# Taft's Victory Shows Folly Of Depending on Democrats

By Art Preis

With the Senate's rejection of Truman's "compromise" labor bill and its adoption of Taft's 28 "improvements" on the Taft-Hartley Act, the Democratic Party's pledge to repeal the Slave Labor Law has

gone up in smoke. The Trumanites have given up even the pretense of a fight, promising only to return to the issue-in two years. Thus, so far as the workers are concerned, the Democratic triumph of last November has gained them nothing. The outcome of the Taft-

Hartley fight climaxes the swift and utter rout of the Democrats in the 81st Congress-a Congress in which they are the majority. This fact alone should call for the most sober re-evaluation by the union leaders of their present political policies and their projection of a fresh and bold program as the next step for organized labor.

Unfortunately, both the AFL and CIO leaders have responded to the greatest blow dealt labor by the 81st Congress with the same old routine answers. They show they have learned nothing from the devastating experiences of the past weeks and monthsand, indeed, that they don't want by union leaders like Murray

in America? The answer is clearly indicated in a survey recently sent newspaper executives by the Bureau of Advertising, an offshoot of the American Newspaper Publishers Association. The survey revealed that newspaper revenues from advertising rose to \$389,261,000 in 1948, an increase of \$32,000,000 over the previous year. Most of the advertising revenue, major source of newspaper profits, comes from big business firms. Advertising took 60% of newspaper space last year. # FACTS

Do you want the facts about growing unemployment? The Truman depression? The threat of a third World War? Inside happenings in the labor movement? Rising indignation over the witch-hunt and "loyalty" purge? Get the facts in The Militant! America's leading socialist weekly gives you the straight, ungarbled facts about events of vital importance to every working man and woman.

Facts are important. But facts must be correctly interpreted to yield the general truths from which long-range trends can be charted and the future predicted. In this, The Militant has no equal in America. Using the Marxist method, the most powerful tool of thought yet devised, The Militant sifts the raw facts, assesses them, ties them together and fits them into their proper place in the pattern of world history. The Militant helps you to see the big things looming ahead. It offers a program and a course of action designed to help labor open a way to a world of enduring peace, boundless plenty and the brotherhood of man.

"Benefits" of the Marshall Plan

When the first news came of a plan supposed to aid Germany and other nations economically during their period of reconstruction, the German Social Democrats

and the trade union bureaucrats 3 rushed to proclaim that this plan was originated by American trade forces with a view to belging the others, are now being circulated. war-devastated European counnies. And the majority of the German workers believed that the economic erisis in their country would soon come to an end.

Before the currency reform was instituted, the daily rations still remained around 1300 - 1500 calor'es a day. "Let us wait a little bit," urged the reformist to be raised by the working class, "the ERP has to be applied more time." And the people did wait a little, till the currency reform was "made" under the aegis of the ERP. On the day the Allied governors issued the law, the bureaucrats joined with the capitalist parties in a common horus of how rosy the outlook ow was for the working people.

Brauer, Mayor of Hamburg, formerly advisor to Chiang Kaimember of the AFL, declared: "The German working class now has the possibility of earning money which has a real value. bright, O'Conor and Tydings. the Trumanites, the least they Our economy will function better and better. Ahead is a new period of work, of fruitful work, for all those who wish to work."

A month later the German labor bureaucracy was shouting: "The currency reform was an attempt of the capitalists to load the war debts on the backs of the workers." This is true. But why didn't they say it when the currency reform was still only something the ruling class dreamed about? Nobody can claim that the top leaders of German labor did not know about it in advance. Herbert Kriedeman, Social Democratic member of a threeman committee, the first official German body to which the secret was revealed, issued no protest leads only to the strengthening at the time. During this period prices continued to climb and with them known Wallaceites as O. John un onists and other progressive the profits of the capitalist class. Wages did not rise, but in some cases actually fell. The class antagonisms become more and more apparent and wage struggles in entire industries shook the nation. The reformist leaders were forced to do something, once the masses began to clamor. They called for a 24-hour strike throughout Western Germany and staged demonstrations in some leaders, when questions started cities, but they did not call for revolutionary action by the German proletariat. They published and therefore they need a little some radical-sounding articles in their papers, as the AFL and CIO do in America, but in reality hey just sat doing nothing. But his was not the end of the events which started with the ERP conference in Paris. Ninety-five per cent of all Ger-

nan towns with 50,000 inhabitants and over have been destroved by the bombs of the liberators." 13,000,000 people from east of the "Oder-Neissenlinie" have been crammed into what is left of Germany. For these reasons we Germans need to build houses, houses and more houses. Unemployment, nevertheless, has meanwhile arisen. Any thinking man will understand that in a country like America, under capitalism, unemployment is unavoidable, but such a situation in devastated Germany cannot fail to be viewed as bitterly ironic and insufferable.

The trade union leaders declared that unemployment would be of limited duration. That was in January. Now, in May, unemployment is greater than ever. In my town, Goettingen, for instance, 5,000 out of 30,000 workers have no jobs. In the neighboring district unemployment is as widespread as it was in the great depression of 1930-33. Prices remain so steep that many workers cannot buy their rations, which are still rather low (2,000 calories per man per day).

In brief, this is how the German proletariat has benefitted at all about the source of all Then Germany will once again these developments, the Marshall | become the key to the European Plan, which they still supported. situation.

In the capitalist states the most monstrous forms of bureaucratism are to be observed precisely in the trade unions. . . It is thanks to this that the whole structure of capitalism now stands upright, above all in Europe and especially in England. If there were not a bureaucracy of the trade unions, then the police, the army, the courts, the lords, the monarchy would appear before the proletarian masses as nothing but pitiful and ridiculous playthings. The bureaucracy of the trade unions is the backbone of British imperialism.

-Leon Trotsky, "Communism and Syndicalism," 1929.

#### Labor Internationalism

Two rival "world gatherings" were recently held in Europe in the name of "labor internationalism." One was sponsored by the Kremlin; the other was inspired by the U.S. State Department. Both were travesties on genuine working class internationalism.

In Milan, Italy, 450 hand-picked Stalinists met in the second congress of the World Federation of Trade Unionists to mobilize European labor behind the current power-moves of the Moscow totalitarians. At the same time, AFL and CIO spokesmen were holding the spotlight at a preparatory conference in Geneva, Switzerland, to set up a "new anti-Communist international trade union organization" with the sole aim of supporting American imperialism in its cold war against the Soviet Union.

Not an iota of international labor solidarity nor of concern for the interests of world labor motivated either body. They represented, within the world labor movement, the extension of the conflict between the two leading world powers and its enslavement of the working class to the one or the other.

At the behest of Moscow and Washington, the present rival labor bureaucracies had cooperated during the war to rally international labor behind the alliance of the Soviet Union and the "democratic" imperialists. The CIO and the British union leaders had then united with the Stalinists to form the WFTU. Then, in the name of "international labor solidarity," they strove jointly to mobilize the workers into the camp of American and British imperialism.

Now these recent allies are trying to divide world labor along the post-war lines of world power politics. They are no more inspired by sentiments of "labor internationalism" than when they joined forces during the war to betray labor.

It is ironic to see the AFL and CIO working so harmoniously together in Geneva to foster a "new international trade union body" when they have failed to join forces to defend the most elementary interests of the workers in their own country. These bureaucrats make no move toward joint labor action in this country even after the terrible blow which the Senate struck the American workers last week on Taft-Hartley. Can we then believe their new "labor internationalism" is concerned in the slightest with the real needs of the workers abroad?

When Karl Marx and Frederich Engels 101 years ago issued their clarion call, "Workers of the World, Unite!," they sought the organized unity of the international working class against all its exploiters and oppressors. They preached the complete independence of the labor movement in unremitting international struggle against the capitalist ruling classes everywhere.

What the present-day labor servitors of imperialism or Stalinism offer is a foul and criminal perversion of the working class internationalism taught by Marx and Engels and their great disciples like Lenin, Trotsky and Debs.

### The 30-Hour Week Demand

Everybody knows that joblessness is no mere threat today. For many, all too many, millions it is now the terrible

Official government figures for June set a 7-year high in unemployment. It is a public secret that the liars in Washington habitually underplay the actual number of jobless.

Both the AFL and the CIO have publicly made this charge time and again. When Washington itself is compelled to admit that the number of unemployed is close to the four million mark, only a very foolish individual would be inclined to minimize the actual extent of unemployment.

Most of the official union leaders can hardly be classified as fools, notwithstanding their lightminded conduct in instance after instance. Yet they persist not alone in themselves minimizing the unemployment problem but in ignoring it in practice.

In one major industry after another in steel, auto, rubber and others — union contracts are now up for negotiation.

Nevertheless, conspicuous by its absence is the demand for the institution of the 30-hour week with no reduction

This is one of the most effective immediate remedies that labor is able to take in order to halt the spread of joblessness. Our labor movement has learned this lesson from the bitter experience of the Thirties.

This legitimate and realistic and indispensable demand has been adopted for years by unions in both the AFL and the CIO, from the most progressive to some of the most conservative.

Yet we find today complete silence on this score among the top union officialdom. While union contracts are being negotiated, they are not even offering lipservice to the demand for the 30-hr week.

What are they waiting for? The number of jobless is increasing, not decreasing. This weakens and not strengthens the position of the unions.

When is there a better time for advancing such a demand if not in the days when union contracts are up for negotiation? When will they be ready to fight for vital demands like this one, if they refuse to do it under relatively favorable conditions?

## Let the People Decide

As the Senate opened debate on the North Atlantic Pact, no one doubted that this greatest military alliance in history would get rubber-stamp approval. The Senate discussion, as almost every newspaper conceded, would be a mere formality. The accent was on speed.

Democrats and Republicans are in accord on this treaty to commit this country to war whenever Washington finds the pretext of "aggression" against any of its pact partners. There may be some token opposition from a few old isolationist elements. But no one expects their tired voices to be heard above the flood of rampant imperialist oratory.

Hypocrisy has keynoted the speeches for the pact from the start of the Senate discussion. Senator Tom Connally, in the opening speech, blandly claimed that the pact was "not directed against the Soviet Union nor its satellites" but was "aimed only against aggression and war."

How peculiar that this pact "aimed only against aggression and war" contains among its signatories the Netherlands government freshly-drenched in the blood of the Indonesian people and the French rulers who are scouring the independence fighters of Indo-China with bullets and

This pact is designed for war. It aims to establish Western Europe as a military bastion. It would permit the administration, through the president, to launch military operations anywhere at any time. What the Senate is preparing to rush through, in reality, is a decision to thrust the world into another blood bath whenever American Business and its agents in Washington think the time is

But those who will fight and die in the war which the pact will prepare have had no voice on the matter. The American people have never been consulted on the pact or any of the other war preparations. The imperialist ruling class fears their voice.

If the people have the power to decide the question of war or peace, they will never let the war-makers have their way. That is why we say, "Take the war-making powers away from the White House and Congress. Let the people vote on war or peace!"

# Press Comment on Civil Rights Controversy

# **Justice--for Some**<sup>2</sup>

From An Editorial in June 30 N. Y. Post

We are sure this republic can survive without government isuance of a "subversive" list. The Justice Department's inclusion of organizations on that list without even the formality of a hearing renders the whole business even more intolerable. We intend to keep on saying so until Attorney General Clark abandons the practice. The procedure invites unfair, high-handed decree. It is also superfluous. For Communist-front organizations have long ago mastered the art of exposing themselves.

The so-called Civil Rights Congress, which held a pep-rally in Madison Square Garden the other evening, dramatically illustrates the point... Last weekend the New York State division of the Civil Rights Congress held a conference to approve all the current resolutions in the current Communist book. Things were proceeding with militant monotony until an unexpected inter-Socialist Workers Party rather than Stalin as the true leading Trotskyites and the "disloyalty" ouster of James Kutcher ties. from his Veterans Administration post. Our country, like the rest of the capitalist world, is under the virtually complete domination of giant monopolies. And monopoly capitalism, a senile social order in acute stages of decay, does not possess the recuperative powers of capitalism in its youth. Every set of economic difficulties tends to become more and more malignant.

It must never be forgotten that the "recession" at home cannot be isolated from what is happening abroad. It is only a component part of something bigger. The U.S., huge as it is, remains but a part of world capitalism.

In the meantime, the world economic situation has been deteriorating at an even faster rate than in this country.

The World Economic Report just issued by the United Nations discloses that there has been a world-wide decline of production and growth of unemployment in the first quarter of this year. U.S. economy then stood at much higher levels than it does today. The world slump has unquestionably worsened in the interval.

Such developments are not only cumulative but reciprocal. What happens in foreign capitalist countries has its repercussions here, and vice versa. This is bound to aggravate conditions in every country, in the first instance in America, the largest single sector of world capitalism.

Conditions in Western Europe have been going from bad to worse. The Benelux countries, which appeared to be the best off, find themselves in a blind-alley.

Britain, the second largest sector of world capitalism, is tottering on the brink of bankruptcy, amid declining foreign and domestic trade and production.

a whole will decline still lower, hitting, first and foremost, the U.S. and Canadian economies.

The dollars thus "saved" may temporarily postpone the day of reckoning but cannot avert it. A currency crisis is now engulfing the fiscal system not alone of Britain but of virtually the whole of Western Europe. Finland's devaluation of her currency by 171/2% is only the most recent

The French are pressing for a greatly stepped up Marshall Aid program. The American imperialists, themselves faced with budgetary deficits, are deaf to these and similar pleas. They are instead seeking to beat down their European satellites with the weapon of the allpowerful dollar. They want currency devaluation abroad, particularly that of the English pound.

Britain's growing difficulies may easily precipitate a world currency crisis before the summer

And this, coupled with deepening economic convulsions here and abroad, may well lead to calamities on a scale expected and foreseen by

## They Want War

By Joseph Keller -

Echoing the more rabidly jingo press like Hearst and Scripps-Howard, the AFL top moguls are demanding all-out U.S. aid to the doomed military dictatorship of Chiang Kai-shek, butcher of the Chinese people.

This demand was voiced on July 4 through the AFL's so-called Free Trade Union Committee. The FTUC represents the AFL on international affairs and includes William Green as honorary president, with Matthew Woll, David Dubinsky and Jay Lovestone as its active guiding lights. While all the more responsible and sober

circles of American imperialism have marked Chiang's regime off the books, the AFL bigwigs call hysterically for the most intensive American intervention in China to try to save Chiang's rule from the merciless retribution of

The FTUC clamors for "no recognition, trade with or economic assistance to the Communist forces in China," full immediate aid to the Nationalists "under the careful supervision of American military and economic authorities" and for American missions, including military, to aid the Chinese in defending their homeland, in furthering democracy and free trade unionism, and in bettering their living and working conditions."

To talk about "furthering democracy and free trade unionism" through the Nationalist regime is to dwell in sheer fantasy. Chiang rose to power on the bones of the Chinese labor movement. He wiped the Chinese unions out in blood, slaughtering workers by the hundreds of thousands.

As for democracy even in a strictly parlia-

China. Chiang ruled by force of arms through a tiny clique of corrupt war-lords, bankers and other capitalists. His armies were built by seizing peasants and marching them off in chains.

It is not out of sympathy for the frightful sufferings of the Chinese people under Chiang that American imperialism now refuses to aid him any longer. It is the recognition that his regime is so corrupt and rotten, so incompetent and unstable, that to send it any more dollars and supplies would be pouring them down a rat-hole in which billions upon billions of U.S. dollars had already vanished.

The Chiang regime collapsed primarily from sheer inner rot. Its graft, depradations and wholesale robbery brought China to economic ruin. Its conscript-slave army deserted by the hundreds of thousands. That is why the Stalinist army was able to triumph.

China is not Greece. The Stalinists command hundreds of thousands of experienced troops. To drive them back, the American imperialists know, would mean nothing less than full-scale U.S. military intervention and war.

Woll, Dubinsky and Lovestone well understand this, as they likewise know the foul dictatorial pattern of Chiang's rule. Thus, what they are demanding, in effect, is that this country dispatch an American army to China to restore Chiang's totalitarian domination. These criminal elements, who profess to speak in the name of American labor, want to send American boys to fight and die on Chinese soil to reestablish a "democracy" and "free trade unions" that never existed outside

# A Catholic Answers Spellman

Cardinal Spellman was not speaking for all Catholics when he demanded that the U.S. Treasury finance Catholic schools and denounced Representative Graham Barden as a "disciple of biogotry" for his federal-aid-to-education bill which provides that federal funds shall be used only for public education.

Representative Andrew Jacobs of Indianapolis, a devout Catholic and member of the House Education and Labor Committee of which Barden is chairman, said in a statement to Catholic laymen that a great many Catholics are opposed to Spellman's action. Answering Spellman's claim that denial of public funds to parochial schools was "discrimination" against Catholic children; Rep. Jacobs said:

"As long as we have the same right to send our children to public schools as anyone else we are not discriminated against. And as Catholics we do not have the right to a separate, publicly supported school system, nor does any other group of people have such right.

"Whatever can be constitutionally done to aid a child will win my support. However, I cannot and will not support any measure that grants public financial aid to private or parochial

"We have the right to build and maintain our churches," the Indiana Democrat said, "but not to build or maintain them with public funds. Our parochial schools are an adjunct of our religion, established for educational use instead

of public schools, solely for the sake of the child's religious training,

"The issue is clear. Either you keep parochial schools and maintain them or take public funds and convert them into public schools, and they will then no longer serve the religious purposes for which they were established." for which they were established."

The Roman Catholic hierarchy, headed by Cardinal Spellman, has joined with the most reactionary big business elements in attacking federal aid to education because their demand for special privilege has not been granted. In what was obviously a face-saving formula for the faction led by NMU President Joseph Curran, the referendum was declared null and void because of "irregularities" in the voting.

The yellow-dog amendments were devised, in part, to insure the Curran faction a decisive majority at the convention. They were intended to create an atmosphere of witch - hunting hysteria in which the Curran group could concentrate autocratic power in its hands.
