Stormy Student Protest Against John Gates Ban

By Henry Giltos

MAR. 23 — The recent action of authorities barring essays by the weekly workers newspaper The Militant from New York's College of the City University has done nothing to stem the enthusiasm of the Militant's supporters. (See page 2)

Behind the New Cuban Crisis

Defies Racist "Traditions"

By Fred Halstead

MAR. 28 — Sparked by 300,000 shipyard workers, the British working class is preparing in mass* action to repulse the capitalist class and its government to make their voices heard. The Militant, with the British workers, is fighting a political and a physical struggle. For, as the British workers have written, "This is a matter of life and death!"

Regroupment Prospects Discussed in New ISR

Behind the Crisis of Regime in Cuba

By William Bundy

The regime of General Fulgencio Batista, which has held Cuba in the iron grip of its brutal rule, is in serious crisis. Batista's regime has faced a number of setbacks in recent months, and its prospects for survival are uncertain. The government has attempted to suppress opposition movements and silence criticism, but the resistance has continued to grow. The recent election of the Cuban Constitution in 1940 was a significant moment in the history of the country, marking the end of the Spanish occupation and the beginning of the modern era. The Constitution established a democratic form of government with a strong presidency, and provided for a Congress of Deputies and a Senate. However, the government has failed to implement many of the provisions of the Constitution, and has instead maintained a repressive regime. The government has cracked down on any form of criticism or dissent, and has suppressed opposition movements. The government has also faced economic difficulties, with high inflation and skyrocketing prices. The government has attempted to address these issues by implementing economic reforms, but these have been met with resistance and have not been successful. The government has also faced military challenges, with a number of rebels and guerrilla groups fighting against the regime. The government has responded to these challenges by increasing its military presence, but this has not been effective in suppressing the resistance. The government has also faced international pressure, with a number of countries, including the United States, imposing sanctions and providing aid to opposition movements. The government has attempted to respond to this pressure by improving its relations with other countries, but this has not been successful. The government has also faced internal challenges, with a number of factional splits and power struggles within the ruling party. The government has attempted to maintain control over these factions, but this has been difficult. The government has also faced a number of social and economic problems, including poverty, unemployment, and lack of basic services. The government has attempted to address these issues, but this has not been successful. The government has also faced international challenges, with a number of countries, including the United States, imposing sanctions and providing aid to opposition movements. The government has attempted to respond to this pressure by improving its relations with other countries, but this has not been successful. The government has also faced internal challenges, with a number of factional splits and power struggles within the ruling party. The government has attempted to maintain control over these factions, but this has been difficult.
A New Attack on the Foreign Born

Since the opening of the cold war, foreign workers have been a special target for the radical right, particularly vulnerable because of their lack of citizenship. Special surveillance and persecution of the foreign-born has been a constant feature of the House Un-American Activities Committee throughout the cold war. The House committee has now moved to Chicago to continue its attacks on foreign language press as a major target.

The committee made the astounding "discovery," last week, that 15 of the 18 editors of foreign-language papers before it were "Communist-led." "We believe," according to the attorney's opening statement, "that they are a threat to the unity of the nation and to the security of the people of this country.

The committee's case is built on the fallacy that because a publication is of foreign origin, the committee may use its powers of field hearings and contempt proceedings against it. The committee's principal reason given for this completely unjustified attack is the fact that the publications in question are used by the foreign-born for discussion of the class struggle. The House committee has now moved to Chicago to continue its attacks on foreign language press as a major target.
