PRICE: FIVE CENTS

Seeks To Line Up Backers Of Hitler Regime In Drive For New Imperialist War On USSR

By Joseph Hansen

Socialist Workers Party Candidate for U. S. Senator from N. Y.

The speech of Secretary of State James F. Byrnes at Stuttgart, Germany, on Sept. 6 is another milepost on the dark and gloomy road to World War III.

There was grim symbolism in the way Anglo-American imperialism organized Byrnes' appearance. He entered Germany in the ornate car formerly used by Hitler as if he were trying to re-

mind the German capitalists of the tours the dead Nazi leader staged in his "war of nerves," before 1939. Amidst the melancholy ruins of the once beautiful Stuttgart.

VOL. X - No. 37

the representative of Wall Street spoke like a Consul of the Old Roman Empire, holding out to the vanquished "enemy" the hope of junior partnership in the conqueror's grandiose scheme of world conquest.

### CARVING COUNTRIES

The American Secretary of State disposed of borders, areas and whole countries of Europe as casually as a Yankee storekeeper cutting up cheese for sale across the counter.

The Ruhr, and Rhineland, he said, couldn't go to France because the people there "desire to remain united with the rest of Germany." But imperialist France can have the Saar because France has been "invaded three times by Germany in seventy years."

Byrnes' speech was a bid to the German capitalist class to line up with Anglo-American imperialism for the projected war on the Soviet Union. All the points of the text he read fit into that aim, including the declaration that the eastern border of Germany is not permanently fixed at the Oder river.

The offer to set up a "provisional government" likewise fits into this pattern, as does the promise to build up Germany's industrial strength.

### IMPERIALIST PLAN

paganda about converting Germany into pastureland—the socalled "Morgenthau plan." Even ing the world itself. had they wished it, the Allied imperialists could not realize the

BYRNES

savage policy ascribed to Morgenthau. But the truth is, the capitalists of Britain and America have long been working on a plan that is far more realistic from their point of view.

This plan is to unite world capitalism in common battle against the Soviet Union. In 1940 Trotsky observed that the USSR "still remains a workers' state, terrifying to the bourgeoisie of the whole world."

### WALL STREET AIM

Passing agreements between INSULTING OFFER this or that capitalist power do not alter the fact, said Trotsky, recalling words he wrote in 1934, that "taken on the historic scale the contradiction between world imperialism and the Soviet Union is infinitely more profound the individual capitalist countries in opposition to each oth-

## Nation-Wide Meat Famine Imposed By Packing Trust

Profiteering meat packers and millionaire stock-raisers are imposing another nation-wide meat famine. They are refusing to sell even at new high ceiling prices and are deliberately withholding meat supplies.

Truman's OPA on September 3 6 sought to coax a bit more of their books." (N. Y. Times, meat into the market by fixing | Sept. 6.) new ceiling prices that will snatch an additional \$600,000,000 a year from consumers and pour it into the vaults of the meat

Retail prices of lamb were boosted an average of 10 cents a pound over June 30 ceilings; eight cents for beef; seven and eight cents for pork; and 51/2 cents on lard. But the profiteers' cry is: "No limit on prices -or no meat!"

As wholesale ceiling prices went into effect on September 5, the flow of cattle to market turned to a dribble. The huge Chicago stockyards, which a week before handled 3,180 animals in a day, received a scant 500. At Kansas City, an all-time record low was set.

### SECRET HOARDS

On the same day, OPA investigators found in Philadelphia a hoard of 300,000 pounds of meat "hidden away" in huge cold storage plants. And they expected to uncover another 200,000 pounds.

In New York, the big packtive-and charging the highest ry around looking for "two-bit" prices in their history. Retail chiselers? butchers could pay the price and cover up the racket - or "refused to permit examination the workers.

The meat shortage in New York will be "bad next month" and "terrific" by the end of the year, said Harry Pfeffer, New York food prices enforcement chief. The shortage will spread "over most of the nation." another Times account admitted.

At Washington, George Moncharsh, deputy commissioner in charge of OPA enforcement, labeled as "nonsense" the packers' claim that the black market reduced the supply of meat to consumers." The meat, ne said, 'still winds up in the mouth of the consumer. The trouble is, it winds up in the mouths of those with the money to ray."

Moncharsh avoided naming the culprits. But he charged that violators are primarily "those regularly in the meat business," and not mysterious

### "Al Capones." ONE ANSWER

But the packers are not worried by the angry and truthful words of one harassed OPA official. They wield too much power in the government. It's no accident that their bosom ing corporations were setting friend and fellow livestockthe black market into operation raiser, Cilnton P. Anderson, is again. # Truck Strike Spreads

## **Jersey Drivers** Join N. Y. Walkout

(Special to The Militant) NEW YORK, Sept. 9-The powerful grip of the general trucking strike that began here September 1 was strengthened last Wednesday when some 10,000 northern New Jersey drivers walked out in sympathy with the 15,000 striking members of the AFL Teamsters

The militant and determined temper of the New York drivers was demonstrated at a stormy meeting of 6,000 here yesterday. Incensed by threats of the city administration to use cops to move "emergency supplies" and by provocative statements of the truck - owners' spokesmen, the rank and file overwhelmingly refused even to vote on an unacceptable compromise sponsored by Democratic Mayor O'Dwyer.

Local 807 in this city.

Previously, the trucking fleet operators had already refused even to discuss O'Dwyer's proposal, thus provoking the strike. Their only counter-proposal to the union's original demands for than the antagonisms which set a 30 per cent wage increase and reduction of the work-week from 44 to 40 hours was an insulting offer of five cents an hour.

> O'Dwyer's proposal, which the union leaders recommended at yesterday's over-flow meeting at the Sixty-Ninth Regiment Armory, called for an 181/2-cent hourly increase and a 40-hour week But rank and file strikers pointed out that with the shorter work-week this will mean in many instances only one dollar more per week in take-home

The minimum which the ranks indicated will be acceptable is the former 44-hour-weekly pay for 40 hours' work plus an 181/2 cent an hour increase for 40

### GETS TOUGH

O'Dwyer, dropping his mask of "impartial mediator," last Friday at a closed meeting of truck owners and drivers representatives got "tough" and threatened to use cops and city employes as scab drivers in an "emergency."

He later back-tracked on his threats and admitted that the capitalist press scare-heads about 'food shortages" due to the strike are unfounded.

However, strikebreaking threats are again issuing from the offices of O'Dwyer's Police Commissioner Wallander.

A frenzied press campaign against the strikers, featured by tightens its grip and spreads.

("A Truckdriver Tells His Story"—See Page Two.)

### Why Prices Soar

Dividend payments to rich coupon-clippers were 13.3 per cent higher in July 1946 than in July 1945, the Department of Commerce reported last

Food corporations are grabbing the biggest profits in their history. Price ceilings have been removed from dairy products. National Dairy Products Corp. in the first half of '46 cleaned up \$11,802,554 net profits compared to \$6,-977,276 in the first half of '45. Borden Co. netted \$8,-875,000, compared to the '45 take of \$5,875,000.

Armour's meat packing profits in six months ending April 30 surpassed profits for the entire previous 12 months.

## LABOR SOLIDARITY IN MARITIME STRIKE

An Editorial -

The most decisive weapon of the maritime workers in their present titanic struggle is the unity and solidarity of all water-front unions in action. This has been achieved for the first time in the long

history of the seamen's struggle - a struggle that too many times in the past had been weakened by lack of coordinated joint action. The imperative need to establish such coordinated

joint action between the CIO and AFL unions was stressed by The Militant during the strike crisis involving CIO unions last June. Unfortunately for the complete solidity of the present

strike, the magnificent solidarity so far displayed by all maritime workers has not dispelled the old atmosphere of suspicion and mistrust.

This is the one thing the bosses and their government are especially counting on to drive a wedge between the different groups of water-front unions and weaken the strike. The Big Business press eagerly pounced upon the report that the SIU-SUP strike committee in the port of New York has refused to meet with the WMU-CIO committee to work out jointly the practical arrangements governing the conduct of the members of the respective organizations.

This disagreement over procedure tends to obscure what appears to be a major difference in policy.

The absolutely correct policy of the AFL unions is to tie up all shipping in order to make the strike completely effective and of short duration. Some leaders of the CIO maritime unions especially the Stalinists, propose to make meat packers have imposed on |000 workers, including employes | all sorts of exemptions permitting many ships to sail under one or another pretext.

This vital question of policy must be clearly posed to all the seamen. No dispute over joint conferences and joint procedure should be permitted to stand in the way man is Not Roosevelt," August guarantee the farmer a fair price pensate for all rises in living of a proper understanding by all the workers of the real

pedal on belligerent strikebreaking threats such as he hurled at the CIO Committee for Maritime Unity during the June crisis.

But the administration cannot duck very much longer. An extended tieup of such vast scope will create a major crisis. The shipping industry is too vital to Wall Street's plans of world exploitation and domination. Indications are that the Truman "brain trust" is trying to devise a face-saving formula with which to appease the seamen while restoring the authority and prestige of the discredited Wage Stabilization Board.

The administration will very likely attempt to engineer a rotten compromise leaving unsettled the main issue in dispute. Such a compromise would only postnot be long in coming.

### New York AFL Warns Of New Wage Fight

The recent convention of the New York State Federation of Labor sounded the first note in AFL ranks of a possible fight on the wage front to combat the sharp slash in living standards due to bounding prices.

The wage-price policy resolution of the convention, representing 1,300,000 AFL members in the state, said in part: "We will not stand by and permit our real wages to shrink in the face of soaring living costs. If (price) controls are permitted to die out, one by one, we will fight to win compensating adjustments in

This strikes a considerably different note than the advice being peddled by top AFL leaders like Robert J. Watt, AFL against the Wage Stabilization Board's ruling of August 23, which member on the National Wage refused approval to the \$22.50 Stabilization Board. Watt told the workers to "tighten their seamen recently granted the SUP belts" and "bend all their efforts in the contract negotiated with to boost production" - that the Pacific American Shipown- means, to boost employers' profits.

### Labor Day Marks Year-Long Strike

The longest strike in recent decades - a bitter struggle by CIO textile workers against the big Athens Manufacturing Company at Athens, Georgia-was more than a year old on Labor Day and still going strong. The anniversary of the strike, begun in August 1945, was celebrated by a Labor Day parade in Athens. with CIO unionists in a giant motorcade coming from Atlanta and other cities to back the courageous Athens strikers.

The company has tried to starve the workers out, but so far has failed. It has refused for more than a year to negotiate any form of union contract.

### Bosses Use Starvation Tactics In Strikes

Never has American labor fought so many prolonged and bitter strikes as in the present period. Since the end of the great strike wave last spring, there have been a number of smaller but very important strikes which have already found the workers holding out for eight, nine and more months.

The CIO United Auto Workers has been conducting three especially gruelling strikes against hard-bitten open-shoppers.

J. I. Case workers passed the 250th day of their strike on August 27. NLRB officials have admitted that the company has refused to bargain in "good faith," refusing to put into operation War Labor Board directives more than a year old. Allis-Chalmers workers have also been out since last spring. Mack Truck workers have been on strike for nearly five months.

The CIO United Electrical Workers has been conducting a strike against the Phelps-Dodge Corporation for nine months.

These strikes are indications that the employers are placing greater emphasis on starvation tactics against strikers. Huge accumulations of war profits, government tax rebates and treasury hand-outs for "losses" are keeping the bosses in position for their strike-breaking holdouts against the unions.

It is imperative that all sections of organized labor give full and immediate financial and other material support to these strikers, so that their valiant struggles will finally force the ruthless profiteers to terms

Despite the extent of monarchist terror organized throughout the country, the fighting spirit of the Greek masses is still unbroken. The two years that have gone by since the defeat of the December uprising have been filled by a series of working class struggles which several times reached the level of the general strike.

These struggles had their origin in the determination of the Greek workers to fight back against the consequences of in- elements of this nationality swell flation and of the attempts to impose a dictatorial regime on Northern Greece. the country.

The action of the masses has been facilitated, furthermore, by the fact that the Communist Party is outside the government and in opposition thereto, and therefore tries to exert pressure on the capitalists in order to secure a definitive compromise

with them. These struggles of the working class have won for it partial Party Must Be Founded-Now!" gains on the economic plane, but declare the editors of Labor have been unable to stop the Challenge in the September isdrive toward dictatorship. Threats, intimidation and force vere supplemented by fraud. Even Hitler would have enried the methods by which the hated George II was shoved back on the throne.

### ARBITRARY LIST

Out of a population of some eight millions, about a million and a half Greek citizens were permitted to vote. Since all lists of eligible voters had been destroyed during the occupation, these were arbitrarily selected. Their eligibility was determined by their loyalty to the king. The cards were stacked against the republic.

Moreover, a special system was set up for men in the armed forces and government employes. Special voting booths were used; an uncontrolled number of special voting certificates was issued. It was charged that since no effort was made to indicate on the certificate that a vote FIGURES DON'T TALLY had been cast, these people voted not once, but many times. After voting in one area they used the same certificate to vote in other

Opponents of the monarchy Armed bands drove up to vil- claim these trucks were used for lage booths and voted for the multiple voting to pack the vote

Despite the presence in Greece of many reporters from the American press, their cabled reports of how the balloting was conducted, contradict each other. The capitalist press here is concerned only with fooling the American workers that a "free and democratic" election took place.

They all report that two slips were handed to each voter. A white slip was marked: "For King George." A blank slip. which was colored, so that it could be seen through the tissue paper envelope, registered a vote for the republic.

Whoever used this slip, however, became a marked man. since it could be clearly seen how he had voted.

Reports on the voting issued by the Greek Ministry of the Interior make it appear that there were three categories of voting: For the King; For the Republic; and blank ballots. The last two categories counted for the Republic.

But how reliable these reports are, can been seen by the final "official" tabulation, which topped off this panzer "election." According to a Septem-Buell Maben, chief of the ber 4 UP dispatch, three sets of Stalin's policies. Only a socialist UNRRA mission to Greece, ac- figures were given out-none of which agreed with the other.

Against a bounding rise in prices . . . one can fight only under the slogan of a sliding scale of wages. This means that collective agreements should assure on automotic rise in wages in relas tion to the increase in price of consumer goods.

—Leon Trotsky

### Storm-Warning

Wall Street and the Stock Exchange last week flashed storm-warnings of an economic hurricane heading toward the American capitalist system.

Stock prices, a sensitive barometer, plummeted down in the sharpest break in 15 years. Small investors scrambled to unload millions of shares at a loss.

Economic sooth-sayers, press commentators and government "experts" admitted utter bewilderment, but hastily issued reassurances of capitalist well-being. Secretary of the Treasury Snyder said: "It's just the general situation. Everyone's taking a fresh look at things after Labor Day."

This is like a man with heart-disease passing off a sharp twinge in the chest as "just a little gas."

Partly, the sharp drop in stock prices is due to inside manipulations by the Big Money boys. They are squeezing out the small fry, who bought at high prices and are being forced to sell'back at low prices.

But fundamentally this is the rumbling of great underground fissures opening under the seemingly solid surface of American capitalism in the very hey-day of its world power.

All the contradictions of capitalist chaos and anarchy that exploded such violence back in 1929 are building up for another titanic upheaval. Aggravated ten-fold by the trilliondollar waste of World War II and the insatiable greed of American imperialism for world domination, the next eruption will dwarf the 1929 catastrophe.

The signs are mounting. Production, the administration boasts, is the greatest in American peace-time history. Inventories of goods in warehouses show the point of glut is being reached. The monopolies withhold these goods to force high prices, while mass purchasing power shrinks.

Inevitably, the basic contradiction of capitalism will assert itself. The market will be flooded with goods the people cannot buy. One day the factories will start to shut down. Unemployed masses will march the streets. Arrogant, almighty American capitalism will writhe in death convulsions.

## What Must Be Done

Every prop of the union leaders' program for "strong" government "price control" as a substitute for a real fight on the wage front, has been blasted away.

After the Price Decontrol Board ruling several weeks ago, CIO President Philip Murray appealed to the bankers and industrialists of the Board "to reconsider its decision and reinstitute ceilings on all items which it failed to

The Price Decontrol Board promptly brushed this plea aside. It indicated in no uncertain terms it would not change its course. It publicly rebuked and repudiated OPA officials who even intimated it might restore price ceilings of dairy products.

The latest slap in the face to the union leaders was Truman's response last week to their pleas that he call a special session of Congress to deal once more with price control. Truman flatly told a press conference that under no circumstances would he reconvene Congress, although he had promised in July to call a special session if the new OPA bill did not check runaway prices.

Prices are rising daily. The meat trust is imposing a national meat famine to break price ceilings. It is plain, even to the most stupid, that the capitalist government is backing the profiteering price-gougers to the hilt. The union leaders' policy of dependence on the capitalist government to "control" prices is washed-out.

In .its wage-price policy statement, which Murray repeated in his plea to the Decontrol Board, the CIO Executive Board said "when American workers are squeezed between rising prices and declining take-home pay, something must be done to protect their living standards."

"Something must be done." Yes! But what?

The union leaders do not say. But more and more militant sections of the

union movement are stating in sharp terms what must be done. They are demanding the reopening of wage contracts. Like the CIO packinghouse workers, the Chrysler and Ford workers, the Akron rubber workers, they are calling for higher wages.

And they are demanding not only higher wage rates, but additional cost-of-living bonuses and sliding scale of wages escalator clauses that will keep workers' incomes automatically in line with every rise in the cost of

### Terror In Philippines

The Roxas regime has begun a reign of terror in the Philippines. Roxas has ordered the Philippine Army to suppress the Hukbalahap movement that includes 150,000 small farmers, sharecroppers and farm hands.

Roxas is backed by Wall Street. He has been supplied with artillery and other modern equipment of the U.S. armed forces. Full scale battles are now shaping in Central Luzon.

The "crime" of the Hukbalahaps is their insistence on rural reforms. They demand an end to the semi-feudal system whereby landlords on huge estates customarily appropriated 50 per cent of the crops raised by the tenants.

During the war the Hukbalahaps took over the land. Arms in hand they resisted the imperialist armies of the Japanese. The landlords and their representatives fled to the cities, seeking Japanese protection.

Roxas himself became notorious as a collaborator with the Japanese imperialists.

When MacArthur landed in the Philippines he systematically set about restoring the privileges of the landlords. He refused to recognize the Hukbalahaps. Leading figures were arrested and groups of Hukbalahaps were slaughtered.

Wall Street's imperialist interests coincided with those of the landlords. Consequently Wall Street consistently backed them against the Philippine people.

Roxas succeeded in gaining office primarily because of Wall Street's support.

Repeating the tactics of the British-backed reactionaries in Greece, Roxas served an ultimatum on the Hukbalahaps to give up their arms. These weapons had been seized by the guerrilla fighters from the Japanese or were obtained from the U.S. armed forces during the underground struggle.

Then Roxas followed up by moving the fullyequipped Philippine Army into the central Luzon districts where the Hukbalahaps are strongest. The civil strife in the Philippines is thus assuming the proportions of open war.

The sympathies of American labor belong wholly on the side of the poor people of the Philippines. Roxas is a puppet of Wall Street, just as the Greek monarch is a puppet of the British.

In defending the Philippine guerrilla fighters, American labor defends its own cause. For the principal enemy in the Philippines is the same as in America — Wall Street.

## Minority Parties

How the election laws are rigged to favor the big capitalist parties at the expense of smaller parties has once again been demonstrated in New York State.

According to the law, it is necessary to obtain 12,000 signatures of eligible voters to place on the ballot an independent candidate or party. Out of this 12,000 a minimum of 50 signatures must come from each of 62 counties, many of them in sparsely populated areas with a tradition of extreme political conversatism.

The rich and powerful capitalist parties are exempted from these arbitrary regulations by the fact that having polled 50,000 votes in a previous election they are listed as a regular party on the ballot.

In the present election four minority parties met these difficult requirements: the Socialist Workers Party, the Communist (Stalinist) Party, the Socialist Party and the Liberal Party.

But after the labor of obtaining the necessary number of signatures, three of these parties have been "challenged." Formal objection was made to the Socialist Party petitions on the ground they lacked sufficient "valid" signatures although a total of 15,000 had been

The same objection was made to the petitions of the Liberal Party although they had obtained 51.015.

The Communist (Stalinist) Party filed 20,-000 signatures but it too was challenged on the grounds the signatures had been obtained through "misrepresentation."

The Socialist Workers Party with 23,727 signatures was not challenged.

The objections are now being considered by the Board of Elections which has the power to rule in favor, or against an objection, or even to disqualify a petition on its own initiative. Since the members of the Board of Elections belong to the Democratic or Republican parties, it is clear that in the final analysis these two political machines of the capitalists have the arbitrary power to prevent a minority party from appearing on the ballot.

When a party can be challenged after it has more than quadrupled the number of signatures required - as in the case of the Liberal Party — and its place on the ballot endangered, the voters should take note of this fact when they enter the polls.

The Militant and the Socialist Workers Party vigorously protest the undemocratic election laws that serve to bar political minorities from the ballot.

## **UNRRA Promises Prove To Be Lies**

- By Eugene Shays

UNRRA was founded in 1943, and a great amount of publicity assured the peoples of the world of the humanitarian intentions which especially the U.S. and Great Britain had in creating such an agency. The war-torn lands of Europe and Asia, they said, were to be at least partially rehabilitated through it, and their starving, suffering peoples were to receive some of the necessities of life until normal times had returned.

But the promises of UNRRA proved to be as empty as all the other war-time promises of imperialism. Congress appropriated \$2,700,000,000 as the American contribution to UNRRA - a trivial amount when compared to the war expenditures (two billions for the atomic bomb, 500 millions for the Bikini tests!). Before one can arrive at the paltry amount that did go for relief, one should deduct the considerable profits made from the sale of these materials to UNRRA, both by American capitalists and foreign governments reselling them to their nationals.

The fundamental indifference to the needs of 150 million destitute people in Europe and 250 million in Asia was exposed not only by the small sums appropriated for UNRRA, but also by the decision of the U.S. government to discontinue the organization.

The UNRRA Council, consisting of 48 nations, is now in session at Geneva, to deliberate the cessation of its operations, and what to do about the many tasks it left unfinished. Among them is the disposition of one million displaced persons, who cannot be repatriated and who have no place to go; the urgent need of 750 million dollars worth of food and 200 million dollars' worth of fertilizers, to say nothing of medical supplies and clothing for the coming winter. The figures cited are UNRRA figures and probably do not cover even minimum needs. According to the Department of Agriculture, even improved harvests in 1946 throughout the world "will leave food supplies next spring considerably below de-

The reason for stopping what Under-secretary of State Clayton brazenly calls the "gravy train" lies in the desire of U.S. capitalists to return to "channels of private trade." Concerning UNRRA, World Report, an authoritative business weekly stated on Aug. 15: "Normal markets, free of governmental restrictions and operations, are at the heart of the program officially sponsored by the

Private exporters thus are to be enabled to extort the last penny of profit from the devastated nations of Europe and Asia, forcing them into debts from which there is no way out, forcing them into making concessions which are to give U.S. imperialism a further hold upon their economies. Clayton's statement, in the light of these facts, clearly reveals the connection between the government and "private enterprise" - the government being the latter's eager and willing agent in this as in any other matter affecting the interests of capitalism.

The fact that the Soviet Union and areas dominated by her have received 40 per cent of UNRRA shipments and have not reciprocated with contributions of their own, with the USSR failing to give quotas of her own production and consumption of goods, is adduced as another reason, although an "unofficial" one, for the decision to discontinue

The true reason undoubtedly must be sought in the fact, however, that the chances of export trade with these regions have dimmed considerably since the inception of UNRRA; hence the latter has ceased to be the promising investment it appeared to be at first. The elimination of relief from this area is part of the design of Western imperialism to force it into its orbit of trade. Humanitarian considerations are, of course, completely foreign to this issue.

American workers must create their own relief agencies through which help can be given to their working class brothers overseas.

## **Billionaires' Club Grows And Grows**

When the American workers were dragooned into the Second World War, Roosevelt promised that no war millionaires would be created out of the bloody holocaust. What came out of the war were billionaires.

A study by the United Press, made public on September 3, shows that the "Billionaire Club" which expanded steadily during the war years under Roosevelt, has not declined under his successor. Truman, There are now 43 such billionaire corporations, trusts and banks which hold a monopoly stranglehold on American economy. Total combined assets of these 43 monopolies

are banks; 11, insurance companies; six, railroads; five, industrial or manufacturing corporations; and three utilities. Metropolitan Life Insurance Company tops the Billionaire Club for the third successive year, with total assets of \$7,561,997,270. Second is the Bell

today amount to \$101,808,613,411, compared with

\$97,731,561,226 on December 31, 1944. Of these, 18

System, American Telephone and Telegraph Co., holding \$6,765,557,026 in resources. Prudential Insurance is third, with \$6,355,984,306. First among the world's most powerful banks, and fourth on the billionaire list, is the Bank of America, with \$5,554,310,000. Chase National Bank comes next with \$5,403,847,000. Two more banks and two

more life insurance corporations follow: National City Bank of New York, Equitable Life Assurance, New York Life Insurance and Guarantee Trust Company. Each controls from three-and-a-half to over five billions in assets. Tops among the industrial corporations, and ranking tenth on the billionaire's list, is the Standard Oil Company of New Jersey, with more than two-

and-a-half billions in assets. Two more banks follow: the Manufacturers Trust Company and Continental Illinois National Bank, both with assets well over two billions.

Pennsylvania Railroad is first among the railroad billionaires, and thirteenth on the list, with assets of \$2,223,000,000.

U.S. Steel Corporation, greatest steel producer in the world, is 16th on the list. General Motors Corporation, biggest automobile manufacturer, is in the 24th place. Consolidated Edison Company of New York, first among the nation's power and light utilities, is 31st on the list.

New additions to this select "Billionaires Club" are Mutual Benefit Life Insurance Company, Penn Mutual Life Insurance Company and Northwest Bancorporation. Three billionaires became common, ordinary multi-millionaires, when their assets dropped slightly below the billion dollar mark. These are: Bethlehem Steel Corporation, Ford Motor and First National Bank. But they're not starving.

## **Detroit Workers** For Export Alone

Last Thursday, August 29, a work stoppage of a few hours occurred at the Detroit Nash plant. The cause was the resentment In wishing you continued suc- of some of the men at being forced to work on right-handdrive cars - that is, cars for export, at the exclusion of work on cars for home consumption.

Four men initiated the strike. When they were threatened with discharge the other workers not directly involved rallied behind the cause. To the union's query as to why so many right-hand models were being produced, tained, domestic competitors must be met and it wasn't any business of the union.

The case was then sidetracked

This is not an isolated case, although it is the first concrete action we know of in the Detroit area. The workers, as their own desires for cars, washing machines, etc. fail to materialize, are becoming increasingly bitter at the thought of production for pense of production for domestic consumption. They are plainly seeing the fruits of their labor

Last week we were laid off for 10 days. Only one line of five men was kept running. All cars off the line were ear-marked for foreign service. There was a great deal of grumbling and many remarks to the effect that "We can't get cars and other things because they're shipping out of the country where they can make

more money on them." And the workers watch the cars continue to roll off the belt, with increasing despair and frustration.

To my mind this indicates that the next period will be one of rapid political education for scoffers, those who look with disdain upon the American workers-wait, we shall see.

## 65,000 March In Detroit On **Labor Day**

(Special to The Militant) DETROIT, Mich., Sept 2 .-Labor Day was celebrated today in the traditional fashion of the Detroit labor movement, by a union parade down street of the city.

Something new was added this year, however, when the AFL paraded in the morning, with an estimated turnout of 25,000 members. In the afternoon, 40,000 CIO unionists marched in their respective local contingents, winding up in Cadallac Square where they were addressed by various CIO leaders.

CIO United Auto Workers Ford Local 600 brought out the largest local representation ever seen on Labor Day, when over 10,000 workers from the Ford Rouge plant filed past the reviewing stand.

Prominent among the Local 600 slogans were "For a Cost-Of-Living Bonus": "End Fascism": Wipe out the KKK": "Stop Lynching" and "Stop Production Speed-Ups."

The placards carried by UAW Briggs Local 212 placed particular emphasis on the slogan: Briggs Local Wants a Labor

Party — Do You?" The labor party issue was discussed by speakers on the reviewing stand, but only to denounce the progressive elements that a small minority of members who demand a labor party now. Treasurer, stated that a "third bulled out the old chestnut about Parade Held In pulled out the old chestnut about that "those who are for a third party now sabotage the workers

of the nation." Tracy Doll, president of the Michigan State CIO Council, blamed the political weakness of the working class, not on the bankrupt policies of the CIO-PAC which continues to throw its support to candidates of the two capitalist parties, but on the "they don't come out to vote.'

### STALINIST GAME

The Stalinists of course manipulate the policy of the ALP. They are playing the most deadly of political games - coalition politics with the capitalists. That is why the Daily Worker is opening up with all guns firing on the Republicans and wild shouts in favor of the Democrats.

How such politics pay off can already be seen. In the Democratic convention Mead got the greatest ovation of the gathering when, in obvious reference to his Stalinist cheering squad, he declared he would not accept one speck of support from any Fascist, any Communist or any member or friend of the Ku Klux

From Competition To Monopoly By V. Grey

We have stated the general law of constant capital, and particularly the machine. Constant capital produces no new value. It is merely transformed by the hand of labor into something else, thus preserving its original value in labor's creation of a greater one.

But when capitalism was young things seemed to be different. For the FIRST capitalist to get a particular machine coins money out of his advantage over his brother capitalists. His laborers can produce ten things where other laborers produce only one. As long as this rosy heaven remains for the first capitalist, the price of his product is still high.

When the other capitalists get the machine, the socially necessary amount of labor to make the product finally becomes only one-tenth of what it was. And the price drops way down.

This happened again and again in the palmy days of capitalism. As a result there were cheap goods for all. find-and they fail to mention There was constantly better machinery, better ways of doing things.

The 19th century was an age of progress mainly because of the race for machinery. There was great encouragement of inventions, engineering colleges, scientific research, popular education, and finally a greater degree

of PEACE in which to trade and grow rich. Most thinkers of the 19th century saw these advances and thought such progress on a capitalist basis was going to go on and on without any interruption. They thought the golden age of man had at last arrived. But Karl Marx, the real genius of the time, peered into his sociological

microscope and saw differently. "As the use of machinery becomes more general in a and a lot of militant workers particular industry, the social value of the product sinks down to its individual value. And the law that surplus value does not arise from the labor power replaced by the machinery, but from the labor power actually employed in working with the machinery, asserts itself. Surplus value arises from the variable capital alone (money spent

> for labor power). . .' Machinery and other constant capital was heaped up more and more, until it was no longer possible to discard an old machine for a new one so easily as before. Machines were too big now, and too expensive. It was a losing proposition for the capitalist to be on the side of progress.

> Moreover, the products of the machine were so cheapened by now that the machine couldn't be paid for in a short time, but only over a long period, as it reproduced its value gradually in its products.

> So the same capitalists who once had price-cutting 'wars" to drive each other out of business, now began to band together in monopolies to keep prices up-suppress new machinery, bury new inventions.

> But only the biggest banded together. They ran smaller capitalists out of business, and began to prevent new ones from starting up. But they solved their contradiction only to make it worse. Now they had super profits to re-invest. They expanded their production again (that is, they increased their constant capital). This led to ever fiercer struggles, and on a world scale.

> They conducted a world war to expand into markets of the world they did not yet control. But in the very process they expanded their productive capacity again. This means they must search for still more markets than they have yet won.

> Out of capitalist competition grew capitalist monopoly. And out of capitalist peace grew capitalist war. Next Week: The Struggle for Markets

# Identified Lynchers Still At Large

Survivor Of Louisiana Lynch Mob

## **Oil Swindle Motive Disclosed** In Louisiana Lynch Murder

For over two weeks, the FBI has known the names of 13 Louisiana white men, including three deputy sheriffs, who murdered John C. Jones, 28-year-old Negro veteran, and left for dead Albert Harris, Jr., 17-year-old Negro youth. Yet federal authorities®

questioned the lynch gang! This week the story of the blow-torch and meat-cleaver lynch murder grew even more sordid. Theft of oil rights once

owned by the grandfather of the two victims, emerged as a mand that the government stop killing which took place at Minden, Louisiana, on August 5. Albert Harris Sr., father of the

surviving youth, who accompanied him on the dangerous flight North, told his story to the National Association for the Advancement of Colored People. He revealed that many years

ago, oil had been discovered on the land of the boys' grandfather. Urge Defense The grandfather, now 76 years old, "leased" these oil wells to a Guards Against powerful oil syndicate. One of the wells still pours out thousands of barrels of oil, and for Race Terrorists this, the poverty-stricken old man receives \$1.50 a month. 'ODD' CIRCUMSTANCES

According to Mr. Harris, the circumstances under which the syndicate got the oil rights were write.

during the last century Douglass not only played a leading part, but he understood the logic of the fight against the slaveholders far more clearly than most of the statesmen of that time. including Lincoln.

While Lincoln sought to compromise with the slaveholders. Douglass realized that a revolution was coming and he advocated revolutionary methods. He saw that the Civil War meant the end of slavery, while the Northern politicians were trying to close their eyes to this question.

He understood that the Negro should and would be permitted to serve in the Army when the very idea of such a thing seemed ridiculous to the Northern government. He foresaw that emancipation would have to be accompanied by economic security or the freed Negro would still have a second-class status. In other words, he was not only a revolutionist, but a farsighted one.

What would Frederick Douglass be fighting for if he were alive today? One thing we can be certain of: he would be fighting to finish the job, that is, to secure complete equality for the Negro people. And he But the most remarkable part | would be fighting as a revolutionist.

A hundred years ago he collaborated with representatives of Northern capitalism against the slave-holders, because capitalism was still a progressive force. Today he would see that capitalism has degenerated and become a completely reactionary system, and among other things the chief prop of Jim Crow oppression. Douglass would now be fighting against

Diary Of A Steel Worker -

## If You Were A Negro . . .

- By Theodore Kovalesky -

We can read something and understand it without really feeling it, really KNOWING what it means. We can read about the lynchings in the South . . . and the North

... and the words we read may be only words. So let's look at it another way. Imagine, white brother reading this, that it is YOU.

You look back as far as you can. You were a kid on the farm, and folks were just folks. You played, you

went swimming and fishing with the white kids. You ran in the weeds and hollered and climbed trees and called everybody, naturally, by his first name. You romped and had a good time.

Then maybe one day you played a little too hard and knocked one of the white boys down. You did it without even meaning to, and you were sorry you made him skin his knee. Only, when he got up, he looked at you with mean angry eyes and called you, "Nigger!"

You fought with him. You made up again, but it wasn't the same. You grew older, and one day he said, "Jim, it's about time you start putting a handle to my name." You looked him in the eye, you remembered diving in the river together, hunting squirrel and possum together, stealing watermelons together from Mr. Dagget's. big farm. But you were older now. You knew the land and the customs, so when you saw him after that, you called him "Mister."

You grew up. You never voted. You watched the politicians come and go. You heard them talk "white supremacy" and taxes. You got used to things. (Southern moon and Southern breeze and a black, battered body swinging from a poplar branch, you got used to everything, no matter how you felt, you knew what was what.) The war came along, and they pushed you into the army. ("Boy, clean up those barracks." "Boy. get a pick and shovel and come along with me." That was pretty much like things at home, only here there was more food and

etter clothing.)
They packed you aboard a boat and shipped SWP Candidate you off to Europe. They told you to fight for democracy, to beat Hitler and his race-hating Nazis. You fought. You did your best, just as good as anybody, white or black.

On the boat coming back they packed you leven tighter. They mived you right in with the in even tighter. They mixed you right in with the white soldiers. In the bull sessions they talked about what happened to them in Normandy, and you told them how you got hit. They had their ribbons and battle stars. You had yours. They were men, and you were a man. Things would be different, somehow.

But things weren't different. They were the same. You got in the back of the bus where the "colored" sat. (You had helped lick the race-hating Nazis.) The driver went past your stop. When you protested, he called a cop.

"Smart nigger," the cop called you, and he hit you with his club. "Run off to Europe and forget how to behave" and he hit you again. "Please, I didn't mean any harm," you tried to plead, but he hit you again, and some watching white men laughed.

You were lucky. They didn't gouge your eyes out, didn't beat you to death or shoot you or burn or hang you like they did to some. They let you live so you could get your old overalls and go back to the fields. They just "reminded" you to remember your place,

Think it over, brother. Just suppose your skin were colored instead of white . . . and

## Who's For Free Speech?

Bu Grace Carlson

Anti-fascists throughout the country were undoubtedly inspired by the way 1,500 members of Minneapolis unions, veteran, Jewish, Negro

and other organizations successfully defended themselves against the followers of Gerald L. K. Smith and forced the cancellation of his scheduled fascist meeting

on Aug. 21. But the Minneapolis bosses were not inspired by it! And the Minneapolis daily press heaped abuse on the heads of the anti-fascists.

"Because a little mob of irresponsible citizens refused to let him exercise his constitutional rights of free speech and free assembly, Mr. Smith currently dons the robes of a martyr," say the editors of the Minneapolis Daily Times

After reading this plea for "free speech" for a fascist, I went through a complete file of the Daily Times for 1941 to see what they had said about "free speech" for the anti-fascist defendants in the Minneapolis Labor Case.

You won't find a single word of protest in this or any other Minneapolis daily paper about the violation of the "constitutional rights of free speech and free assembly" of the 29 leaders of Local 544-CIO and the Socialist Workers Party who were indicted under the infamous Smith "Gag Act" that year.

Instead, you will find a Times editorial on July 2, 1941 attacking the American Civil Liberties Union which, truly concerned about "constlutional rights" of free speech and free assembly" had entered the case on the side of

That this capitalist paper wants free speech for fascists and a gag rule for revolutionary socialists comes as no surprise to those of us who understand that fascism has its roots in the decaying capitalist system we are trying to replace. This doesn't mean that the Times is backing the fascist Smith. At present, a good section of American capitalism looks on Smithas a silly demagogue-like the German capitalists regarded Hitler in his early days.

In his book Fascism and Big Business Daniel Guerin tells why the German and Italian capitalists later had to turn to fascist demagogues. Guerin also offers some good advice on how to fight fascism when he quotes a speech of Hitler after the Nazis came to power: "Only one thing could have broken our movement-if the adversary had understood its principle and from the first day had smashed, with the most extreme brutality, the nucleus of our new move-

Minneapolis workers want to fight fascism and know how. They are not going to permit the capitalist papers to mislead them with hypocritical arguments about "free speech" for the fascists who want to destroy all democratic rights, including free speech.

## Showing Off Their War Profits

- By Ruth Benson -

Would you like to know where some of your money is going—the money you paid in taxes that the government gave to war profiteers?

It's buying the most fabulous clothes and extravagant trimmings in the world. Last week I walked along New York's famous Fifth Avenue, to see what they're really like.

Once just any mink coat

would do to prove one's wealth. But no billionaire's wife would be satisfied with

that today! For her, there are new kinds, specially bred to get attention; a Hollywood-platinum-blonde mink, and a "white blaze" mink which has distinctive stripes.

For warm fall days there are "simple" suits banded with blonde mink-\$540. A blouse to go with it, handwoven from yards and yards of ribbon is \$95. A light fall coat, with just a touch of Persian lamb, is studded with rhinestones to make it less common. That was cheap-\$395.

Of course you'd expect her to wear fancy hats. They're huge, wide, and weird; whether felt, fur, or feathers, they're likely to have sequins and rhinestones, too. But did you know that even her garters-costly copies of the kind Woolworth's sold in flapper days—have sequins and beads?

And when she rests at home, Mrs. du Pont or Mrs. Rockefeller can lounge in a \$145 slack suit, also dotted with sequins, while she eats \$5-a-pound chocolates, or smokes cigarettes in a pure gold holder.

Her children are equally pampered. I saw a white dotted swiss dress, size two, hand made and embroidered. Only \$39.75. And a white satin blouse and shorts for a year-old boy, at \$42.50. Can't you imagine them all at dinner, with a table covered in Italian lace—at \$1,049?

Maybe it's because I'm a woman, that all this window shopping made me decide to do some of the real thing. I left Fifth Avenue and went to an "ordinary" department store. All I wanted was a pair of shoes to wear every day in the week; black leather, with closed toes and heels. There weren't any, of course.

That's what the "luxury market" really means -finery for the rich, and almost nothing for the working people. The manufacturers won't make practical things for us to use, when the parasites are buying finery to show off their

## An Indictment Of The ICC

-By G. Gustafsen

The July issue of The Railroad Trainman, personal organ of A. F. Whitney, president of the Brotherhood of Railroad Trainmen, contained an article which

is a damning indictment of the Interstate Commerce Commission.

This federal agency for 26 years has had the authority to force the carriers to install safety de-These safety devices.

vices could have prevented thousands of railroad accidents and tremendous loss of life. Whitney is finally forced to expose the re-

cord of the ICC. He shows that it has acted actually as an agency of the carriers to safeguard their profits and cover up their criminal negligence in this mass murder of railroad workers and passengers.

One of the principal hazards confronting train operation is lack of adequate protection to a train that stops or slows down on the main line. For the past 70 years automatic block signals have been in use. Yet today, according to the article, 100,000 miles of high-speed passenger track have no automatic block. In one year, 1934, there were 19 major train collisions

attributable to lack of adequate block system, In these days of high-speed trains, automatic block signals are not enough protection. Automatic train control, which eliminates the human factor in safe railroading, is the answer, But even today only about five per cent of passenger track is so equipped.

In a three year period (1925 to 1928), 203 people died and 2,025 were injured through failure of the ICC to force the carriers to install this equipment.

Lack of electrically-operated switch locks, and lack of adequate signal protection for open drawbridges still cause wrecks.

The callous disregard for the lives of passengers by the carriers and the ICC is only surpassed by their lack of interest in the safety of the railroad workers.

Over half the freight cars in interchange are equipped with a type of air brake condemned

by the ICC itself back in 1924. Although the BRT has been negotiating with the railroads since 1938 for the universal installation of safety running boards on the tops of box cars, the vast majority are of a type that become very slippery and dangerous when covered with ice and snow.

Successful automatic steam and air pipe couplings have been developed; yet the steam and air couplings now in use necessitate carmen or trainmen getting down between the cars to make these couplings. 550 trainmen were killed and 969 injured between 1940 and 1944 in coupling and uncoupling operations.

Whitney's article proves conclusively that the Interstate Commerce Commission acts to safeguard the profits of the carrier and "to delay and impede every technological advance.

Washington State SWP Election Campaign Shifts Into High Gear With Seattle Rally

## In Jersey Asks Sylvia Blecker

NEWARK, N. J., Sept. 6-Alan Kohlman, Socialist Workers Party candidate for Governor, today endorsed the demand for immediate calling of a special session of the New Jersey Legislature on housing. She plunged into educational He scored Governor Edge's obstinate refusal to call such a

"Governor Edge has declared session until somebody presents means he has no program. This ack of a housing program is a League. clear-cut confession of the pankruptcy of the Edge administration on the vital housing matter.

"The Governor's position is worsened when one recalls that as far back as August, 1945, CIO State President Holderman requested a special session to deal with housing, price and rent control. The Governor spurned

BOAST FAILS

"Moreover, the Governor's lack of a program is in distinct contradiction to his boast made in a press interview on December 30, 1945, when he recalled the housing shortage and rent increases of 1919, and declared: 'I (Edge) do not intend to stand by and permit that to happen again in New Jersey.'

"However, that is precisely what Edge has done: He has stood by and permitted a most serious housing crisis to worsen without taking a single serious step, despite his pledged word, to do anything about it.

"The Socialist Workers Party annual federal appropriation for low-cost housing. In addition, we are now formulating speciaction by the much-needed special session. It is up to the veteran and labor organizations to compel Edge to call such a ses-

## **Seattle SWP Candidate Backs** Seamen's Strike

ate, today issued the following statement in support of the seamen's grievances against the Wage Stabilization Board.

"I wholeheartedly support the strike of the AFL seamen. In a viciously unfair decision the Wage Stabilization Board seeks to deprive the seamen of a large portion of the \$22.50 monthly increase that their unions won in negotiations with the shipowners. I urge all workers in the State of Washington to help the seamen's struggle to the utmost.

"The SUP-SIU has already made it clear that the main issue involved in the strike is the WSB's attack upon labor's right to bargain collectively. By this attack, the Truman administration shows once again that its real policy is to prevent the unions from defending the workers' standard of living.

"The seamen's unions by their strike are fighting the battle of all organized labor. As an act of solidarity with the seamen, the AFL and CIO should immediately withdraw their representatives from the WSB.

"If I am elected to the U. S. Senate, I will introduce legislation to abolish the WSB and any other agency created to deprive organized labor of its right of collective bargaining."

SOCIALIST WORKERS PARTY

### Candidate for Attorney-General, New York State

Sylvia Blecker has a long and militant record of working class activity and leadership. Born in Russia in 1901, she was brought to the United States by her par-

and political activity among the immigrant Jewish population in Harlem. The educational clubs that he is opposed to a special which she helped to form during this period were later transa workable program. This formed into working class political units. They became the self-confessed admission of a base for the Young Communist As a young woman Sylvia

Blecker entered the millinery industry, which employed close to 10,000 unorganized women. With energy and vision she began the task of organizing these unorganized. "If I am elected to the U.S. Senate," he said, "I would immediately introduce legislation to take the war-making powers away from Congress and place them squarely in the hands of the people. The working class wants no more wars between rival bandits. The work-

time-worn slogans of the capital- warding election campaign.

DANIEL ROBERTS

ists are falling on deaf ears as the workers, especially the Negro workers, awaken to the true

Recounting many of his rich xperiences in the labor, electoral and socialist arenas in the light of the struggle for socialism, Charles Taylor pointed out the tremendous opportunity offered by an election campaign to spread revolutionary slogans and principles.

"While nothing short of a thorough social revolution can eradicate the roots of capitalism," he stated, "labor's candidates in Congress can function very effectively both in blocking reactionary legislation and utilizing to the fullest extent the broad avenues of propaganda available to members of legislative bodies."

Taylor emphasized the fact that socialism is not mere "wishful thinking" but "an historical of degenerate capitalist imperialism just as capitalism itself arose to replace shattered feudal society."

Campaign Manager Kaye stressed the need for active parwishes are not enough," she stated. "In order to conduct an extensive and successful campaign, we must have the material means -both in money and manpower -necessary to lift our activity from the literary to the active doorbell-ringing plane."

Master of Ceremonies Black closed the program by urging all present to work to elect Trotskyist candidates as the only method of exposing the lies and hyprocisy of the ruling boss class.

# Our Program:

1. Defend labor's standard of living!

A sliding scale of wages—an escalator wage clause in all union contracts to provide automatic wage increases to meet the rising cost of living! Organize mass consumers committees for independent action against profiteering and price-gouging! Expropriate the food trusts! Operate them under workers' control!

2. Full employment and job security for all workers and veterans!

For the 6-hour day, 30-hour week! A sliding scale of hours—reduce the hours of work with no reduction in pay to prevent layoffs and unemployment! Government operation of all idle plants under workers' control! Unemployment insurance equal to trade union wages for workers and vererans

during the entire period of unemployment! 3. Against all anti-labor laws and government strikebreaking! No restrictions on the right to strike and picket!

4. Build an independent labor party!

5. Tax the rich, not the poor!

Repeal the payroll tax! No sales taxes! No taxes on incomes under \$5,000 a year!

No injunctions! No compulsory arbitration!

6. An 18 billion dollar appropriation for government low-rent housing!

7. Full equality for Negroes and national minorities!

End Jim-Crow! End Anti-Semitism!

8. For a veterans' organization sponsored by the trade unions!

9. A working class answer to capitalist militarism and war. Take the war-making powers away from Congress! Let the people vote on the question of war or peace!

Against capitalist conscription! Abolish the officer caste system! Full democratic rights in the armed forces! Trade union wages for the armed forces!

Military training of workers, financed by the government, but under control of the trade unions!

10. Solidarity with the revolutionary struggles of the workers in all lands! For the complete independence of the colonial peoples!

Withdraw all American troops from foreign soil! 11. For a Workers' and Farmers' Government!
