## Why Are There No Labor Representatives In The New Congress?

An Editorial

Of the 435 Representatives who took their seats in the new Congress on Wednesday, not one is a representative of labor.

The responsibility for this intolerable situation must be placed on the shoulders of the AFL and CIO leaders. In the November elections they failed to place any independent labor candidates for Congress before the voters.

The potential vote for independent labor candidates was enormous. There are over eleven million members in the trade unions.

In addition there are the adult members of their families housewives, etc. - who would vote with the trade unionists.

There are also the millions of workers who are still unorganized through no fault or unwillingness of their own and who would vote with the organized workers. There are the agricultural workers and poor dirt farmers,

the natural allies of the industrial workers, who could be rallied under labor's banner. There are the many, many white collar and professional people and small shopkeepers who are wholeheartedly pro-labor.

Instead of arousing these millioned masses around labor, the AFL and CIO leaders backed Roosevelt's party, the Democratic

But deep currents within the working class were hostile to this policy of delivering the workers' votes to one of the capitalist parties. As a result, the trade union leaders could not deliver what they promised Roosevelt.

Growing more and more discontented with the Democratic Party and long disillusioned with the Republican party, a large section of the working class simply stayed away from the polls. Over eight million fewer votes were cast in the Congressional elections than in 1938, and all observers agree that it was mainly the workers who stayed away.

Nor was it a case of turning from Tweedledee-Democrat to Tweedledum-Republican: although the Republicans polled over 50% of the total vote, they polled three million fewer votes than

In short, large sections of the workers were apathetic toward the elections because they rightly felt that there was no choice for them at the election booths.

And generally the workers who felt that way were the backbone of the trade unions - the most loyal, the most active, the men and women who built the unions. As one delegate to the recent CIO convention confessed, anywhere from 25 to 35% of the Michigan CIO members - the cream of the CIO - did not bother to even register to vote.

These facts are particularly important in the light of the demand, voiced by both the CIO and AFL for more labor representation in the various governmental bodies in Washington.

This demand is in part an alibi of the union leaders to explain why the trade unions are being kicked around in Washington - if Roosevelt would only appoint more union leaders to government bodies things would be different, they say.

But this demand is also a distorted expression of the realization, growing among the workers, that the old pure and simple trade unionism is inadequate, that organized labor must plunge

Certainly the most important governmental body in Washington in which labor leaders should sit is Congress. Yet the trade union leaders, demanding seats everywhere else, are not demanding any seats' in Congress!

So far they are only "demanding" what Roosevelt can give them: a seat or two on the various bodies he appoints, the WLB,

But Roosevelt cannot give the trade union leaders seats in Congress. Those seats can only be gotten by running labor's own candidates in Congressional elections,

Even a handful of Congressmen, had they been elected by an INDEPENDENT LABOR PARTY, would today make an enor-

mous difference in Congress. Such tribunes of the masses would raise their voices loud in Congress, and they would be heard.

The workers' representatives would be heard by the great mass of workers. They could arouse these workers to such a pitch of resistance to the reactionary attacks that even this Congress would have to retreat.

None of the hypocritical "friends of labor" in Congress the New Dealers, etc. - will do this. They will make the record perfunctorily on various anti-labor bills. But they will not sound the alarm to arouse the great masses against the reactionary wave. They will knuckle down to the poll-taxers, rather than to bring the great masses into the union halls and streets in protests against the reactionaries.

Only Congressmen elected by an INDEPENDENT LABOR PARTY could speak for the workers in Congress and thus mobilize the workers against their enemies. But, thanks to the company unionism in politics practiced by the AFL and CIO leaders, we do not have such Congressmen.

Members of the trade unions, both AFL and CIO: Let this be the last Congress which meets without being confronted by labor's own Congressmen! Forward to the INDEPENDENT LABOR PARTY!

### LaFollette Paper Hits P. O. Ban

An editorial in the Jan. 4 issue of The Progressive, the La Follette weekly published in Wisconsin, calls attention to the Post Office attacks on The Militant and Labor Action as ful chapter in American history

"The recent action of the Post the trying year ahead."

### **Pro-Consumer Gov't Official Forced to Resign**

Forced to resign because he took his job of consumer's counsel (representative) of the Agricultural Department seriously and advanced a program which would to a certain degree protect the consumers! Such was the fate of Donald E. Montgomery.

The program that Montgomery put forward was by no means radical. But because it would to a certain degree aid the consumers and cut the profits of the food manufacturers, packers, dairies, chain stores and large corporation farms, his post was abolished and he had to resign after seven years service.

Montgomery stated on resigning on December 28 that he was convinced that the "new Food Distribution Administration does not recognize the need for a partisan of consumers" while "food processors and distributors" have ample representation and a 'chance to say what they want."

He declared that he saw "the termination of consumers' counsel as a clear signal to consumers that they had better look to their food needs themselves." He urged farm and labor organizations to themselves with the food problems of their families and join with consumers organizations in making their needs known."

ousted official called for the watched the trial scenes of the rationing of all foods except cereals and perishable fruits starting at once; government down; special rations of milk to children and expectant mothers at a price they could pay or, if necessary absolutely free; aid to comes have not been raised by war work so that they could buy the food necessities; continuation of the food stamp plan as well as other methods to secure the from State Department archives, lower-paid groups of the population a more adequate diet; penalization of food waste, etc.

> Undoubtedly there are many points in this program which would help in solving the food problem. Its main weakness is that it does not place the question clearly of who shall control the price fixing and rationing: the masses themselves through their own organizations or capitalist bureaucratic government bodies? Even this program, however aroused the fear of Big Business. That's why Montgomery had to

Office Department in denying arbitrarily and without due process of law the privilege of the Unisigns of the need for relentless ted States mails to publications vigilance to "prevent a recur- like The Militant and Labor Arence of the type of witch hunt- tion shows that the American ing which provided such a shame- Civil Liberties Union and other genuine friends of freedom have their work cut out for them in

Big Business is carrying or a full-scale offensive against the living standards of the masses in the form of increasing demands for food price That the government is giv-

ing in to the demands of Big Business was shown last week in several ways: the price of milk was raised in several centers; the price of flour went up; the quality of bread went down; the consumer's counsel of the Agriculture Department was forced to resign because he opposed some of the Big Business profit-gouging policies; it was announced that the food stamp plan would be terminated March 1.

Meanwhile the shortages of certain foods are growing more intense in the workers' neighborhoods. Those with plenty of money of course manage to get what they want, The government's rationing plans announced last week are full of loopholes which enable the wealthy to evade the regulations with ease.

How can the workers meet these problems?

Rationing and price control are absolutely necessary. But under the control of the bosses and their government representatives, they have been swindles.

Real rationing and price fixing can be realized only under control of democratic mass committees of unions, working farmers' organizations, housewives and small businessmen. The policies of such committees would not be governed by the food trusts' greed for profits - a factor which now prevents much of the food from being shipped to low income neighborhoods.

At the same time the work ers must raise the demand: For a rising scale of wages to meet rising living costs.

Only in this way can the plans of Big Business be fought. Only in this way can the masses be assured of a chance to get an adequate amount of food and the other necessities of life.

### **New Rises Mean More Slashes in Living Standards**

By C. Charles

The steady rise of OPA-authorized prices, above all prices of food, continues. This week the procession was led by increases in the price of milk and bread.

The price of milk in the New York, Chicago and Duluth-Superior areas has been raised from 11/2 to 2 cents. The immediate pretext for the increase in the price of this basic food was the abolition of government subsidy payment for milk.

The prices of flour, bread and bakery products have been raised. Flour prices have gone up about 10%.

The price increase in store bread and other bakery products has not taken place directly and openly, but by a lowering in the food value of bread and bakery products. The amount of sugar, milk and shortening in each loaf of bread has been cut.

The consumer pays as much for a loaf of bread as he did previously, but the loaf represents less food than before.

The price increases in the last week were not limited to milk. flour and bread. Thousands of stores in the metropolitan area are completely disregarding price ceilings for all foods of which there are shortages.

Prices are so high that Donald Montgomery, former Department of Agriculture consumer's counsel, declared recently that 38% of American families will not be able to buy the meat allowed to them under the forthcoming meat rationing plan.

The price increases take place on the background of an ever more acute condition of shortage, particularly in beef and dairy products. Beef has become a rare item

### How I Got Plenty of Butter

NEW YORK - Last week I went to the grocery store to buy some butter and was informed by the grocer that I would have to purchase \$2 worth of other foods before he would give me any. I bought the \$2 worth of food and then was given permission to buy one quarter of a pound of butter. I noticed a woman went without the butter because she could not afford to buy the other food.

The following day a relative of mine arrived from the middle west and took my wife and me to Longchamps, one of the swankier restaurants. There were four of us and the waiter placed eight thick pads of butter in a silver tray on the table. When all but two pads were gone, the tray was whisked away and returned in a moment with eight more pads. Unfortunately we were unable to finish the second service of butter and I never discovered if we could have had

There is certainly no butter shortage at Longchamps. The only trouble is, of course, it costs you more than \$1 for the skimpiest plate they serve.

Thus the icies or tactics of the leadership. slogan he raises is: Speed up To openly voice any doubts or the workers, so that they increase "Trotskyist fifth columnist." The hourly wage rates and they will only way the members can express quit demanding strike action.

This fantastic speedup scheme into inactivity, failing to carry is now being pushed with great energy by the Daily Worker and What generally follows such in certain unions, including some

Kenneth Crawford of PM, who

writes as T.R.B. in the New Republic, has suggested that the Stalinists do a service to the war they support by voluntarily disbanding the CP. One might be surprised at the amount of space the Daily Worker spends in attacking Crawford for raising this idea. But not if it is recalled that many CP and YCL members over a year ago because they

The Daily Worker has begun a weekly column on Party Education, conducted by Sam Don, head of the National Education Department. The first column (Jan. 2) warns against the "hangover of 'thinking-as-usual'" and the need for the members to become "well informed and theoretically grounded" in the C. P. line, "Clarify, clarify and again clarify must be our watchword," says

This column, like many others by the C. P. leadership, comments on the "confusion" of those liberfriendship to Franco. etc. - and ments. The increasing amount of attention paid to this question suggests that the C. P. ranks too are seriously disturbed by the newest manifestations that this is not a war for "four freedoms."

Another question which we know quite definitely is worrying C. P. members concerns the attithe GPU journalist, Ilya Ehren-

them together with the Nazis. On Dec. 29 the Daily Worker printed a carefully-written and apologetic letter from a reader suggesting that Ehrenburg is making a mistake, pointing out that as a nation, and asking if Ehrendoes not aid Hitler in keeping a hold on the German people. Ir the same issue is an "answer" by Milton Howard, presented as "some ideas which I have had as

I read the various views." Howard takes care not to disagree with anything written by Stalin, and tries to take a halfway position. But the net effect of his "ideas" is that the Stalinists should encourage Germanhating. . . in the interests of the German people themselves. There is little likelihood that the Sta-Browder has repeatedly stated linist ranks will be satisfied with

> Space does not permit us to themselves and "explanations" about why C. P. leaders and symnathizers continue to be attacked by the government, despite their support of the most reactionary policies and despite the "progressive administration" in Washington - the latest case being the arrest of Michigan State Senator Stanley Nowak on charges that he had lied about his belief in "organized government" when he applied for citizenship a few years ago.

It is difficult to believe that such "explanations" can satisfy whatever honest and informed militants still remain in the C. P. On the contrary, they should hasten the process by which the serious revolutionists will come to understand that the bureaucratic domination of the C. P. by the agents of the Kremlin has transformed it into one of the worst obstacles in the path of the socialist struggle.

### PIONEER PUBLISHERS **ANNOUNCES LEON TROTSKY'S**

### LAST WRITINGS:

### IN DEFENSE OF MARXISM

(Against the Petty-Bourgeois Opposition)

Articles and letters written in the last year of Trotsky's life are brought together in a volume invaluable to the student of Marxism and current politics. Trotsky discusses:

- (1) Dialectical Materialism
- (2) The Class Nature of the Soviet Union
- (3) The Soviet Union at War
- (4) Democratic Centralism

Included are Trotsky's articles written during one of the greatest struggles of his career in defense of Marxist principles:

The USSR in the War

Again and Once More Again on the Nature of the USSR A Petty-Bourgeois Opposition in the

From a Scratch-To the Danger of Gangrene Back to the Party!

### Child Care Problem Acute

(Federated Picture)

This is one of the WPA nursery schools which will be closed soon due to lack of funds. The lack of public nurseries throughout the country has precipitated many domestic crises as mothers have entered industry. Labor seeks a national child care program to keep nurseries open (and to create new ones) when the WPA goes out the window this year.

### JUVENILE DELINQUENCY AND 'WAR ECONOMY'

By B. STEVENS

The New York City adminis- city were put on a starvation tration finds itself confronted appropriation in the last budget with a rise in juvenile delin- by the Mayor, mainly in response quency which the short sighted to the pressure of the real estate policy of the administration it- interests and in the name of "war self has helped to aggravate. The social, health, recreational and educational services of the

economy."

Unmindful of the fact that war brings with it a necessity for increased health, recreational and educational services, to counteract in part the inevitable maladjustments of the civilian population, especially the youth, the Mayor launched on his pennypinching policy of cutting these very services to the bone as his contribution to the war effortand to the real-estate interests in the form of a lowering of the tax

THE REAL CAUSE

The protests of the educational October, 1917 was an inspira- France struck, demanding demo- I demand that you never forget staff went unheeded until the tion to the war-weary masses bilization. In one instance 400 that there are two Englands. Be- recent murder of a teacher and of that article in the Readers' Di- critical of administration policy. of World War I. Under normal peace-time conditions, this "economy" policy would undoubtedly have resulted in a rise of juvenile delinquency. With the aggravation of war-time dislocations of the home, this "war-economy" is turning out to be a criminally expensive policy in terms of morale and human material.

Some of the teacher organizations have gone to the length of calling for police protection against delinquents. By no means a solution to the difficulty, it is an expression of the helplessness and litteriness of the educational staff. This condition, too, can be laid at the doorstep of the Mayor

and the budgetcutters. For the past year everything has tended to demoralize the educational staff, rather than to to the extra duties, such as rationing, vacation duty, air-raid drill, etc., the fact that there was a constant threat of dismissals. cuts in staff, doubling of classes due to lack of substitutes, has done tremendous harm to the morale of the teaching staff, and caused whatever jitteriness some of them are now manifesting.

WHAT IS NEEDED

The six-point program just put forth by the school officials for meeting the problem of juvenile delinquency is entirely inadequate and only a patching-up affair. It calls for reduction of class size in the affected areas-to 39. It calls for the shifting of teachers from less-affected areas to those where juvenile delinquency is more prevalent. This would have the effect of leaving the problem unsolved in the worst areas, and only creating new reas of trouble.

size to at most 35 pupils per class,

Today, the Soviet Union is invader, Germany. One of the most powerful weapons of the Soviet Union, one which Stalin neglects, is a revolutionary appeal to the oppressed masses of Germany to overthrow Hitler and establish a workers' government. The workers of Germany long suffering under fascist tyranny, would heed such an appeal, and strengthened by the establishment of a Soviet Germany the international proletariat would go on to further conquests.

### World Police Force Would Be Aimed At The Working Masses

By A. Roland

The first anniversary of the formal coalition of the United Nations sees the leaders of these countries far more certain of military victory than of reaping the fruits of that victory. Their speeches, one and all, reveal men who feel haunted by the ghost of the future. It is jogging their elbows, demanding solutions for the vast problems that will face them tomorrow in the post-war world. They cannot lay the ghost, for they are bankrupt of any ideas that would lead the world forward to a new and better plane of living.

It is capitalist society that gave birth to the war. Such wars are inevitable in a society in which the capitalist nations, dominated by vast monopolies, are bound to compete with each other, by every means possible, for the markets of the world. The Second World War continues the struggle of the First World War for the same major purposes. If the present society continues to exist after this war, then one can predict with assurance that a Third World War is in the offing—a war that will drag civilization down still further.

### Lessons of Last 25 Years

There is one great difference, however, between this war and the last one. The events of the chaotic epoch between the wars, particularly those that acted as the immediate precipitants of the war, served as mass lessons dealing with the foundations of society. The rise of the murderous Nazis to power in Germany was seen to be connected with the treatment of Germany after the last war through the Versailles Treaty. It was seen to be connected also with the economic rivalries among the great powers. England, for example, helped both passively and actively in the rearmament of Germany under Hitler in order to balance a strong Germany against a strong France. But above all it has been made clear that Hitler rose to power in Germany as a result of the class struggle, with the big bankers and financiers giving the Nazis every assistance against the working class.

The Nazis drew the greatest sparks in their propaganda before they came to power by their

denunciations of the iniquitous Versailles Treaty that enchained the German masses for the benefit of the victorious Allies. This treaty was their greatest stock in trade. Anyone who is really concerned with making the future different from the past, would be obligated then to avoid a new Versailles. But what do the "statesmen" propose?

They propose a super-Versailles, with the iron heel quadrupled in thickness. Roosevelt, Wallace, Churchill, Cripps, all favor the police domination of Germany and Japan after the war. They speak of an "international police force," an "international" council, an "international" court. In actuality this is an abuse of the term. It means clearly a new League of Victorious Powers with far greater functions and strength than the moribund League of Nations. Germany and Japan would be disarmed completely, perhaps even dismembered. The statesman Wallace proposed that Germany be disarmed and prevented from having or building airplanes or tanks for 25 or 50 years. He says plainly he wants a world council and world machinery to keep disarmed those parts of the world which would threaten the peace.

Wallace carries these views to such extremes that even the N. Y. Times feels called upon to administer an editorial reproof! He wants not only military, but "psychological" disarmament-for the Germans and Japanese, to be accomplished by supervising the schools of the defeated countries. This goes a bit too far even for the Times. That paper shrewdly-and this time without criticismremarks: "And familiar criticisms of the 'harshness' of the Versailles Treaty have somehow evaporated in the intensity of our determination to impose a firm peace at the end of this war."

### What Do They Want?

The policing of defeated nations can hardly be called an aim of the war. What do the capitalist statesmen propose positively? The conspiracy to put off discussion of this question has not succeeded too well. The simply extraordinary attention suddenly focussed on the shrinking and innocuous Beveridge plan will not serve for long to hold up the discussion. President Roosevelt gave three aims of the war in his Jan. 1 address on the occasion of the anniversary of the United Nations pact: the crushing of the "bandit assault on civilization," the organizing of relations among the nations so that the "forces of barbarism can never again break loose," cooperation so that "mankind may enjoy in peace and freedom the unprecedented blessings which Divine Providence through the progress of civilization has put within our reach."

Churchill of all the Allied leaders has been the most blunt in his expression of war aims. He says plainly he wants to hold on to what he's got. He wants the Empire to remain intact after this war. He means this not only as applied to Germany and Japan, but to the United States or any other power as well. Churchill will talk trade treaties with Hull to help alleviate trade rivalries as much as possible, but he has no illusions (nor do the others have any) that the end of the war will change the conditions that existed before the war. The English press is filled with talk of the post-war rivalry between the United States and England in the matter of air routes and trade.

It is perfectly clear that the statesmen who are conducting the war are empty of any ideas for a new world. And that means that they are bankrupt. They can only strive to restore the status quo that existed before the war-or actually to go backward historically by attempting to break up a great nation, Germany. Far from eliminating the conditions that lead to capitalist wars, they would lay the foundations for the next great world war, just as did Wilson, Clemenceau and Lloyd George. They are bankrupt because the capitalist system, is bankrupt.

The statesmen do not worry about the reaction that might spread in a defeated country due to a new and worse Versailles. They were not opposed to the Hitler who came to power in Germany by crushing the working class. They were opposed to to the Hitler who wished to expand German imperialism at the expense of the other powers.

### Who Will Be Policed?

The aim of salvaging capitalism and maintaining the status quo faces this contradiction. Hitler represents the capitalists of Germany, even though he is a dictator. Who will take the power in Germany after his defeat by the Allies? The logical successor would be those crushed by Hitler inside Germany; namely, the workers and toilers. But that would be a blow at world capitalism. It is this contradiction more than anything else that leads to the desire to police the defeated countries. They are to be policed not against the already defeated Hitler, not against the military clique that would disappear with him, but against the workers who might then attempt to take the power.

If the United Nations see the possibility that they may have to police Europe for a long time after the war, it is because it will take a long time indeed to impose a new dictatorship of the capitalist rulers of Germany on an unwilling German people. The war against Hitler would thus turn into a war against the workers of Germany. These workers were not the perpetrators of Nazi barbarism; they were the first victims of that barbarism. The attempt to make them responsible for Hitler will not succeed. They are least of all guilty.

It is the workers of the world who along with all the oppressed peoples can carry civilization forward to a higher plane. The solution to the problems of the future, to the elimination of capitalist wars, lies in the establishing of a socialist form of society. The German workers can aid mightily in bringing about this really new society. That is why they must not be permitted to become the victims of victorious capitalism.

## ORKERS' BORUM

The columns are open to the opinions of the readers of The Militant. Letters are welcome on any subject of interest to the workers, but keep them short and include your name and address. Indicate if you do not want your name printed. - Editor.

Asks Campaign On

Why don't you run a campaign in The Militant against the sure on for government-sponsor-Davies' movie, "Mission to Mos- ed and financed nurseries for Union Quits Joint cow?" After all, this film is a working mothers, slanderous smear weapon in the hands of the employers and Stalinists and they will use it to attack Trotsky and the revolutionary movement. Trotsky was the real defender of the Soviet Union but he is now pictured as an agent of Hitler. This must not go unanswered.

BEHEMOTH: STRUCTURE AND PRACTICE OF NATIONAL SOCIALISM by Franz Neumann. Oxford University Press, 1942. 532 pp.

Within the last few years we have been swamped by a flood of superficial literature attempting to classify Nazism as everything from a pagan nihilistic concept to a so-called managerial revolution. "Behemoth" by Franz Neumann is one of the few works on this subject which has tried to clarify and logically analyze the character of the Nazi state on the basis of known economic, social and political data.

The author, a German Social-Democrat, although sugar-coating the role of the Social-Democracy and whitewashing the nature of Allied imperialism, has nevertheless performed a great service in producing facts to prove his main thesis, that Nazism is the dictatorship of monopoly capitalism.

In spite of his aforementioned limitations, Neumann is forced to admit that the liberal capitalist and labor leaders were unable to halt or counteract tendency toward economic concentration and the growth of fascist groups. Under the Nazis, he shows, this process was speeded up with the result that the state and the ruling party have become fused to a hitherto unprecedent-

That is, whereas the state during the era of a liberal bourgeois democracy was subject to the pressures and influences of conflicting groups even among the ruling classes, the state under fascism has become entirely fused within the predominant capitalist strata. Even then the process of competitive elimination in business does not cease, for among the members of capitalist-Nazi ruling clique the struggle for economic control continues, with the weaker capitalists such as Thyssen succumbing to the stronger such as

Neumann's analyses of Nazi racial and geopolitical theories are highly commendable. He shows how the former has resulted in the accretion to the capitalists of huge profits through the confiscation of Jewish property and the elimination of the Jewish middle class, and the latter as constituting crude rationalizations and justifications for German imperialism.

Regarding the theory that Germany is a managerial state, Neumann quotes an interesting Nazi law:

"Intensified competition and the low price level resultant therefrom have brought nearer the point at which the ruin of enterprises valuable to our national economy is threatened. . . The state must receive greater power in order to prevent the closing down of plants and the slashing of prices to preserve such enterprises. . ." (Statute of July 15. 1933.) This promise - for greater monopolization, higher monopoly prices and state subsidization and loans to large producers - is one, as the author shows, which has really been

The book is rich in material showing the extent to which German Big Business has profited in recent years as a result of conquest, the deterioration of wages and living standards among the workers, vertical and horizontal mon-

opolization and integration of business and the controls which the capitalists use to maintain their regime.

A TIME FOR GREATNESS by Herbert Agar. Little, Brown, 1942. 301 pages, \$2.50.

It is always with some apprehension that one approaches books on current political and social problems that have been highly praised by the liberals. For such books are generally filled with tiresome, windy platitudes, and one puts them down with a feeling of regret for wasted time and evesight.

But Herbert Agar's book - which has been hailed as one of the great documents of the war - had a different effect, at least on this reader. The book is so bad that it is not boring, and it is so useless as an aid to solving the serious problems imposed on the masses by the war that it is useful as an exhibit of the middle class. liberals' utter bankruptcy. For this reason it can be recommended without any reservations to workers who still have illusions about the lib-

Things are in a mess, says Agar - all kinds of things: politics, morality, racial relations, government, business, labor relations, and again morality. Why did it all happen? Agar has the answers: we were selfish, we were materialistic, we were too concerned with economic problems and not enough with moral principles. "We have diminished our lives by foolish sins, by unnecessary refusals to think straight. We can repair the wrong the minute we convince ourselves of the need for seriousness."

This is a time for greatness, he says, so let us be great. It is a time for grandeur and adventure. We must have faith and put an end to the evil of ignoring principles. What are these principles and how do they work? Agar sees them in the teachings of the Founding Fathers, of Washington, Hamilton, Madison, Jefferson Let us be great as they were, and everything will work out well. We can ignore our traditions of greatness only at the peril of losing the war or of winning the war and losing the peace,

And so for the most part the book goes, with Agar delivering sermons on the necessity for making politics "high-minded" - "The way to make the Democratic Party (or the Republican Party) a more edifying sight is to make Democrats (or Republicans) better men." On the necessity for businessmen not to be so selfish and unreasonable. On the necessity for the unions not to advocate the closed shop. On the necessity for newspaper publishers to be less irrespon-

One thing only need be added. Agar finished this book in a hurry last summer, because he was being called to duty in the Navy. At the time he was conducting a column in PM, and the Indian masses were conducting a struggle for independence against their British rulers, Agar finished off his journalistic duties with a number of particularly vile slanders against the Indian masses. So much for his appeals to the traditions of the Founding Fathers.

### **German People No Longer** Fooled By Hitler's Lies

By EDITH KANE

Each year since the beginning of the war Hitler has promised the German people victory. 1942, he said a year ago, would be decisive. As 1943 begins, he speaks of "fighting for our very existence." Though he boasts of the year's military successes, the best prospects he can offer the war-weary German people for the future are a continuation and intensification of the suffering of last year with the end nowhere in sight.

Only by enduring in the war until all other armies have collapsed, he stressed, will the German people be able to escape the consequences of a second Versailles Treaty. This constant reminder of the misery awaiting them as a conquered people is still one of Hitler's most persuasive arguments. And all the statements of post war plans made by spokesmen of the United Nations only tend to reinforce its effectiveness.

Behind the front of bragging demagogy it is possible to discern a note of fear. Some indication of the reason for this is given in the report of a Swedish skilled worker on his return home after thirty months of work in Germany. (N.Y. Times, Dec. 28 and Jan. 1.)

The German workers, he says, are apathetic about the war. They congregate in factory washrooms and openly criticize the regime and the Nazi party.

All workers, native or foreign, work a minimum of 60 hours a week-to which is added compulsory overtime of 5 to 12 hours. The Swedish worker produced pay slips covering some of the period he worked in Germany to show what happens to wages. One-fourth of their meager pay is deducted for the Nazi Winter Help Fund, insurance, income tax, etc. Russian and Polish workers receive, in addition, sizeable deductions as "contributions to reconstruction" of their former homeland.

News of the ordeals of the soldiers and loss of life on the Russian front affects most of the German families. This and their own privations created what the reporter calls "an ugly, angry mood."

There is nothing to indicate that the next period will soften that mood. From such little groups of angry workers will emerge the mighty revolutionary movement that will sweep Hitler and his like off the face of the earth.

### **Small Business men Are Being Driven to the Wall**

By C. WILLIAMS

The war, which has brought a tremendous increase in profits for Big Business, has meant the end of tens of thousands of small businesses.

First hit were auto retailers, mechanics and accessory dealers, gasoline stations and electrical supply stores. The War Production Board estimated by last summer that 34,000 small businesses would be shut down by Oct., 1942.

Now thousands more are going to the wall. These will include grocers, butchers and other small food retailers. Only a fraction of the 1,770,335 small merchants in the U.S. will be in business when the war

Such were the predictions of Donald M. Nelson, WPB chairman, in a statement on Dec. 31:

"In connection with our distribution system we must squarely face the fact that the entire line of some distributors will be eliminated, and major parts of the lines of others will no longer be available. . . This means the elimination of many stores."

About 75 years ago, Karl Marx, founder of the modern socialist movement, foretold the elimination of the small businessman, forced under by Big Business competition. This has been taking place ever since the beginning of capitalism. The war has only speeded up the process.

The socialist movement believes that the great masses of people must socially own the Big Business units, and operate them not for profits but for use. To return to scattered inefficient units would be reactionary. Not'backward to small business, but forward to socialism is the only road for the masses.

### Why Do the Employers **Oppose Food Subsidies?**

By C. CHARLES

The ending of the government milk subsidy in New York, Chicago and Duluth-Superior was a triumph for the capitalist class. The profits of the large dairies will now increase.

Why did the capitalist class demand an end to the subsidy? How did the subsidy work?

Do not get the idea that the capitalist class is opposed to subsidies because of high and noble principles. Nothing of the kind. The only principle of the capitalist class is profits. If subsidies help them get profits, they are for subsidies; if they can make more profits without them, they are against them.

As an example of how subsidies operated to keep prices down, let us assume the producers of a certain item have differing costs of production. (Profits are included in the costs of production.)

Let us say that one-fifth of the producers could manufacture and sell that item at 70 cents, another fifth at 80, another fifth at 90 and still another fifth

Eighty per cent of the producers therefore could make the item at \$1 and realize profits. However, another fifth of the producers could manufacture and sell that commodity and make a profit only if the

If the government wishes to set the ceiling prices at \$1 and still keep the last group of producers in operation it can only do so by giving the \$1.10 group a 10 cent subsidy on each item.

If it does not subsidize the last group and still desires to keep it in operation, it can do so only by permitting everyone's price on the item to go up to \$1.10. In this case it means that the rate of profit for the 80% who can manufacture the item at \$1.00 will rise by 10 cents an item.

The government has up to now been making a pretense of keeping the milk prices down by subsidies. The big dairies demanded that subsidies be abolished. And the OPA hastened to obey them.

Who said anything about taking profits out of war?
