**Don't Let It Happen Here in America!**

As an Editorial

As McCarthyism begins to give unity and cohesion to a now-naive fascist movement, let us take a look at the consequences of the past and the enormities.

We face the biggest decision in the history of our country. Which road shall we take; Fascism or Socialism?

What will America look like if it goes fascist?

For wage workers, it means the end of the unions. The site of our paycheck will be decided by the boss. Your hours and working conditions will be decided by the boss. Your job is decided by the boss. Objectives will be referred, in the club-wielding power of the FBI.

Your standard of living will drop disastrously. Hunger will start everywhere.

**Under the Iron Heel**

The youth will be regimented and militarized, converted into fascist-minded ministers, indoctrinated with the notions of informing the police and the FBI. The bodies of millions will be sacrificed on foreign battlefields.

There will be no more talk of equal pay for women and opportunities to choose an interesting, well-paid, liberating career. Fascism will demand a working-class army, doing the better to produce new generations of cannon fodder.

Four thought, five inquiry, free speech — all this will go under the iron heel. The schools, staffed by fascist propagandists, will mould the tender minds of American children in the fascist parable of submission and obedience.

The very word "insecurity" will drop out of the language. The future will appear bright and attractive like the long-ago Nebraska of the good old days.

**Barbarism on a Global Scale**

All this is only the beginning.

Remember the headman's axe in Nazi Germany — the gas chambers and systematic extermination millions of Jews.

What do you think will happen in fascist America when the capitalist orders decide to get rid of the bloated blood of the American people? Then this land will indeed write in red.

You think this picture is exaggerated?

Many Germans have thought the Hitler danger was exaggerated.

And still we haven't finished the picture.

The strongest point, the most insidious, is the most subtle: the psychological impact of fascism. The picture of this nation's future is grotesquely painted in lurid colors streaming across the world.

The world will see civilization going into exile as the fascist storm sweeps over the continent.

The whole world will realize fascism is the price we pay for the capitalist system. The world will witness the destruction of the working class, the destruction of freedom, the destruction of the American people.

**America Under Socialism**

But this doesn't have to be. America doesn't have to take the fascist road.

Socialism will bring good health, freedom, peace, security, good wages, and a genuine democracy.

Socialism will bring the end of the capitalist system and the beginning of a new era of freedom, justice, and human dignity.

Socialism will bring the end of the working-class struggle and the beginning of a new era of cooperation and unity.

Socialism will bring the end of the capitalist class and the beginning of a new era of equality and justice.

Socialism will bring the end of the capitalist exploitation and the beginning of a new era of freedom and equality.

Stalinist Policy On McCarthy

By Martin Porter

Not every worker in the United States is aware of the McCarthy witch-hunts of the early 1950s, of which about 150,000 American workers were accused of being Communists. The United States was then a class society, with the working class making up the majority of the population. The anti-communist witch-hunts were carried out by the Stalinist U.S. Communist Party and were aimed at the working class, who were the chief targets of the anti-communist movement.

U-Spies -- The Universal Automatic Stoolpigeons

By Art Preis

In 1957, early in the New Frontier administration of the U.S. President, a committee in the U.S. Senate released a report that it claimed would prove that the Universal Automatic Stoolpigeons (UASS) were real. The committee's report was later discredited and the UASS are now considered a figment of the imagination.

Churchill's A-Bomb Disclosures

By Myra Tamer Wates

FIFTY YEARS AGO (Dec. 7, 1957) -- "The Second World War was but a small prelude to the great nuclear holocaust of the next century. The first successful trial explosion of the atomic bomb was in the desert at Alamogordo, New Mexico, on July 16, 1949. Britain exploded one in 1952, and then it was the turn of the Soviet Union, which followed with its first test explosion on Aug. 29, 1949. Since then, other nations have exploded A-bombs, including the United States, China, and France."

AFL Pipe-Fitters In Chicago Seek Thirty-Hour Week

By Bert Dech

The Chicago local of the AFL Pipe-Fitters Union, which has 16,000 members, is petitioning the Chicago City Council to consider a bill which would establish a 30-hour work week for construction workers in the city.

9 Defy Witch Hunters At Cleveland Hearing

(Continued from page 1)

But even though the U.S. Senate has not been able to prove the existence of the UASS, the witch-hunts continue. The U.S. government is using the same tactics as in the McCarthy era, where the government tried to silence opposition by labeling it as subversive.

Defend Our Class Brothers in Bolivia

We have just received word from Bolivia that the government has issued an order for the arrest of Adlai Stevenson, the American ambassador to the United Nations. Stevenson has expressed support for the workers' struggle for higher wages and better working conditions.

The workers of Bolivia have been on strike for several weeks, demanding a raise in wages and improved working conditions. The government has been reluctant to meet their demands, leading to increasing tensions.

We call on all workers to stand in solidarity with our brothers in Bolivia and to support their struggle for a better future. Together, we can build a world where workers' rights are respected and where we can live in peace and prosperity.

Shachtman and Cochran -- Their Strange Affinity

By Joseph Hansen

Shachtman is the first political to reject Stalinism. He was also the first to break with the Workers' Literature Section of the Communist Party. This was a significant moment in the history of the Communist Party, as it marked the beginning of a new era of political debate.

Shachtman's break with the Party was not easy. He had been a dedicated member for many years, but he was unable to reconcile his political views with the official line of the Party. This led to a significant split within the Party, which continues to this day.

We stand in solidarity with the workers of Bolivia and with all those who are fighting for a better world. Together, we can build a world where workers' rights are respected and where we can live in peace and prosperity.

A Steelworker Tells Reaction to McCarthy

(Continued from page 1)

?What kind of politics is this? The only people we are here to talk to are reds."

"If you think we are fools, you are not only wrong. We are here to talk to the right people."

The steelworker went on to say that he thought McCarthy was a fake and that he did not believe in his politics. He said that he was fed up with the lies and that he did not want to hear any more of them.

"I don't want to hear any more of your lies. I'm fed up with it."

The steelworker's comments were echoed by many of the other steelworkers present. They were all fed up with the lies and the politics of McCarthy and were determined to stand up for their rights.

Flunk Out

In other words, Tallmadge publicly defied the laws of the United States and in effect called for sedition.

Eight days later Stevenson spoke to the workers of the United States Steel Corporation in Chicago. The workers were demanding an end to the war and a reduction in the working week.

"I think the workers of the United States Steel Corporation are right. They have the right to strike and I support their cause."

Stevenson's support for the workers was not well received by the company. They were determined to keep the workers in line and to prevent any further protests.

The steelworkers were determined to stand up for their rights and to fight for a better world. They were determined to stand up to the power of the company and to the politics of McCarthy.

Brownell’s Brief
By John Blake

Brownell's brief was written in defense of the New Jersey CIO. It is titled, “The Case of Brownell, The CIO Case.”

The brief was presented in 1938 and is available online. It is a legal document that argues for the rights of workers and the CIO to organize and bargain collectively.

The brief discusses the history of the CIO and its role in organizing workers. It argues that the CIO has been successful in improving working conditions and increasing wages for its members. The brief also discusses the role of the government in regulating the labor market and protecting workers' rights.

Brownell's brief is an important document in the history of labor law and the development of the CIO.
