FLINT, June 9 - General Motors workers have concluded tion-wide radio networks, the the formality of ratifying the new tive-year contract. In spite of prevailing dissatisfaction with the pact, fear of repeating the experience of the 100-day Chrysler strike and its meager concessions made it virtually certain that the GM ranks would not reject the agreement.

Almost all the CIO United Auto Workers local leaders who had fought against the contract in the national GM conference recomnended its acceptance in their and the American Broadcasting lecals after warning the members of the serious pitfalls in the agreement. These officers felt that it would take time for the membership to understand the full consequences of the pact and that the main fight had been waged in

Nevertheless a number of locals ejected the contract. They represented a small portion of the GM membership. But one cannot conclude from this that there was general acceptance of Reuther's agreement. The true picture was seen at the national conference where a forthright fight was made and a fourth of the delegates voted for rejection.

Mountain Spring Camp, sitnated in the foothills of the Pocono Mountains near Washington, New Jersey, opened its summer season on June 10 with a large and enthusiastic group of campers taking full advantage of the improved vacation facilities.

Most popular feature with the guests at the camp was the swimming pond, now brimming over with fresh spring water pouring into the pond at the rate of 1,000 gallons per hour. The constant flow of spring water into the pond through a pipe line from the well makes swimming a refreshing experience at the Mountain Spring Camp. Warmed by the sun. the temperature of the water ranges between 65 and 75 degrees, which makes for ideal bathing and

A number of contributions came in from friends and readers of The Militant, bringing the "General" quota up to 60%.

Two very old friends in Eastern Pennsylvania sent in \$5; a reader in Oregon who wishes to remain anonymous contributed \$2: B. A. of San Gabriel, Calif., renewed his Militant subscription for one year and sent \$8 for the fund; R. E. McK. of Chicago contributed \$5.

H. A. of Chicago writes that he is "well aware" that The Militant is not an ordinary paper, but that it is the one weekly in America that is wholeheartedly devoted to bringing an early close to this blood-drenched epoch of capitalism and opening up the new era of peace, plenty and progress that is possible under socialism. "After I am through reading The Militant I leave it in the streetcar or the bus, and most of the time I see people pick it up and take it along with them. I appreciate very much the good work The Militant is doing, so enclosed you will find \$5."

The contributions this week indicate that the campaign is beginning to roll. Up to June 13, friends of The Militant and branches of the Socialist Workers Party contributed \$5,492. which is 55% of the national quota. Despite this excellent showing, however, the campaign is by everyone to finish on schedule July 15. Let's get going!

A strike in one plant today could curtail production but not stop it entirely in a division.

GM workers can strike over production standards, but they must overcome two big obstacles. A successful strike must be large enough to effect a shutdown of production. And then, they must hurdle the infamous waiver clause that has been written into the contract. In this clause the union bureaucracy ceded to the corporation the right to bargain on any issue now foreseen or unforeseethle for the next five years.

#### 'New Leader' on GM Pact-Acute Case of Stalinophobia strikes.

Stalinophobic delirium in its most acute form is displayed in the comments of the Social-Democratic New Leader on the General Motors five-year contract with the auto workers. Hailing the pact as evidence of the "stability" of U. "Disarmament is not a means against war, since, as the experience of Germany itself shows, episodic disarmament is only a stage on the road to new rearmament. The possibility of new and very rapid re-armament is inherent in modern industrial technique. 'General' disarmament, even if it could be realized, would only mean the strengthening of the military superiority of the more powerful industrial countries. Fifty percent disarmament' is not the road to complete disarmament but to absolute 100% rearmament. To present disarmament as 'the only means to prevent war' is to mislead the workers for the sake of a common front with petty-bourgeois

LENIN

### The Stalinist "Peace" Campaign

The Stalinists are whooping up another of their "peace" campaigns. They have drafted a two-point "World Peace Pledge" and announced they will seek five million signers to this pledge in the United States. It calls for "unconditional prohibition of the atomic weapon" with "strict international control" and vows to "regard as a war criminal that government which first uses the atomic weapon."

No doubt a lot of sincere people will sign this pledge to express their opposition to war. But they will be deluding themselves if they think that by doing so they are thereby helping to halt war.

There is no notion more misleading than "disarmament" as the way to prevent war. Arms are but the means for waging war, not its cause. If the cause for war did not exist, there would be no arms and armies in the first place.

That cause is, and has been for a long time, the capitalist drive for world markets, new fields for profitable capital investment, sources of raw materials and cheap labor. Truman might sign a thousand "disarmament" pacts with Stalin or anyone else - but that would not solve the inherent contradictions of the American profit system. It would not halt capitalism's compulsion to save itself from internal crisis and collapse by eliminating all rivals and competitors, grabbing all markets and controlling all economic resources, and forcing all peoples to pay tribute to Wall Street.

But what if Washington ignores the disarmament petitions? Will the Stalinists then drive for ten million signatures? The modern mass production system can provide enough wastepaper baskets to accommodate all the petitions the Stalinists can muster.

Besides, the imperialists themselves are not averse to "disarmament" talk, when they think it expedient. It helps them to pose as "peace-lovers" who are driven to war only because the "enemy" is an "aggressor" who refuses to agree to "real" "fool-proof" "unconditional prohibition" and "strict international control" of atomic and other war weapons.

In the final analysis, pacifism is an aid to the imperialist war-makers, not a hindrance. It disorients the people, misleads them as to the true cause of imperialist war. When the pacifists' vapid schemes for "peace by petition" and "disarmament" collapse, they will have left as the bombs descend only the cold comfort of being able-but not out loud-to dub the "government which first uses the atomic weapon" as a "war criminal."

Accomplices of the war criminals are those, like the Stalinists, who spread pacifist illusions and disorient the real fight against war — the fight for international socialism that will end capitalist wars by ending capitalism.

### GM President Praises "The Boys"

Charles E. Wilson, president of General Motors, on June 8 told the National Press Club in Washington why his corporation is so tickled with the five-year no-reopening contract signed by President Walter Reuther of the CIO United Automobile Workers.

That contract was hailed by Reuther as "revolutionary" because it allows for an annual four-cent an hour increase in wage rates for five years as an "improvement factor." Wilson described it merely as "unique.'

What is particularly "unique" about the contract, Wilson explained, is that "both parties completely accept the principle of progress" in boosting output. Translated into their real meaning, Wilson's words reveal that Reuther and his lieutenants have agreed to help push the speed-up in GM in return for their 4-cent per hour "improvement factor." For this, said Wilson, "the boys deserve a lot of credit."

He explained more specifically why "the boys" deserve a "lot of credit." With that kind of cooperation from the UAW leaders, he said, "General Motors expects to exceed the average gains in productivity rate achieved by American industry in the last fifty years."

He pointed out that the annual wage rise of 4 cents an hour is 21/2% of the average rate paid under the old contract. Each additional 4-cents added annually will therefore be less than 21/3% of the cumulative wage. But General Motors expects, with the cooperation of the Reutherite leaders, to get a lot more than a 21/2% annual increase in man-hour output from the workers. Wilson explained:

"Many people think it (the 4-cent raise) was arrived at based on what we expect or can achieve in General Motors. That is not so. The 21/2 per cent annual improvement factor is somewhat less than the nation's manufacturers have been able to achieve in the last fifty years. . . . Of course, we hope to do better ourselves."

Thus Wilson discloses the "improvement factor" will be "somewhat less" for workers' wages than for GM's production per man-hour in the next five years. How much less, he did not say. But there is talk that GM this year expects to clean up a net profit of a billion dollars, 55% higher than its world record take in 1949.

There is one "improvement factor" that Reuther's contract doesn't reckon with. General Motors, as Wilson shows, is going to produce the same or greater amount with fewer workers. This means that a lot of GM workers are going to be "improved" right out of their jobs. There's nothing "revolutionary" about that. Capitalism has been doing that for a long time - but not always with the open cooperation of union leaders.

#### Help The Militant Fund

With the government piling up the war debt and going in for deficit spending, the inflationary pressure continues and costs keep going up. This aggravates the financial problems of a working class paper like The Militant, which needs \$10,000 in addition to its regular income to be able to appear regularly every week for the rest of the year.

We don't like to follow the government's bad example and go in for deficit spending. Piling up debt is an unhealthy sign - in fact, it's one of the reasons we say capitalism is on the skids. Up to now we've been paying our obligations cash on the line and we want to continue.

We can't and won't do what the capitalist newspapers do when they need more money. We're not a "good risk" to the bankers and can't borrow. We're fighting the corporations tooth and nail, so we won't take advertising subsidies, even if we could get them.

We just have to depend, as in the past, on the support of the people - the workers - who read The Militant, who like what it says and want to see its message continue to be published and circulated to an ever broader public. It is to the workers who make up the bulk of our readers that we must appeal for aid in raising the \$10,000 special fund.

The next few months are especially important because of the congressional election campaign. We want to use this period as a special opportunity to advance the ideas and program of socialism.

Most of the \$10,000 fund is being raised by the branches of the Socialist Workers Party through contributions of members and friends. But there are many readers, we are sure, who have not been approached through the SWP and who would like to contribute their share to help the only paper that speaks for international socialism.

We invite and urge you to send your contributions to the fund. The address is: The Militant, 116 University Place, New York 3, N. Y.

TWO INTERPRETATIONS

The victory in China is no longer interpreted the same way in Moscow as in Peking. ### 1: The Heritage of Backwardness [The author recently visited Yugoslavia as a representative of the Ceylon trade union movement.]

The center of attention today in the world working class movement for socialism is Yugoslavia, and therefore the processes of development in Yugoslavia are very significant for the internationwhich up to now has been re- exploitation, being economically al revolutionary movement. Today there is a powerful blast of propaganda directed against Yugoslavia by the Kremlin apparatus and its Communist Party servitors all over the world. If the genuinely revolutionary forces do not rally to the defense of Yugoslaalignment of social forces, and via, one of the greatest perspectives opened up for the world work-

> choked out by the falsifiers and revisionists in the Kremlin. Just as the action of the Yugoslav government in opening the frontiers to anyone who wishes to find out the truth about the happenings in Yugoslavia will give the lie to these distortions and slanders by the Soviet bureaucracy, the active solidarity of the working masses of every country with the Yugoslav masses who are building socialism will enable the revolutionary movement to hold aloft the banner of Marxism-Leninism and march forward from the isolation it was reduced to by the Kremlin. A brief resume of pre-war and pre-revolutionary Yugoslavia will facilitate the understanding of the immensity of the tasks achieved by the workers and peasants of that country.

> Yugoslavia was an agricultural colony of big industrial countries. Foreign capitalists raped Yugoslavia of her natural wealth, her raw materials. While she possessed all the basic raw materials she needed for the development of industry, her industry remained underdeveloped. Though she possessed agricultural raw materials enough to feed her population, her per capita income was almost the lowest in Europe. The poverty and low living standards of the masses resulted in a high rate of infant and maternal mortality (second only to backward eastern colonial countries) and a very low verage life expectancy.

#### Economy Was Exploited by Foreign Capital

Foreign capital dominated Yugoslav economy in industry and banking, and exploited both the riches of the country and the sweat of the people. As some of the Yugoslavs told us: "We who possessed the largest resources of bauxite (second in the world) had to ship it away to foreign countries and were forced to buy back our own bauxite, processed into aluminum finished goods, at exorbitant prices." This was true about every sphere of economic

Industrial development was deliberately held back, the potential electrical energy of the country remained untapped, her oil undrilled, and agriculture, which occupied three-fourths of the population, was primitive and uneconomic. The big landowners did not capitalize agriculture as it was not profitable, and the peasants were crushed under a load of debts and mortgages, living in appalling conditions of backwardness and misery.

The Serbian bourgeoisie ruled the country by oppressing and exploiting the other nationalities. To add to the general degradamovement it heads is submerged saka, and who immediately took tion of life came the fascist invasion during the war, with the up the defense of the Cominform attendant plunder and devastation by the Bulgarians, Italians and position in the Japanese CP, who Germans, who despoiled the country of its material wealth and equipment, destroyed her communications, razed over 500,000 habitations and butchered 1,400,000 of the population. Playing upon the national aspirations of the oppressed nationalities, the fascist hordes to the peasant population, and of and the Japanese CP can give overran the country, assisted in the rear by the Serbian and Croaindustry to agriculture, is more way to an even more serious cri- tian reactionary bourgeoisie and their agents, the Chetniks, Ustashis and Domobrovs.

The resistance war was thus not merely a national liberation war against the fascist invaders, but a revolutionary war for emancipation from the capitalist oppression at home. This is the essence of the Yugoslav overturn, a historical struggle that makes imperative the support of the working masses of every country who are struggling toward the same end.

The results of this social overturn we see when we visit Yugoslavia. The stupendous reconstruction and construction cannot be achieved unless under a socialist planned economy. To embark on a program of planned production the basic economic task of nationalization is a prerequisite. And by the nationalization of the basic means of production, transport, mines, factories, banks, and the state control of all foreign trade which are the economic conditions necessary to liquidate Balkan backwardness and raise the living standards of the masses - the conditions that are essential to

#### Reconstruction on a Vast Scale

The vast programs of industrialization and electrification which would eradicate poverty have been embarked upon, and the utilization of every human, every material source available to augment the national income, the ceaseless technical experimentation to increase the productivity of labor, indicate that the objective is to give economic and cultural freedom to the men and women who work at the means of production, and not to fatten a small section of capitalist exploiters. For in this era of capitalist decay a very common phenomenon in the capitalist world is the destruction of productive forces in order to maintain private profit!

We saw many factories in Yugoslavia - hydraulic machine factories, precision tool factories, textile factories, cement and tobacco factories, etc. Our stay was too short to see all the vast industrial processes that were changing the face of Yugoslavia and enabling it to rely more and more on its own technical and material resources. The May Day parade exhibited products of many spheres of industry - agricultural machine factories, electrical enterprises producing motors, generators, irrigation pumps, oil drillers, railway coach works, truck and shipbuilding industries, sound and film equipment industry, pre-fab factories, plastic, textile and tobacco factories. In short, every aspect of light and heavy indus-

try that old capitalist Yugoslavia had always obtained from abroad. Iron, oil, lead, bauxite, coal - all the basic requirements of neavy industry were being ceaselessly mined and exploited. Large and small hydro-electrical stations were being constructed in every republic of Yugoslavia to supply the necessary power for industry and agriculture. Already the production of electrical energy had increased 115% over that of 1939. The output of coal, iron and steel was 21/2 times more than that of 1939. Industrialization was certainly altering the relation between industry and agriculture, to the advantage of the former.

Could Yugoslavia recover so amazingly, changing herself from an under-developed country to an industrialized economy, if it was under the heel of foreign or native capitalism?

The most important problem facing the delegates to the 41st annual conference of the National Association for the Advancement of Colored People in Boston this month is what kind of political action program to adopt.

So long as the largest, oldest and most authoritative organization representing the Negro people in the United States continues to condemn the Democratic and Republican Parties in words but support them at the polls, no significant change in their contemptuous treatment of the aspirations of the Negro voters can be expected.

Only a complete break with both capitalist parties and the proposal of a new course of political action can inspire the Negro electorate after its disillusioning experiences with the parties in

The delegates to the Boston NAACP conference can and should intervene by smashing the labor-Negro coalition with the Democratic Party which prevents the working people from building their own independent political force, a Labor

The groundwork for such a party has already been laid by the development of joint legislative programs and collaboration of the NAA-CP and organized labor. The common enemy is clear - the Democratic and Republican Parties which combine to defeat the demands for repeal of the Taft-Hartley Law and for civil rights and social legislation.

The need for a new, independent Labor Party has been demonstrated negatively time and again by the failure of the "reward your friends and punish your enemies" politics of both labor and the NAACP.

The readiness of Negro and working class voters to back a Labor Party programmatically was indicated in the last presidential election when Truman, demagogically running on a platform pledging civil rights legislation and repeal of Taft-Hartley, upset all predictions by receiving an overwhelming majority of the votes.

The fate of the Wallace movement, which also supported civil rights legislation, only illustrates the need for a party broadly based on the labor

Many Negro leaders will agree readily and

have said privately for some time that a Labor Party is needed in this country and there is no doubt where the Negro voters would go if there were one. But there is no such party on the political scene, they observe, and certainly the Negroes cannot be expected to form a Labor

of bargaining with capitalist politicians have been fruitless. They should speak out with the truth:

"We can rely only on ourselves and our allies in the labor movement who need and want the same things. No more support to Democrats or Republicans. We must have a Labor Party."

Some who feel acutely the need for a Labor Party alternative to their liberal "friends" in the Democratic and Republican parties hesitate to speak out for fear that taking a position in advance of the official labor movement may isolate the Negro people from their closest allies and leave them exposed to victimization,

This type of objection misses the significance of the strategic position of the Negroes today as an integral part of the American working class which the labor bureaucracy cannot afford to ignore, and as a minority in the United States struggling for democratic rights in solidarity with colonial and colored people throughout the world, a fact which gives pause to the reactionary policies of the Truman administration seeking to maintain world capitalist rule."

A call for a Labor Party by the NAACP would provide powerful support to those tendencies in the labor movement, by no means few, who have long recognized the need but have been dormant or bessimistic. The representatives of 15,000,000 Negro people constitute a force to be reckoned with. Advocates of a Labor Party would take repeal the Taft-Hartley Act, heart and be encouraged to deepen their struggle.

The NAACP conference can take a gigantic step forward in the struggle of the Negro people for equality and simultaneously stimulate the advancement of the American working class by striking a clear political course toward a Labor

timized him.)

It was to be expected that the capitalist press would go all-out to give the impression that the Supreme Court has "banned" segregation. After all, that was one of the chief purposes of the court's rulings in the Sweatt, McLaurin and Henderson cases - to make the people (the Negro people especially) think that even if Congress and the White House won't do much about civil rights, at least the Supreme Court will.

But it was disappointing and pitiful to see most of the Negro press and the Negro leaders taking the same line as the capitalist papers. Because they know better (or ought to know better) than to believe that the Supreme Court decisions were really big victories for the Negro people. The plain unvarnished truth is that segregation definitely has not been banned for the overwhelming majority of the people who have suffered from it in the past.

The fundamental point in the three cases was the request made by the NAACP and the Alpha Phi Alpha Fraternity for the court to revoke and outlaw the white supremacist "separate but equal" doctrine that is the cornerstone of the Jim Crow system. When the court refused to do this, it was not banning but sanctioning the continuation of segregation. And that fact far outweighs the subsidiary concessions the court made to Sweatt, McLaurin and Henderson.

It is good that a few hundred or a few thousand Negroes may be able to enter certain Southern colleges. But it must not be forgotten for a minute that the same court ruling in effect authorized the continuation of Jim Crow conditions for hundreds of thousands and millions of Negro primary and high school students. This is like giving a starving man a crumb while withholding the loaf of bread that rightfully belongs to him. If that is to be counted as a victory, it is an extremely limited and not, as so many people foolishly or maliciously contend, a tremendous victory.

The court decisions had a political motive, and the political consequences refuted the claim that they represent a big step forward for Negroes.

A nationally known union leader told me a few

Later, Lucas retreated and promised a second test after all. But this incident showed that Truman feels he doesn't have to produce much in Congress this year. As long as the Negro leaders are going to shout themselves hoarse with praises for his Supreme Court, he figures he has enough of a "record" on civil rights to enable him to solicit Negro votes as successfully as he did in legislation which they oppose, but 1948. His interest in the civil rights fight never extended beyond that consideration anyhow.

THE REAL NEEDS

This conception clashes with the real needs and perspectives of the NAACP. Instead of becoming more "narrow"and "isolationist." it has to become more and more closely linked with the labor movement, without whose active collaboration the Negro people will be unable to put a finish to the Jim Crow system. (The presen leaders of the NAACP have plenty of faults, but it is to their credit that they recognize the basic identity of Negro and labor interests.)

Administration supporters appeared before the board to demand the removal of Local 12 Financial Secretary Randolph Gray and settlement of a dispute with a group of girls from the dues office who have been on strike against the local. The girls filed a list of over 50 grievances against the administration of the local and Gosser. Gray has not functioned for about a month after he reported a threat against his personal safety.

Two more incidents of violence took place before the board arrivers demand that there be a large ed to hold its hearings. In one, a Gosser supporter, Charles (Snick) Gross is charged with assault and battery against Clayton Rusch, former PAC Director in Toledo who has been out of the union for about two years.

In the other case Charles Ballard, 2-B Regional Director of the UAW, has been found guilty of a "breach of the peace." Ballard seized a picket sign from one of the striking girls who charged he waved it around as though he intended to strike her with it.

Rumors persist in union circles that at least two International representatives have broken with the Gosser leadership recently. However, these have not been confirmed at this time.

It is too early to evaluate fully the results of the International The wide range of climatic and Board sessions as they are still meeting at this writing. After the board's decisions are known, the opposition will be able to chart its future course more precisely.
