediate comparison with Woodrow Wilson's "Fourteen Points," enunciated before a joint Congressional session on January 8, 1918, in the fourth year of World War I. The comparison is apt-and devastating.

Wilson's "Fourteen Points," of which the Roosevelt-Churchill statement is a pale copy, has been proved the most fraudulent promise in all history.

The declaration of Wilson included several claims significantly omitted from the present eight-point statement. Roosevelt and Churchill cannot attempt to 9justify their war even to the ex- son was the removal - "so far

The "open covenants of peace. openly arrived at" was the monstrous Treaty of Versailles, drawn up in secrecy by the representa tives of the four largest Allied powers, Wilson, Clemenceau Lloyd George and Orlando. This treaty simply looted and dismem bered the conquered nations for the aggrandizement of the victors Not even the people of the vic torious powers, let alone those o the defeated nations, participated in the establishment of this "peace."

AN FDR-CHURCHILL OMISSION

After World War I, diplomacy did not proceed "frankly and ir the public view." On the contrary diplomacy became more secret and devious, on the part of the "de mocracies" as well as the totali tarian nations. The diplomatic dealings of the American and British governments have always been conducted behind closed doors. The very statement of "war aims" just announced fol lowed discussions and decisions of which the American and British peoples had no advance knowl edge and in which they did not participate.

The Roosevelt-Churchill state ment cautiously excludes Wilson's first point. A mere mention of open diplomacy would expose the shady character of the negotiations between the American and and of themselves an indictment British "democratic" governments. would embarrass future nego

A SIGNIFICANT SILENCE

Roosevelt and Churchili dare not mention the colonial question in their "war aims." That might raise the question of the "interests of the populations concerned' in the enslaved colonies of American and British imperialism, the questions of India, the West Iniles, the Malay States, the African colonies.

Seven of the Wilsonian "Foureen Points" dealt with specific questions of the restoration of nations and self-determination for nationalities conquered or ruled by the Central powers.

After the war, each European nation found itself confronting some counter-claim. The need for alignments had induced the lead ing Allied imperialist powers to promise the same territories to different nations. The Versailles Treaty and the other "peace" pay more attention to the "inter- treaties revamped but did not alter ests of the populations concerned" the system of subject peoples, Ir in imposing its domination over Europe. "Poor little Serbia" became Yugo-Slavia, the persecu tor of the Croatians. Wilson's 'self-determination" resolved itsel into a post-war Europe that groan ed with the new sufferings of op pressed nationalities.

Wilson was more specific about the restoration of nations in Eu rope. Roosevelt and Churchil have already made too many con flicting commitments. THE "SINCERE WELCOME"

The "fulfillment" of this promise was the imperialist armed intervention against the Soviet Union from 1918 to 1921. Auto Workers Fight Jim Crow

It is clear that the United Automobile Workers, CIO, is fully awake to its responsibilities to the Negro workers, and understands that if it wants the aid of the Negro people in its struggles, it must do more than pass resolutions against Jim Crow, it must actively take up the struggle to win equality for the Negroes in the auto factories and in industry generally.

The convention of the union last week passed a resolution instructing all locals to fight for the following program:

- 1. Hiring of Negro workers in all departments in all auto, aircraft and "defense" industries.
- 2. Equal opportunities for transfers, promotions and training for Negro workers in all auto, aircraft and "defense" plants,

The delegates made it clear that they wanted the officers to carry out this program without

One Negro delegate in a moving speech said, "We (Negro people) want to demonstrate we are men and we are brothers and we believe in the CIO." Most of the Negro auto workers have already demonstrated this. It is now up to their white brothers to understand that action on the job to fulfill the union's resolution will make the Negro workers the best and most loyal members of the union.

The convention also passed a resolution demanding abolition of the poll tax which disfranchises millions of Negro and white workers and sharecroppers in the South.

Whose Idea Is Jim Crowism?

PM, New York newspaper controlled by Marshall Field, department store magnate who refuses to hire Negroes except as janitors or doormen, has been making a bid for Negro nickels by deploring Jim Crowism every now and then as "inconsistent" with the "all-out war for democracy" which PM so ardently supports.

Last week in their editorial columns they printed a letter from a white soldier in a northern camp, who told how his commanding officer had addressed the men in his company, some of whom were about to be transferred to a southern camp. The officer told them "not to drink with niggers" and not to shake a colored man's hand when saying good-bye.

PM prints the letter to show its "sympathy" for the Negro people, to "take the curse" off the officers, and to try to round up Negro support for the war.

"PM does not condemn the entire army or entire officers' corps on the basis of this one incident-although it is far from the only incident of similar nature reported.'

But, says PM, the main thing is this: "the war against fascism must be a total war, fought fought with ideas against Hitler's ideas at home. Racial discrimination is a Hitler idea . . . "

Of course Hitler has used persecution of Jewish people and other minorities to divide the German workers and maintain himself in power. But is it his idea alone? Did he invent it?

Every Negro knows that this is not true, that Jim Crowism existed and was nourished by the capitalists in this country long before Hitler was heard of. Racial discrimination is also a Roosevelt idea and a Willkie idea and a Marshall

Racial discrimination must and will be fought and destroyed in this country. But that can be done only if it is clearly understood who and what are responsible for and benefit from it.

PM tries to confuse the Negroes by telling them the fight against Jim Crowism is tied up with and is part of the drive for imperialist war.

The truth is that the fight against Jim Crowism is part of the fight against those forces who want to get us into the war-the capitalist class and all its political and journalistic stooges.

Answer To A Reader

One of our readers has challenged our statement that practically all of the Uncle Tom leaders have already sold out to the war machine. Admitting that "many of our so-called promising young men" have already taken jobs in Washington as assistant administrative assistants, our reader nevertheless points to the formation of the Colonel Charles Young branch of the America First Committee as a proof that some of the Negro figures are still opposing the war.

It is true that there are a few Negro "leaders" who have not yet come out in support of Roosevelt's war plans, who understand that the Negro masses are overwhelmingly against those plans and who figure on maintaining some prestige among the masses by not committing themselves as yet. Among these are J. Finley Wilson of the Elks and Perry Howard, Negro Republican,

But to assume from this that they can or want to lead the Negro struggle against war is to make a fatal mistake. For even if you forget for the moment Lindbergh's anti-Negro phobias, you cannot forget that the America First Committee is only a "loyal opposition" to Roosevelt, and itself expresses the interests of one section of the Jim Crow ruling class.

They may hold out a little longer, but we can be sure that Wilson and Howard, like Lindbergh and Wheeler, will come rushing to the defense of the capitalists' interests, once the war is declared and those interests are at stake.

He told General Knox in Russia to "avail himself of the services of Colonel John Ward in every possible way, for no one could express better the feelings of 'patriotic British Labor men equally opposed to autocracy and anarchy'."

NOT MATERIAL AID ALONE

Churchill did not confine his aid to materials or the use of men. He also, gave diplomatic aid, and was continually putting pressure sadly compelled to record, "tat in line. Churchill spoke strongly against both proposals. The Allies, he explained, could not give money for such anundertaking because of "public opinion." And a Polish peace with the Soviet government would be disastrous for the armies of Kol-

"It seems therefore clear that our policy at the present moment should be to persuade the Poles to carry on for a few months as they are doing, i.e., fighting and defeating the Bolsheviks on their borders where and when they can, without preparing either for a decisive advance into the heart of Russia or for a separate peace."

Churchill On Stalin and Trotsky

Churchill, realistic imperialist statesman, always understood the differences between Stalinism and Trotskyism. In an article, The Communist Schism, written on October 16, 1936, and printed in his book. Step By Step, page 53, he sums them up as follows:

"Stalin has now come to represent Russian nationalism in somewhat threadbare Communist trappings. Trotsky stands for the orthodox theory of international world revolution. Stalin has acquired Lenin's authority. Trotsky, banished, hunted, a world-pariah, has Lenin's message."

"It is of the very highest consequence that General Denikin should not only do everything in his power to prevent massacres of Jews in the liberated districts, but should issue a proclamation against anti-Semitism."

When this did no good, he telegraphed Denikin on October 9 "to redouble (!) efforts to restrain anti-Semitic feeling and to vindicate the honor of the volunteer army (by such restraint)."

FOR WHOM THE

WHITE ARMIES FOUGHT

Many of the imperialists, beset with troubles at home and watching the gradual rout of all the White generals on whom they had pinned their hopes, began to doubt the wisdom of further aid to the losing counter-revolution. Churchill was quick to answer this.

"It is a delusion to suppose that all this year we have been fighting the battles of the anti-Bolshevik Russians. On the contrary, they have been fighting ours; and this truth will become painfully apparent from the moment that they are exterminated and the Bolshevik armies are supreme over the whole vast territories of the Russian Empire."

In 1929 Churchill summed up the experiences of the period of intervention and civil war.

"Unsuccessful intervention in the affaire of another country is generally agreed to be a mistake; and accordingly all the efforts made by the Allies in Russia after the Revolution and after the Armistice fall under a common condemnation ... "

And Churchill prides himself on the fighting continued much lon- the fact that he less than anyone else deserved such "condemna-Churchill also gave advice to tion" because the intervention was

But even unsuccessful interven tion was worth while, Churchill

"Although intervention failed, there remained two results of our persistency. The first is moral." That is, even if unsuccessful, the British imperialists stuck to their antilabor principles. The second was "a more prac

tical result," "The Bolsheviks were absorbed during the whole of 1919 in the conflicts with Kolchak and Denikin. Their energy was turned upon the internal struggle. A breathing space of inestimable importance was afforded to the whole line of newly liber ated countries which stood along the western borders of Russia.' A breathing spell to German and British and French imperialism is omitted by Churchill, but is none the less important. "By the end of 1920 the 'Sanitary Cordon which protected Europe from the Bolshevik infection was formed by living national organisms vigorous in themselves, hostile to the disease and immune through experience against its ravages." Thus spoke the class-conscious imperialist, Winston Churchill, in 1929. Twelve years later, when Hitler attacked the Soviet Union

"The Nazi regime is indistinguishable from the worst one has been a more consistent opponent of communism than I have for the last 25 years. I spoken about it."

And this is the same Churchill whom the Stalinists now hail as a defender of democracy and a friend of the Soviet Union, and to whom they want the American workers to send aid as a means of defending the Soviet Union.

Japan May Now Seize Opportunity To Attack Siberia

By JACK WEBER

War in Pacific Imminent

Hitler's invasion of Soviet Russia automatically cancelled the Russo-Jap neutrality pact and broke the stalemate in the Pacific. This was indicated politically by the quick change in the Japanese cabinet. Matsuoka, the man responsible for the signing of the pact with Stalin, had to be retired for the time being in order to free the hands of the Japanese government.

Naturally the Pacific War will be fought on a tremendous, far-flung front. It involves all the islands of the Pacific, all the Asiatic colonies or outposts of England and America, China and the mainland of Asia. But above all, it involves Siberia. Thus despite the seizure of Indo-China which may become a base of operations against the Dutch East Indies and Singapore, the Japanese have been concentrating their main strength in Manchukuo, along the Siberian bor-

The complete embargo on Japanese trade by the United States, England and the Dutch East Indies, cannot help but be the prelude to war. Its effect is to strangle the Japanese economically and under present circumstances the Nipponese imperialists can meet this situation only by a further extension of their looting. This may mean suicide for the Japanese imperialists, but they are now driven by forces far beyond their

Hitler is applying the utmost pressure on Japan to enter the war now. But it is clear that he can offer the Mikado no help at all. What he offers is a gamble on the future, an action based on the chance that he will ultimately defeat England and perhaps the United States. Meantime the Japanese would have to fight in the present-and who can tell what changes may take place in the rotten, undermined semifeudal structure of Japan between now and Hitler's possible victory?

Japan is now in a most unfavorable position from the military point of view. She is ringed around by enemies, encircled as the Japanese put it, by the ABCD powers; that is, by America, Britain, China and the Dutch East Indies. The Japahese navy is quite powerful, and the Mikado's statesmen may hope that the Battle of the Atlantic is of such vital importance to the United States that most of its fleet will remain in the west to assure the transport of supplies to England-but there can be no certainty of

Japan and Aid to the USSR

Now the situation has become far more menacing with the promise by Roosevelt of unlimited aid to the Soviet Union. The meeting between Roosevelt and Churchill, besides making important decisions concerning the almost certain war with Japan, has resulted in the calling of a conference in Moscow to coordinate all war activities of the three countries.

Already Japanese spokesmen have "warned" that relations with Moscow would become extremely precarious if collaboration with Britain and the United States is extended to the Far this would mean a three-power plan for aid to China, It would also mean the establishment of American bases in Siberia to protect shipments of munitions and other forms of aid to Soviet Russia from attack by the Axis powers, whether Germany or Japan, It is well known that Japan gave considerable aid to German raiders in the Pacific. Japanese ships might now be outfitted for Germany on a larger scale than ever to prevent aid from reaching Vladivostok. But this would merely bring about an undeclared war with the U.S. navy convoying ships across the Pacific as it is doing across the Atlantic. How long would it be before a naval clash occurred that would precipitate large-scale war?

Vladivostok becomes the key point in the Pacific in this entire situation, It is through this point that all shipments must pass to reach European Russia as quickly as possible. For that port is the Pacific terminus of the Trans-siberian Railway over which all goods must be sent. The capture of Vladivostok and the destruction of the railroad by the Japanese would cripple all attempts to aid Russia. Furthermore Vladivostok is the nearest point menacing Japanese cities with the possibility of bombing by planes, and menacing the Japanese navy as a submarine base.

It seems clear that the diplomatic fencing of the Pacific powers must give way under the strain of all the imperialist problems. The question of division and redivision of the earth is insoluble except by means of the sword. The Japanese are preparing their forces for an attack on Siberia in order to seize the Maritime Provinces and the eastern part of Siberia, Clashes between the Red Army and the imperialist forces of the Mikado have begun on a small scale. The real clash may come at any moment.

The United States would prefer to keep its hands free for the Battle of the Atlantic, and not to divide its forces between the two oceans. A Pacific War would divert supplies that could otherwise be used by England and Russia directly against the German armies. But everything points to United States involvement in the Pacific phase of the world imperialist war even before entry as an actual combatant in the Atlantic war. It does not seem likely that the Japanese can win such a war. But they can blunt the full force of the allied blows against Hitler. They may help also to prolong the war con-

Aboye all, it must be remembered that imperialism can no longer help itself. The second imperialist war drags every country into its swirling vortex because it sharpens unbearably every rivalry, every tension. Japan is powerless under the present imperialist regime to change its course. But for that matter, so is the United the change, but will live as he Under Socialism, solidarity cultivation of land, the planning petition will have the widest scope Goethe, or a Marx. fight against their expressed will and interests. The war-mongering conspirators headed by Roosevelt are afraid to let Congress and the people know what they are doing; they will never let the people vote on the question of entering the war. These "democrats" have no use or respect for open, honest, democratic methods. They treat the American people as an alien and hostile force which must be duped and dragooned into support of their

Out of the conference came a promise of "maximum aid" to the Soviet Union. A forthcoming conference in Moscow will supplement the Roosevelt-Churchill parley and presumably implement this promise. This pledge of material support has been given, not because of any concern for the defense of the Soviet Union, but because the immediate interests of Anglo-American militarism demand that a certain measure of support be given to the Red Army's battle against Hitler's onslaught.

But this conditional support has strict limits. It cannot be permitted to overstep the bounds of the interests of the Anglo-American imperialists or run counter to their need for preserving capitalist rule. These considerations permit them to offer aid to delay and tie up Hitler's army but forbid sending enough assistance to enable the Red Army to annihilate Hitler's legions, with all the revolutionary implications that must follow. Roosevelt and Churchill's friendship for the USSR is a temporary tie forced upon them by uncontrollable circumstances; it does not remove, but merely overlays, their deep-seated hostility to its existence.

Other, more sinister, questions concerning the Soviet Union than the immediate matter of material aid were very likely discussed by Roosevelt and Churchill. How to exact concessions from Stalin; how to keep the workers' state isolated and weak enough to maintain its dependence upon the imperialists; what to do about enslaving the Soviet people; in general how to eliminate the independence of the first workers' state and the last conquests of the October revolution, without injuring their own interests.

Roosevelt and Churchill's discussions of these problems was one reason why no Soviet representative was present at their conference. The people of the U.S. and USSR know only so much as these imperialist chieftains feel it expedient to disclose at the moment. Their real intentions, their longrange plans and perspectives are veiled in secrecy and silence, but, we may be sure, if Roosevelt and Churchill discussed ways and means of aiding Stalin today, they also exchanged views on how to harm the Soviet Union tomorrow.

The opposing imperialist camps employ different tactics toward the Soviet government at different times but both work persistently toward the same end. The capitalists want to cripple and destroy the first workers' state in order to invigorate their common system of exploitation. Hitler is striving to annihilate the Soviet Union by direct armed assault. Roosevelt and Churchill, while utilizing the Red Army's resistance for their own purposes, also look forward to the end of the USSR. For the moment they must proceed cautiously along this line, under cover of an alliance with Stalin, by exacting concessions as a price for their collaboration.

The reversal in their respective attitudes toward the Soviet Union since the outbreak of the war demonstrates how purely tactical and temporary are the differences between the policies of the contending imperialist blocs. A year ago Roosevelt and Churchill occupied the same directly menacing position toward the Soviet Union as Hitler does today. Roosevelt was condemning the Soviet Union as "an enemy of civilization" and endorsing allout aid to Finland; Churchill was preparing to dispatch expeditionary forces to help Baron Mannerheim repel the Red Army. Hitler was then exchanging mutual aid and assurances with his ally Stalin; Ribbentrop was going to Moscow, as Harry Hopkins recently did.

Now everybody in this dance of death has changed places and partners. But although the alignment of forces shifts, the aim of the imperialists on both sides remains the same. Allied or opposed to the Soviet Union, the imperialists care nothing whatsoever about defending it. They defend only their profits, privilege and power.

That is why the workers must be warned against these false friends and perfidious allies, and taught to place no confidence whatsoever in their promises or pledges as a means of defending the Soviet Union.

Stalin's War Aims

The Soviet Union was not represented at Roosevelt-Churchill's war council. The Soviet Union, like China, is a junior partner in the Anglo-American alliance. And Stalin is, for the most part, a

Stalin's war aims do not reach beyond the defeat of Hitler and a reversion to the pre-war status quo. His war aims, like the rest of his policies, are determined by a single consideration: the enhancement of the power, prestige and privileges of the Soviet bureaucracy and the salvation of their rotten regime. The Stalinist bureaucracy hopes only to emerge unscathed from the war. Beyond this they do not care or dare to look.

Stalin's foreign policy is a direct extension of his reactionary domestic policy. To maintain the power of the bureaucracy, he relies upon the benevolence and self-interest of capitalist allies. Yesterday Hitler, today Roosevelt and Churchill. He leaps from one insecure point of support to another like a hunted man crossing an ice-broken stream. He subordinates his war aims and adapts his international program to the demands of the imperialists. In essence, Stalin's imperialist allies dictate the content and conduct of the foreign policy of his government and his orderlies of the Communist International. The Daily Worker repeats, "Communism is not now the issue"; the Soviet press acclaims Roosevelt-Churchill's declaration of war aims as buttressing a "united front of peoples standing for freedom." In return for pledges of material support, Stalin has sold the political services of the Communist Parties in the U.S. and Great Britain to the imperialist bosses.

Revolutionary Aims

In war, as in peace, the working class can preserve their institutions and promote their welfare only by continuing to struggle everywhere and under all conditions against the capitalist bosses. The mass of workers needs to know the truth. This war they so hate and oppose is not their war but the bosses' war. The main enemy is the imperialists in their own country. The only road to peace lies through unrelenting struggle against the capitalists who promote and profit from the war. To get rid of war, the workers must rid the world of capitalism. The workers need a social program of emancipation corresponding to their vital needs and aspirations. They need a great and worthy goal to inspire their struggles and arouse them to solve unprecedented tasks.

They will not fight willingly for the maintenance of the existing capitalist chaos or for a return to the pre-war conditions which produced it. But they will respond to a bold revolutionary program directed toward the overthrow of imperialism, the abolition of national boundaries and the creation of a socialist world. This kind of revolutionary policy, the internationalist Bolshevik policy of Lenin and Trotsky, alone can knit the divided and demoralized workers and poor peasants into a fighting force capable of saving the Soviet Union from annihilation.

Stalin pursues the opposite course. He tells the workers one lie after another. He deprives the Soviet workers of all democratic rights and institutions. He paints up his imperialist partners of the moment as protectors of the Soviet Union, as friends of the workers, as lovers of peace. He deters and discourages the workers in capitalist countries allied with him from fighting for their own class aims and interests against their exploiters.

Stalin's policies make the task of defending the Soviet Union unprecedentedly difficult. But, despite all difficulties, the revolutionary workers must dedicate their full energies to this task. The defense of the Soviet Union is the most urgent duty before the international working class. Unflagging opposition to the ruinous policies of Stalin's regime and the eradication of Stalinist influence in the world labor movement is an indispensable part of that task. The salvation of the first workers' state and the revival of the October revolution depend upon the continued struggle of the workers against their capitalist oppressors.

Youth Opposes Training for War

American youth does not want to go to war; it does not even want to train and prepare for a possible war. This is the inevitable conclusion to be drawn from the fact that the Roosevelt administration could muster only a majority of one vote in the House of Representatives for such an important measure as the bill providing for an extension of eighteen months in the period of service of drafted men.

There is no argument necessary to convince one of the importance of this measure from the point of view of the imperialist interests of the American capitalists. In spite of this, however, almost a majority of the representatives of capitalism voted against the bill. This astounding fact can be explained only on the assumption that the overwhelming majority of the people was against the measure and the pressure from the voters back home was too great to permit the average democratic Congressman to vote

Obviously the greatest opposition to the bill came from the men who had been drafted and who would be compelled to serve in the army another eighteen months. They have already served almost a year; they are sick and tired of it and they want to go home. This is confirmed from every source. An article in the magazine LIFE, a magazine which can hardly be called isolationist, plainly states the bitter hostility of the soldiers to the idea of serving another eighteen months in the army.

What conclusions can be drawn from the unwillingness of the youth to serve in the army and how should revolutionary Marxists utilize those con-

Capitalist Class Unable to Furnish Ideal

One thing is certain. The attempt of the war-like "democrats" to convince the people that this is a war for democracy against fascism and that the United States must be prepared to enter the war to save democracy from destruction at the hands of Hitler has failed to a very large extent. It is hard to believe that American youth would not be willing to sacrifice several years of their lives in training if they were convinced that this war vitally affects their interests and is really a war for democracy against fascism. To the extent therefore that American youth has not been taken in by the propaganda of the interventionists, it is all to the good.

Only the isolationists and pacifists, however, can stop at this point. Revolutionary Marxists must proceed from this point and attempt to convince the American working-class youth that there is a grave danger of a fascist victory not only by virtue of Hitler's armies but also through the activities of the fascists within our own country. To ignore the fascist danger because the pro-war democrats are making the false claim that this war is a war for democracy against fascism, is to fall into the trap set by fascists. In the first place, therefore, it is essential for advanced workers to convince the American working youth that there is a real danger of fascism, not so much from Hitler as from the economic and social conditions that gave rise to Hitler in Germany and will give rise to fascism in this country. It is absolutely essential to prepare to fight fascism, but the only effective method is to prepare to substitute a socialist government for a capitalist government.

That the capitalist democracies are at a tremendous disadvantage in the struggle against the fascist powers where the vast majority is compelled by brute force alone to do the bidding of the fascist masters is evident from the fact that the American ruling class has not succeeded in creating the necessary idealism required for a victorious struggle against the fascists. The youth will gladly prepare to fight fascism and to sacrifice their lives in the fight only after they are convinced that they are fighting for a new world which will give them the opportunity to live as they want to live. Only a socialist regime inspiring the youth with the greatest idealism can succeed in forging an invicible army that will smash any

Our Military Policy Applicable

And in this connection also it is necessary to bring before the workers our military policy. It must be understood that the unwillingness of the workingclass youth to remain in the army is due not only to the fact that they have not been furnished with an ideal in which they believe and for which they are being trained. The incompetency of the officers, the severe and stupid discipline, the lack of democracy in the army make service hateful to the youth. Even if they were not convinced that this is a war for democracy, they understand well enough that they will have to fight whether they like to or not, and their common sense would tell them that it is better to be adequately trained. Modern war requires great skill and much training. The soldiers know it and are anxious to get the necessary training. But the regime in the army is so hateful to them that they are beset by only one idea and that is to get out as quickly

But the fact is that training is necessary and for any advanced worker not to realize that and to fail to convince his fellow-workers of that is to commit a serious error. This is the opportunity for us to convince the workers that their unions should undertake to train them in the use of modern arms and in the tactics of modern warfare. Military training under union control will be totally different from training in an army under the control of men hostile to everything that the working class stands for. Military training under union control means democracy for the men. They will have their own committees to organize things in the interests of the men; they will control their officers; the stupid discipline of the regular army will be done away with; union activists will be trained as officers and these will have the interests of the men at heart.

The trade unions can mobilize the masses for an effective struggle against fascism; if they would only do so they can give the working youth an ideal and a goal to fight for. They have the task of preparing the working masses to struggle to the death against any and all forms of fascism, whether coming from within or from without.
