MacARTHUR, MATTHEWS **EMBARRASS TRUMAN**

Secretary of the Navy Francis P. Matthews and General Douglas MacArthur shocked the world last week with their bold admissions of American imperialism's real aims.

Matthews urged the U. S. to ? "declare our intention" of "instituting a war" for "peace." Mac-Arthur called for the "aggressive exploitation" of Formosa as a permanent U. S. military base from which to launch American air power to any point in Asia "from Vladivostok to Singapore."

Their statements threw such glaring light on American capitalism's brutal design for world conquest and the fraudulence of Washington's claims of "peaceful," "non-aggressive" intent, that Truman and the State Department were forced to publicly disavow them.

Matthews, addressing a Boston Navy Yard celebration on Aug. 25, brushed aside the humbug about "aggression" and "nonaggression." To "compel cooperation" for what he called "peace," he said, "we should be willing, a and declare our intention, to pay claimed that U. The Bill of Rights was being reduced to a scrap of paper by Truman, Congress and the courts even before the Korean war began. But now it is being slashed to ribbons in the Democrats and Republicans to decide which party can get the "credit" for putting over the most effective "anti-subversive"

The McCarran and Mundt bills. embodying most of the repressive legislation advanced by the Republicans, are so sweeping even the conservative N. Y. Times warns against them. But the House passed the Mundt Bill on Aug. 29 by the overwhelming vote of 345-20 (211 Democrats for, 17 against).

The Truman administration, pushing its own repressive measire, opposes the McCarran bill because, Attorney General McGrath told the Senate, it would be "ineffective" and would have 'doubtful, meager and inadequate esults.

But McGrath gave the administration's blessing to many of the McCarran bill provisions, and he criticized it because of its "omission" of a bill already passed by the House empowering the President in time of war or national emergency to extend anti-sabotage provisions "to such property and places as the President may designate."

McGrath demanded the restoration of this provision so that Truman would be able to exclude from any industries or facilities relating to the national security

McGrath's demand neatly sums up the lack of difference between the Truman and McCarran approaches. The McCarranites prooose to rely mainly on registration as the weapon for intimidating and suppressing opponents of war, capitalism and regimentation; the Trumanites propose to rely mainly on a purge of industry - that is, starvation - to achieve the same objective.

The passage of either of these bills would signify a death blow to political liberties in this country, no matter what the formal status of the Bill of Rights was. crisis, the struggle for Negro A worker distributing a prosocialist or anti-war leaflet or newspaper would be subject to mprisonment under the McCarran bill, to loss of his job under the of The Militant, the SWP has | Truman bill.

What difference would it make, under such conditions, if the Bill of Rights still remained on the books? The threat of imprisonment, the danger of being fired and blacklisted - these would be the reality for anyone wanting to express independent political views. The Bill of Rights then would be only a legal fiction.

A vote for the Democrats on election day will be a vote for the Trumanite method of subverting civil liberties, just as a vote for the Republicans will be an endorsement of the McCarran form versive" bill which, in flagrant of police state. So far as the railroad bosses are concerned the only change the 'seizure" will mean is that they vill now have military powers in addition to their ordinary rule over the workers and can issue their orders as the voice of the U. S. government.

For the workers, however, it they will have to continue to submit to the wages, hours and working conditions against which they have been opposed for more than two years.

The fraud of this "seizure," in which the government touches neither the ownership, management, control nor profits of the railroads, is made plain in Truman's order. The tragic irony of the situaion now confronting the railroad workers is that their top union leaders had begged Truman to seize" the railroads. These union efficials acted on the nonsensical assumption - whether they honestly believed it or not - that the railroad corporations feared "seizure" by the capitalist government even more than a strike and would capitulate.

It would be putting the most charitable interpretation on the ficial propaganda put out for union leaders' plea for "seizure" public consumption. "Either the entire old generation of Bolshevik leaders, with a single and sole exception, has really betrayed Socialism for fascism, or the present leadership of the USSR has organized a judicial frame-up against the founders of the Bolshevik Party and the Soviet state. Yes, that is precisely how the question stands: Either Lenin's Political Bureau was composed of traitors, or Stalin's Political Bureau is composed of falsifiers. There is no third possibility! But it is precisely because there is no third possibility that progressive public opinion cannot, at the very risk of its existence, evade making this difficult and tragic choice and explaining it to the popular

The Cause of Inflation

Some of the capitalist newspapers and politicians are again trying to hand us the old chestnut that rising wages are the cause of inflation. Some people used to be taken in by that gag. But it has been pretty well exploded by the economic developments since the start of the Korean war.

Every man, woman and child in the country knows what happened the moment Truman ordered U.S. armed forces to Korea. Prices shot up overnight. Within a few weeks, wages, which were at a virtual standstill, lagged some 13% behind prices. Wholesale commodity prices now are more than 20% higher than on June 25 — and it is noteworthy that industrial prices have gone up at a rate twice as fast as farm products.

At a secret Senate Appropriations Committee meeting with three top air force officers, as revealed by columnist Robert S. Allen in the Aug. 14 N.Y. Post, Air Force Chief of Staff Hoyt Vandenberg hinted around that, due to price increases since the start of the Korean war, the air force would have to have a lot more money just to take care of its

current plans. When prodded for the reason, he disclosed that the manufacturers had in six weeks raised their prices as much as 90% for air force supplies. "Generally," the General said, "the increases range from 40 to 60 per cent. One supplier hiked his price 90 per cent in one

"What for?" a senator asked. The General replied that "we don't know" but "they are not based on higher labor and raw material costs."

The real cause of the inflation lies in the profiteering of the capitalists who are making a killing out of scarcities created or anticipated as a result of the huge increase in government war spending. Last week the House of Representatives put its seal on a \$36 billion military budget, which will bring the total of federal annual spending to \$52 billion. And that's just the start. This means that about \$1 out of every \$4 of national income is being diverted to the federal government for war. That's where inflation starts — and not in any miserable wage raises that the workers may force from the employers in a frantic effort to keep up with skyrocketing prices.

Why Not Let the People Decide?

According to a Gallup Poll survey, a strong majority of the Canadian people are opposed to their government's sending troops to the war in Korea. Labor Challenge, the Canadian Trotskyist paper, summarizes the results of the survey in this manner: 39% are opposed unconditionally to sending troops; 15% are opposed conditionally; 12% are in doubt; and 34% are in favor. Forty-one per cent do not support even the sending of a single plane, ship or round of ammunition to interfere in the Korean civil war, let alone troops; while 26% go so far as to outrightly oppose, or withhold support from, even the American intervention.

Despite these figures, the Canadian government has announced that it will send troops to fight in Korea. Like the United States, Canada prides itself on being a democracy, but on the decisive issues a minority overrules the majority.

We don't know if the Gallup Poll has made a similar survey of sentiment in the United States; we don't care much because the Gallup Poll is biased on the conservative side in the wording of its questions and in the selection of the individuals it questions. But we are decidedly in favor of finding out what the American people really think about the war in Korea and in having the majority opinion determine the policy of the government.

What we advocate specifically is a national referendum, permitting the people to vote on the life-and-death questions of war or peace. The decision made in the referendum should be binding on the government, and not be regarded as simply a consultative vote. The first question to be voted on should concern the government's policy in Korea, with the people being asked to decide whether or not the American troops should be withdrawn from that country.

that the people already have a way of determining the country's policy on war of Spanish CP or peace. They say that the people can express their opinions by voting for or against various candidates for national office. But this is true only in a limited and indirect sense. Truman, for example, ran for office in 1948 on a "peace" program. Most of the people who voted for him had no way of knowing that he would suddenly hurl the U.S. into an undeclared war in Korea. That is why we find a referendum on this question, binding on whoever may be in office, infinitely more democratic and effective.

What are the opponents of a referendum afraid of, anyhow? Do they suspect that in spite of the thunderous war propaganda their policy does not command the support of a majority of the American people?

Franco and Truman

It is reported in the press that Truman plans to impound the 621/2 million dollar loan to Franco passed in Congress; the appropriation would remain in the U.S. Treasury until Truman sees the need to expend it.

By this neat device, Truman achieves a number of political ends simultaneously. He escapes the need of vetoing the Franco loan, and thereby also the military appropriations bill to which the loan is attached as an amendment. He preserves the guise of being an opponent of Franco which is indispensable for the union bureaucrats in hustling votes for the Democratic Party in the coming election. He diminishes the embarrassment to Atlantic Pact allies in Western Europe where solid anti-Franco sentiment exists. Finally, he lets it appear that he, the head of the Democratic Party, remains loyal to campaign pledges even if the majority of Democratic Congressmen have "strayed" away from them.

It goes without saying that this is how the crawling "labor leaders" will try to sell Truman's role in the dirty Franco business to the workers. Like everything else they say about Truman, their statements will be compounded of half-truths and deception.

They will not say that Truman made

only the most lukewarm efforts to stop the passage of the loan; he chided the "erring" Congressmen but did not threaten them with any reprisals. They will not say that Truman's opposition to the Franco loan is purely a matter of tactics and propaganda since the State Department has already made it plain that Franco can get U.S. money by applying to the Export-Import bank and private bankers. Nor will they say that at the first moment Truman feels the coast is clear he will unfreeze the loan, using the old alibi "in order to save American

But the subterfuges and excuses the Murrays and Greens may dream up for Truman won't go for the gang of Francoloving Democrats who made the U.S. Congress the scene of a deliberate demonstration in favor of fascism in Spain. A vote for the Democratic Party in this election will be a vote for Franco. That will make little difference to the spineless, venal creatures who hold the reins of power in the unions. They have been sleeping in the same bed with the white supremacists and the upholders of lynch law. Why not make a little room for Franco, the great defender of "Christian civilization"?

Get out the vote! — even if it leads straight to the concentration camp.

SLANDERS TROTSKYISM

Labor Challenge, Canadian Trotskyist paper, reporting Coldwell's speech, notes that he went out of his way to attack Trotskyism and to lie about it, lumping it together with fascism and Staffnism as a "form of totalitarianism." "Whether it is the Stalinists or the the Trotskyists that rule the USSR," declared Coldwell, "the results would be identical; the Trotskyists are just the other side of the Stalinist coin, just as dogmatic and ruthless, just as undemocratic and just as fanatically devoted to the Leninist tactics of divide and rule. Whether it is the Stalinists, Trotskyists or Fascists we shall always oppose their kind, no matter where they may arise."

While calling for a ruthless struggle against Marxism and Trotskyism — that is, genuine socialism — Coldwell urged "compromises" with other forces no matter how "strange," - that is, with the capitalists, militarists and all agents of imperialism. "Sometimes," Coldwell said. "they're pretty strange people whom we have to stand with against the onward march of Communism," but, he vowed, "we will stand with those who will stand

The paper is published by Jose del Barrio and Felix Montiel, former members of the Political Bureau and the Central Committee of the Spanish CP. Strongly cpposed to Moscow domination. the aim of this group is to provide rallying center for all tendencies ooking towards the eventual creation of a new party. Its prin cipal aim is the creation of a road united front movement in Spain and in emigration circles to be known as the "anti-fascist workers and peasant alliance."

The Spanish CP, del Barrio pointed out in a press statement, s under the complete and rigid control of the Kremlin. Dolores Ibarruri Passionaria, the general secretary of the party, was never elected to he post, and the leadership is in the hands of a group of five members appointed by Moscow but never approved by a party conrention. The activities of the Spanish CP have diminished to the vanishing point in the past ew years.

Del Barrio attributes this situation to the policy of the leaders of the USSR and the Cominform Just as World War I, he says, led o the political liquidation of the Second International as a revolutionary leadership, so the Second World War has led, due to the policy of hegemony of the USSR, to the political liquidation of the Third International as a revoluionary leadership.

"However, Chen Yi and his henchmen ruthlessly, corruptly and avariciously imposed their regime upon a happy and amenable population. The Army conducted themselves as conquerors. Secret police operate freely to intimidate and to facilitate exploitation by Central Government officials. . .

Drooling openly, the fact-finder reported: "The island is extremely productive in coal, rice, sugar, cement, fruits and tea. Both hydro and thermal power are abundant, The Japanese had efficiently electrified even remote areas and also established excellent railroad lines and highways. Eighty percent of the people can read and write, the exact antithesis of conditions prevailing in the mainland of China."

Then, couching his recommendation for procedure in diplomatic language, General Wedemeyer wrote, "There were indications that Formosans would be receptive toward U. S. guardianship and U.N. trusteeship. They fear that the Central Government contemplates bleeding their island to support the tottering and corrupt Nanking Machine and I think their fears well founded."

Now seeking UN legalization of his recent military move in Formosa, President Truman has officially backed UN Delegate Warren Austin's statement that "The actual status of the island is that it is a territory taken from Japan by the victory of the Allied forces in the Pacific. Like all other such territories, its legal status cannot be fixed until there is international action to determine its future.'

A Shift in the U.S. Line

But the U.S. State Department's official publication said, "By the terms of the Cairo Declaration of December 1, 1943, the U.S. and China declared their intention that Formosa should be restored

Accordingly, in September 1945, the administration of the island was taken over from the Japanese by Chiang Kai-shek's forces "assisted by small American teams."

The iron curtain of Allied censorship concealed for some time the story of the rape of Formosa that followed, of the heroic resistance of the Formosan people, and of the blood-bath in which their struggle was drowned by Chiang Kai-shek's troops. But in 1949, when it suited the aims of the State Department to lift its protective cover from its erstwhile "democratic ally," the truth was

The Social Democratic Party continues its role of 'physician for dying capitalism' and owes its relative strength only to the lack of a class party in Western Germany."

The organization committee for the new party has now published the first edition of its paper, Freie Tribune under the editorship of Joseph Schappe who was editor of the Freies Volk, central organ of the German CP, before his expulsion from the Stalinist party.

THE COMING **AMERICAN REVOLUTION**

By James P. Cannon

This pamphlet deals in detail with the great transformation of the American working class since the Thirties. It says, and explains why, "In the study and analysis of this great transformation, rather than in vapid ruminations over the 'backwardness' of the American workers, one can find the key to prospective future developments." It is must reading for every participant and student of the socialist movement.

The Militant has already written about the purge that is going on in the maritime industry, but it is worth repeating. At the latest report, more than 100 American seamen have been barred from their jobs merely because of their ideas. None of them is even accused of plotting sabotage or engaging in espionage; they are dismissed with the highly vague phrase - "poor security risk." I can think of nothing more shameful than to deprive a man of his livelihood simply because he has minority or unorthodox political or social opinions. And it is not any less shameful just because the union leaders are sanctioning this Nazi-like procedure.

Elsewhere in this issue there is a report that President Truman is asking for the power to fire any person "SUSPECT of a purpose to engage in sabotage or espionage" from any industry "relating to the national security," which means just about every industry. If he gets this power, then no one who utters an unpopular opinion today, or in the future, or who has uttered an unpopular opinion in the past, will be safe in his

If you want a preview of what it will be like if the President gets the power he is seeking, then you ought to take a look at the case of Jean Muir, the actress who has just been fired off the Aldrich Family television show. A number of jingoistic groups demanded her dismissal on the ground that she had been named as a member of a number of organizations on the "subversive" blacklist by Counter-Attack, a periodical that specializes in redbaiting and has close ties to the FBI.

Some of the organizations Miss Muir said she had never heard of. Others she had belonged to at the same time as Eleanor Roosevelt and Senator Frank Graham and had resigned from a long time ago. Of membership in the Progressive Citizens of America, she noted that she had been against Wallace's presidential candidacy. (Her

husband said she voted the straight Democratic ticket.) She denied that she is a Communist or ever was one and emphatically denounced then as "a vicious and destructive force."

But it didn't do her much good. The sponsor of the show, the General Foods Corporation, threw her out just the same, saying they were not making a judgment on the merits of the case Ends in New York but that they couldn't afford to have a "controversial personality" in the cast. "It seems unbelievable," said Miss Muir, "that an actress can have such a setback to her livelihood and career, based on nothing more than unsubstantiated accusations made over the telephone and by telegraph." She said she had been paid in full for her 18-week contract, "which could have been legally cancelled if the charges were true." And sadly she declared, "All of this seems most un-

just and unfair.' And so it is, But purges and penalties based on nothing but "unsubstantiated accusations" have become the pattern of H-Bomb democracy. The Socialist Workers Party and many other organizations were put on the "subversive" list on the basis of unsubstantiated accusations and deprived of even an open hearing at which to defend themselves. Seamen are being removed required number for all the 61 from their jobs on the basis of unsubstantiated counties in the state. accusations, and now Truman wants to do to the whole working class what is being done to the seamen and has already been done to Miss Muir.

When you were unemployed back in the 1930's did you ever join the Workers Alliance or the Unemployed Councils? Did you ever attend a meeting sponsored by the National Negro Congress, or "associate" with it to the extent of signing one of its petitions? Hundreds of thousands if not millions of American workers can be classified as "subversive" in such a way and deprived of their livelihood under the powers sought by the President. And even if they never had anything to do with any of the organizations on the "subversive" list, they could still be penalized and driven out of their jobs on the vague charge of "poor security risk" - the industrial

equivalent of a "controversial personality." How many more cases like Jean Muir's must there be before the American people awaken to SWP on the ballot in this state. the danger facing them and put an end to these "most unjust and unfair" violations of our cherished liberties and rights?

Don't Be A Political Scab

- By William E. Bohannan -SWP Candidate for Congress, 11th District, N. J.

Looking through the CIO News last week, I noticed a picture of a labor-sponsored election rally in Ohio and a banner at the rally which read, "Don't Be A Political Scab - Register and Vote." Evidently the labor leaders think that a worker who doesn't register is a political scab. In my opinion that is pretty strong and exaggerated language. There are many workers who don't register or vote because they know that in their districts they will be faced only with the choice between Democratic and Republican candidates on the ballot and, feeling that there is no important difference between them, can't see why they should waste time picking between Tweedledum and Tweedledee. It seems to me that a more appropriate slogan for workers who refuse to register and vote, especially in districts where there is a real alternative at the ballot, would be: Don't be a political "free rider" - like the fellow in the plant who doesn't pay his dues but accepts the benefits and wage increases won by the union.

But that doesn't invalidate the slogan, Don't Be a Political Scab, which is very good, necessary and timely, but which is being misused by the union bureaucrats when they apply it to the orkers. The ones it should be applied all others are the union bureaucrats themselves. A scab is one who sides with the bosses against the workers. In a political sense that is just what the union leaders are doing. They side with the bosses' parties, they run errands for the bosses' parties, they spend money (the workers' money) rounding up votes to elect the candidates of the bosses' parties, they lie about the aims and cover up the record of the bosses' candidates whom they support. What is more, they oppose the formation of a labor party just the way a scab opposes the formation of a union, and they crack down viciously on workers who oppose their false political policies. Will some smooth - tongued union leader please explain to us what political scabbing consists of if it doesn't consist of the practices I have listed above?

There are only three candidates for Congress in my district - a Republican named Vreeland Sept. 22, at the Hotel Capitol. The whose last job was as a kind of lobbyist for a big corporation; the Democratic incumbent named Addonizio; and myself, representing the Socialist Workers Party. The labor leaders, almost to a man, are backing Addonizio and painting him up as a great "friend of labor." They claim he has a "perfect record" in Congress, but that's a fraud. The way he gets his "perfect record" is by careful An important address on foreign doctoring of the facts. For example, the labor policy will be delivered by Hansen. leaders praise him because he voted against the Republican McConnell amendment that stripped the teeth out of the FEPC bill last February. But they don't mention the fact that Addonizio turned around a few hours later and voted for that same toothless FEPC measure when it was presented as a bill instead of as an amendment. The labor leaders hail him as a defender of civil liberties and an opponent of McCarthyism and witch-hunts. But they are quiet and are going to keep on being quiet about the fact that last week Addonizio, like practically all the other Democrats in the House voted in favor of the Mundt-Nixon police state bill, which both the CIO and AFL are on record against. If such a man is a "friend of labor," then so are Mundt and Nixon.

Now of course the union leaders have the right to support any candidate they choose. But they have to be called to account and sternly disciplined when they commit the labor movement to support of reactionary capitalist candidates by means of lies and deceptions. If they object to being called political scabs, then I am willing to withdraw it. But only because there is another term that fits them more exactly - actually, they are would-be political scab-herders.

The Embers of Hatred

By Joseph Keller

General Omar Bradley said not long ago that "it is obvious that workers live near factories and that if you bomb the factories you may bomb the people." This is the fact that must be kept in mind when we read Gen. MacArthur's daily war communiques with their long accounts of highexplosive and napalm fire bombing of Korean cities, towns and villages on a scale comparable to the bombings in Germany and Japan during

There can be no doubt that the U.S. air attacks from one of end of Korea to the other are resulting in frightful massacres of civilians. This has been confirmed, in part, by the admissions of leading commentators for the American capitalist press, like Walter Lippman of the N. Y. Herald-Tribune and Hansen Baldwin of the N. Y. Times.

Korea - south as well as north - is being ravaged and ruined. It takes little imagination to visualize what is happening to the whole Korean people when we read in an Aug. 27 United Press dispatch from Tokyo that Lieut. Gen. George E. Stratemeyer, commander of the Far East Air Forces, "said United States planes already had heavily damaged Communist supply lines with 152,000 tons of bombs, 10.000,000 rounds of ammunition and 33,670 rockets."

The horror being visited by air on the helpless Korean civilians, including hundreds of thousands of refugees, is matched by the atrocities commiteed against them by American ground troops and the South Korean forces of the Syngman Rhee dictatorship, the murderous puppet regime which Washington is seeking to maintain by force

of arms. Some of the facts of the "utmost savagery" of the U. S. forces have been told by John Osborne, senior Time-Life correspondent, as reported in last week's Militant. He told of the "blotting out of villages" and "the shooting and shelling of refugees" because of fear that they "may" include North Korean guerrillas or otherwise be

aiding the North Korean forces. The hatred of all Koreans for the U.S. invaders is unquestionably a major factor in the

ability of the North Korean army to continue its fierce attacks in the face of the now-admitted superior U. S. fire power. It is evident that virtually the entire populace is supporting the forces trying to drive the Americans out of their ist of the California Institute of that of Ed Carey, formerly a country and that the U.S. forces are waging war Technology. on the whole Korean people.

Even what Osborne calls the South Korean "helpers" of the U. S. - the brutal Japanesetrained soldiers of Syngman Rhee's regime have been disaffected by the attitude of the Americans. The American command is trying to overcome the hostility with what it calls the "buddy system," as reported on Aug. 25 by the Associated

This program - "still on a small-scale experimental system" - provides that each American soldier has a South Korean soldier with him all the time to teach him U. S. tactics "varying from military matters to personal hygiene." The dispatch explains:

"This is a start on the job of repairing the relations between the U.S. forces and the South Koreans, who have suffered as innocent victims of the anti-infiltration measures. The G.I.'s had learned the hard way to distrust Korean 'refugees,' so they eagerly obeyed orders to raze evacuated native huts to prevent enemy troops from hiding in them. . ." Only, as other reports have disclosed, the huts weren't always evacuated.

A further glimpse of what is going on in Korea is given by Robert P. Martin, of the Overseas News Agency, in an Aug. 27 report from "somewhere in Korea." He says that if the U. S. forces succeed in driving the North Korean army into retreat, "we will be moving back through destroyed villages, through lands we devastated from the ground and air during our retreat. The Koreans, number of inquiries about availwho have known only poverty all their lives, will be on the edge of despair and disaster.
