Biased Judge Rushes Negro Boys to Chair

No Reliance on Capitalist Justice; Only Mass Pressure of Workers Can Scuttle Boys

For the third time in three previous years, a Jackson, Miss., judge has condemned Negro boys to the death penalty, held by Heywood Patterson guilty of the murder of a white woman. Despite protestations of the Southern press, the judge’s action is not an exception, but is the outcome of the practice of the Southern courts. They have always been against the Southern courts as the Southern press. They are the judges of the South, and their method of doing the job is to follow the Southern press. They are the judges of the South, and their method of doing the job is to follow the Southern press.

The Southern press and the judges who will use their methods are opposed to the Southern press, and the press of the South. THE LYNCHING WAV

In the initial outbreak of lynching that swept the country, the sensationalism of the newspapers and the lurid publicity given to the incidents by some of the leading organizations of the left, had created a public opinion that lynching was a rare phenomenon. But the facts are that lynching is a common occurrence in the southern states, and that it is predominantly a Southern problem. The recent outbreak of lynching in the South, moreover, has its roots in the social and economic conditions of the region, and is an expression of the mass resentment of the lower classes against the exploitation and oppression of the middle and upper classes.

The psychological factors for a rapid trend towards the development of the new type of lynching are significant. The growing sense of helplessness and hopelessness among the working class, the increasing alienation from the political process, and the rapid growth of fascist organizations, have all contributed to the rise of the new lynching phenomena. The leadership of the fascist organizations has actively exploited the situation, and has orchestrated a series of mass thugs to carry out the lynching attacks.

The capitalistic system, with its inherent contradictions and crises, is the underlying cause of the new lynching phenomena. The exploitation and oppression of the working class, the growing inequality of wealth and power, and the rising levels of unemployment and poverty, have all contributed to the development of the new lynching phenomena. The fascist organizations, with their appeal to the masses, have been able to exploit this situation and to organize the working class for the purpose of carrying out the lynching attacks.

The new lynching phenomena have created a climate of fear and terror in the South, and have led to a breakdown of the democratic process. The government has failed to take有效 measures to prevent the lynching attacks, and has been unable to control the fascist organizations. The new lynching phenomena have thus become a serious threat to the democratic process and to the future of the country.
